Pediatrics [Lippincott Williams & Wilkins](#) *ere is a concise, practical guide for third year medical students seeking to make the most of their pediatric clinical clerkship. Stressing logical, efficient problem solving, differential diagnosis and implementation of treatment, the text also helps the reader understand the distinctions between ambulatory and in-patient settings* **Climate Change and Global Crop Productivity** [CABI](#) *Annotation. Worldwide climatic changes have been raising concerns about potential changes to crop yields and production systems. Such concerns include the ability to accommodate these uncertain effects in order to ensure an adequate food supply for an increasing population. Written by leading international experts, this book is the first comprehensive examination of the potential effects climate change, particularly green house gases, will have on agroecosystems. It also reviews the effects such systems have on climate change itself.* **Language, Culture, Computation: Computational Linguistics and Linguistics Essays Dedicated to Yaacov Choueka on the Occasion of His 75 Birthday, Part III** [Springer](#) *This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of this 75th birthday. The present three-volumes liber amicorum, several years in gestation, honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaacov's research has had a major impact not only within the walls of academia, but also in the daily life of lay users of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s, a project in which he is currently involved is proving to be a sensation, as will become apparent from what follows. Yaacov Choueka began his research career in the theory of computer science, dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages, Yaacov moved to natural languages. He was a founder of natural-language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role, together with Aviezri Fraenkel, in the development of the Responsa Project, one of the earliest fulltext retrieval systems in the world. More recently, he has headed the Friedberg Genizah Project, which is bringing the treasures of the Cairo Genizah into the Digital Age. This third part of the three-volume set covers a range of topics related to language, ranging from linguistics to applications of computation to language, using linguistic tools. The papers are grouped in topical sections on: natural language processing; representing the lexicon; and neologisation.* **Altered State? Assessing how Marijuana Legalization in California Could Influence Marijuana Consumption and Public Budgets** [Rand Corporation](#) *Legalizing marijuana in California would lead to a major decline in the pretax price, but the price for consumers will depend heavily on taxes, the regulatory regime structure, and how taxes and regulations are enforced. The lower price and nonprice effects will increase consumption, but it is unclear by how much. There is much uncertainty about the effect on public budgets; even minor changes in assumptions lead to major differences in outcomes.* **Predicting Soil Erosion by Water A Guide to Conservation Planning with the Revised Universal Soil Loss Equation (RUSLE)** [United States Government Printing](#) *Introduction and history; Rainfall-runoff erosivity factor (R); Soil erodibility factor (K); Slope length and steepness factors (LS); Cover-management factor (C); Support practice factor (P); RUSLE user guide; Conversion to SI metric system; Calculation of EI from recording-rainage records; Estimating random roughness in the field; Parameter values for major agricultural crops and tillage operations.* **Can Britain Feed Itself? Control of water pollution from cropland justice on Appeal Advances in Integrated Soil Fertility Management in sub-Saharan Africa: Challenges and Opportunities** [Springer Science & Business Media](#) *Food insecurity is a fundamental challenge to human welfare and economic growth in Africa. Low agricultural production leads to low incomes, poor nutrition, vulnerability to risk and threat and lack of empowerment. This book offers a comprehensive synthesis of agricultural research and development experiences from sub-Saharan Africa. The text highlights practical lessons from the sub-Saharan Africa region.* **Methods in Soil Biology** [Springer Science & Business Media](#) *In terrestrial ecosystems, soil microorganisms and soil animals are essential for litter degradation, soil formation and the availability of nutrients and trace elements. The measurement of biological soil parameters allows a rapid evaluation of the effects of chemical and physical influences due to pollutants or soil management. This book introduces a number of well proved methods for the analysis of carbon, nitrogen, phosphorus and sulfur cycles. It focuses further on the determination of the number and biomass of microorganisms, algae and animals in the soil. Particular emphasis is placed on the comprehensible and complete description of the experimental procedures.* **Water for Every Farm Yeomans Keyline Plan** [CreateSpace](#) *"Comprehensive whole farm design, amplified contour cultivation, water storage in farm dams, layout better farm roads, quick gravity irrigation, contour strip forests, subdivision design, healing erosion, solving salinity"--Cover.* **The Standard Physiology: with Notes on Anatomy and Hygiene; Aid to the Injured; Disinfectants, Etc Also Containing Explanatory Index to the "standard" Manikin Negotiating Enslavement Perspectives on Slavery in the Danish West Indies** *These essays represent a rich cache of historical presentations of papers from past Annual Meetings of The Society of Virgin Islands Historians* **Survey of Flora World Almanac and Book of Facts 2007** [Turtleback Books](#) *Features information on nations, states, and cities, celebrities, sports, consumerism, the arts, health and nutrition, United States and world history, and numerous other subjects* **The Role of Ecosystem Services in Sustainable Food Systems** [Academic Press](#) *The Role of Ecosystem Services in Sustainable Food Systems reveals, in simple terms, the operational definition, concepts and applications*

of ecosystem services with a focus on sustainable food systems. The book presents case studies on both geographical and production system-wide considerations. Initial chapters discuss concepts, methodologies and the tools needed to understand ecosystem services in the broader food system. Middle and later chapters present different perspectives from case studies of ecosystem services derived from some of the key sustainable food production systems used by farmers, along with discussions on the challenges of deriving full benefits and how they can be overcome. Researchers, students, scientists, development practitioners and policymakers will welcome this reference as they continue their work related to sustainable food systems. Introduces the concept of ecosystem services in simple terms for a wide readership Provides an explanation of sustainable food systems Contains the tools to identify and quantify ecosystem services in sustainable food systems Identifies ecosystem services in specific systems utilized for sustainable food systems Categorizes the challenges of deriving maximum benefits of ecosystem services **Mass-reared Natural Enemies Application, Regulation, and Needs** Entomological Society of America **VA Secrets Revealed! Simultaneous. Hardcover available. **Civil Procedure of the Trial Court in Historical Perspective** The Lawbook Exchange, Ltd. Millar, Robert Wyness. Civil Procedure of the Trial Court in Historical Perspective. New York: Published by the Law Center of New York University for the National Conference of Judicial Councils, 1952. xvi, 534 pp. Reprint available November 2004 by The Lawbook Exchange, Ltd. ISBN 1-58477-458-4. Cloth. \$95. * Reprint of a title from the Judicial Administration Series published by the National Conference of Judicial Councils. Millar [1876-1959], a professor at Northwestern University Law School, was a leading authority on civil procedure and its history. Written near the end of his career, the present study is a brilliant summary of his life's work. It discusses antecedents of the Anglo-American system, the evolution of procedure and American and English civil procedure in the nineteenth century. Other chapters discuss the development of specific areas, such as introduction of the cause, mode of trial and voluntary dismissal. **The Federal Courts Challenge and Reform, Revised Edition** Harvard University Press Drawing on economic and political theory, legal analysis, and his own extensive judicial experience, Posner sketches the history of the federal courts, describes the contemporary institution, appraises concerns that have been expressed with their performance, and presents a variety of proposals for both short-term and fundamental reform. **Pretrial Discovery and the Adversary System** Russell Sage Foundation Presents the results of the first national field survey of how lawyers use pretrial discovery in practice. Pretrial discovery is a complex set of rules and practices through which the adversaries in a civil dispute are literally allowed to "discover" the facts and legal arguments their opponents plan to use in the trial, with the purpose of improving the speed and quality of justice by reducing the element of trickery and surprise. Dr. Glaser examines the uses, problems, and advantages of discovery. He concludes that it is in wide use in federal civil cases, but that while the procedure has produced more information in some areas, it has failed to bring other improvements favored by its original authors. **Dictionaries and that Dictionary A Casebook on the Aims of Lexicographers and the Targets of Reviewers** For beginning students of the English language and prospective teachers of English. Part one is for dictionary study. Part two is for the writing of a paper based on source materials. **Brandeis and the Progressive Constitution Erie, the Judicial Power, and the Politics of the Federal Courts in Twentieth-century America** Yale University Press During the twentieth century, and particularly between the 1930s and 1950s, ideas about the nature of constitutional government, the legitimacy of judicial lawmaking, and the proper role of the federal courts evolved and shifted. This book focuses on Supreme Court justice Louis D. Brandeis and his opinion in the 1938 landmark case *Erie Railroad Co. v. Tompkins*, which resulted in a significant relocation of power from federal to state courts. Distinguished legal historian Edward A. Purcell, Jr., shows how the Erie case provides a window on the legal, political, and ideological battles over the federal courts in the New Deal era. Purcell also offers an in-depth study of Brandeis's constitutional jurisprudence and evolving legal views. Examining the social origins and intended significance of the Erie decision, Purcell concludes that the case was a product of early twentieth-century progressivism. The author explores Brandeis's personal values and political purposes and argues that the justice was an exemplar of neither "judicial restraint" nor "neutral principles," despite his later reputation. In an analysis of the continual reconceptions of both Brandeis and Erie by new generations of judges and scholars in the twentieth century, Purcell also illuminates how individual perspectives and social pressures combined to drive the law's evolution. **German Unification in the European Context** Penn State Press **Wildlife and Fish Habitat Report on Regulatory Agencies to the President-Elect** In 1960, James M. Landis drafted this "Report on Regulatory Agencies to the President-Elect" and submitted it to President-elect (Sen.) John F. Kennedy, reexamining the federal regulatory commissions and administrative agencies' structures and powers. He recommended such reforms as strengthening the commissions' chairpersons and streamlining the agencies' procedures. The Kennedy Administration subsequently adopted many of the recommendations. This historic, oft-cited, and insightful monograph is now available as a modern and affordable paperback book; previously, it was nearly impossible to obtain even in used printings. Part of the 'Legal Legends Series' from Quid Pro Books. Other authors in the series include Oliver Wendell Holmes Jr., Karl Llewellyn, Roscoe Pound, Benjamin Cardozo, Thomas Reed Powell, Woodrow Wilson, Joseph Story, Louis Brandeis, and John Chipman Gray. Their classic works are presented in quality, modern formatting by Quid Pro Books and available at booksellers everywhere, as well as in new digital editions. **Law of Federal Courts Pediatrics A Primary Care Approach** W B Saunders Company This is a well-organized discussion of the most common issues, both clinical and psychosocial, of general pediatrics. The book covers a wide scope of topics from those as benign as thumb-sucking to those as devastating as HIV and childhood cancer. A case history opens each chapter to set the stage for a practical discussion of primary care pediatrics. This state-of-the-art reference emphasizes concepts in health promotion, illness prevention, and family and community participation. The book includes well-child care for normal children and

adolescents. It also discusses premature infants, and children with specific needs such as patients with Down's Syndrome. Signs and symptoms are presented by body system in a logical approach. **Book of Odds From Lightning Strikes to Love at First Sight, the Odds of Everyday Life** Harper Collins From the popular Book of Odds website, this stylish and accessible reference book offers a fascinating peek at the probabilities that govern every aspect of human life Did you know that your odds of dying from drowning are higher than the odds of meeting your mate on a blind date? That the odds a child has seen Internet porn are the same as the odds a person is right-handed? That nearly one in three adults believes in UFOs and nearly one in six has reported seeing one? Drawing from a rigorously researched trove of more than 400,000 statements of probability, based on the most accurate and current data available, The Book of Odds is a graphic reference source for stats on the everyday, the odd, and the outrageous—from sex and marriage, health and disease, beliefs and fears, to wealth, addiction, entertainment, and civic life. What emerges from this colorful and captivating volume is a rich portrait of who we are and how we live today. **The Right to Counsel in Criminal Cases The Mandate of Argersinger V. It explores the legal ramifications of emerging technologies, such as genomics, synthetic biology, stem cell research, nanotechnology, and biodiscovery. Extensive contributions examine recent controversial court decisions in patent law such as *Bilski v. Kappos*, and the litigation over Myriad's patents in respect of BRCA1 and BRCA2 while other papers explore sui generis fields, such as access to genetic resources, plant breeders' rights, and traditional knowledge. The collection considers the potential and the risks of the new biology for global challenges such as access to health-care, the protection of the environment and biodiversity, climate change, and food security. It also considers Big Science projects such as biobanks, the 1000 Genomes Project, and the Doomsday Vault. The inter-disciplinary research brings together the work of scholars from Australia, Canada, Europe, the UK and the US and involves not only legal analysis of case law and policy developments, but also historical, comparative, sociological, and ethical methodologies. Intellectual Property and Emerging Technologies will appeal to policy-makers, legal practitioners, business managers, inventors, scientists and researchers. **Wyoming Coal Industry** Wyoming coal industry: hearing before the Committee on Energy and Natural Resources, United States Senate, One Hundred Ninth Congress, second session, on issues associated with the growth and development of the Wyoming coal industry, Casper, WY, April 12, 2006. **Notes on South African Income Tax 2019** Notes on South African Income Tax is published annually. The book contains commentary which is not available in any other book on South African tax. **The Antitrust Enterprise Principle and Execution** Harvard University Press After thirty years, the debate over antitrust's ideology has quieted. Most now agree that the protection of consumer welfare should be the only goal of antitrust laws. Execution, however, is another matter. The rules of antitrust remain unfocused, insufficiently precise, and excessively complex. The problem of poorly designed rules is severe, because in the short run rules weigh much more heavily than principles. At bottom, antitrust is a defensible enterprise only if it can make the microeconomy work better, after accounting for the considerable costs of operating the system. The Antitrust Enterprise is the first authoritative and compact exposition of antitrust law since Robert Bork's classic *The Antitrust Paradox* was published more than thirty years ago. It confronts not only the problems of poorly designed, overly complex, and inconsistent antitrust rules but also the current disarray of antitrust's rule of reason, offering a coherent and workable set of solutions. The result is an antitrust policy that is faithful to the consumer welfare principle but that is also more readily manageable by the federal courts and other antitrust tribunals. **Natural Language Processing in Prolog An Introduction to Computational Linguistics** Addison-Wesley Explains how computers can be programmed to recognize the complex ambiguities of human language.
