THE CALLENDAR EFFECT

THE LIFE AND WORK OF GUY STEWART CALLENDAR (1898-1964)

Springer Science & Business Media Guy Stewart Callendar (1898-1964) is noted for identifying, in 1938, the link between the artificial production of carbon dioxide and global warming. Today this is called the "Callendar Effect." He was one of Britain's leading steam and combustion engineers, a specialist in infrared physics, author of the standard reference book on the properties of steam at high temperatures and pressures, and designer of the burners of the notable World War II airfield fog dispersal system, FIDO. He was keenly interested in weather and climate, taking measurement so accurate that they were used to correct the official temperature records of central England and collecting a series of worldwide weather data that showed an unprecedented warming trend in the first four decades of the twentieth century. He formulated a coherent theory of infrared absorption and emission by trace gases, established the nineteenth-century background concentration of carbon dioxide, and suggested that its atmospheric concentration was rising due to human activities, which was causing the climate to warm. Callendar's contributions to climatology led the way in the mid-twentieth-century transition from the traditional practice of gathering descriptive climate statistics to the new and exciting field of climate dynamics. In the first half of the twentieth century, the carbon dioxide theory of climate change had fallen out of favor with climatists.

SONG OF THE BEAUFORTS

NO 100 SQUADRON RAAF AND THE BEAUFORT BOMBER OPERATIONS

This book records the exploits of the airmen of the first Australian Beaufort squadron in action in World War II. Developed as a torpedo and general reconnaissance bomber, the Beaufort was the heaviest, most powerful and most complex aircraft ever built in this country. It entered service with the Royal Australian Air Force at a time when Japanese invasion seemed imminent. As the tide of the war in the South-West Pacific turned from one mostly fought over the ocean to a land-based operation, the original squadron was joined by additional Beaufort units to form the RAAF's No 71 Wing. Employing new methods of warfare, the Beaufort crews closely supported American and Australian ground forces. Using participants' own words to describe events, from the hazards of training to the fury of offensive operations, the author vividly brings to life the bravery of the aviators and the dedication and skill of the ground crews who operated Beauforts during the protracted campaign across the South-West Pacific.

THE MAGIC NUMBERS OF DR. MATRIX

American Mathematical Soc. Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume is a collection of Irving Joshua Matrix columns published in the magazine from 1960-1980. There were several collections of Dr. Matrix, the first in 1967; they were revised as Gardner reconnected with the good doctor over the years. This is the 1985 Prometheus Books edition and contains all the Dr. Matrix columns from the magazine.

THE UNITED NATIONS AND THE INDONESIAN TAKEOVER OF WEST PAPUA, 1962-1969

THE ANATOMY OF BETRAYAL

Routledge This book examines the role of the international community in the handover of the Dutch colony of West Papua/Irian Jaya to Indonesia in the 1960s and questions whether or not the West Papuan people ever genuinely exercised the right to self-determination guaranteed to them in the UN-brokered Dutch/Indonesian agreement of 1962. Indonesian, Dutch, US, Soviet, Australian and British involvement is discussed, but particular emphasis is given to the central part played by the United Nations in the implementation of this agreement. As guarantor, the UN temporarily took over the territory's administration from the Dutch before transferring control to Indonesia in 1963. After five years of Indonesian rule, a UN team returned to West Papua to monitor and endorse a controversial act of self-determination that resulted in a unanimous vote by 1022 Papuan 'representatives' to reject independence. Despite this, the issue is still very much alive today as a crisis-hit Indonesia faces continued armed rebellion and growing calls for freedom in West Papua.

THE COMPREHENSIVE NUCLEAR TEST BAN TREATY

TECHNICAL ISSUES FOR THE UNITED STATES

National Academies Press This report reviews and updates the 2002 National Research Council report, Technical Issues Related to the Comprehensive Nuclear Test Ban Treaty (CTBT). This report also assesses various topics, including: the plans to maintain the safety and reliability of the U.S. nuclear stockpile without nuclear-explosion testing; the U.S. capability to detect, locate, and identify nuclear explosions; commitments necessary to sustain the stockpile and the U.S. and international monitoring systems; and potential technical advances countries could achieve through evasive testing and unconstrained testing. Sustaining these technical capabilities will require action by the National Nuclear Security Administration, with the support of others, on a strong scientific and engineering base maintained through a continuing dynamic of experiments linked with analysis, a vigorous surveillance program, adequate ratio of performance margins to uncertainties. This report also emphasizes the use of modernized production facilities and a competent and capable workforce with a broad base of nuclear security expertise.

IN THE NAME OF PAUK-PHAW

MYANMAR'S CHINA POLICY SINCE 1948

Institute of Southeast Asian Studies Since its independence in January 1948, Myanmar has tried to find a way to deal with (at one time) ideologically hostile and traditionally chauvinistic China which has pursued a foreign policy aimed at restoring its perceived influence in Myanmar. To counter China's attempts to influence Myanmar's foreign policy options has always been a challenge for the Myanmar government. Since the 1950s, successive Myanmar governments have realized that Myanmar's bilateral relations with the People's Republic of China should best be conducted in the context of promoting the Five Principles of Peaceful Coexistence, the Bandung spirit and the Pauk-Phaw (kinsfolk) friendship. The term Pauk-Phaw is exclusively devoted to denote the special nature of the Sino-Myanmar relationship. This work argues that Myanmar's relationship with China is asymmetric but Myanmar skilfully plays the "China Card" and it enjoys considerable space in its conduct of foreign relations. So long as both sides fulfill the obligations that come under "Pauk-Phaw" friendship, the relationship will remain smooth. Myanmar has constantly repositioned her relations with China to her best advantage. Myanmar's China policy has always been placed somewhere in between balancing and bandwagoning, and the juxtaposition of accommodating China's regional strategic interests and resisting Chinese influence and interference in Myanmar's internal affairs has been a hallmark of Myanmar's China policy. This is likely to remain unchanged.

CRITICAL POINT OF VIEW

A WIKIPEDIA READER

For millions of internet users around the globe, the search for new knowledge begins with Wikipedia. The encyclopedia's rapid rise, novel organization, and freely offered content have been marveled at and denounced by a host of commentators. This book moves beyond unflagging praise, well-worn facts, and questions about its reliability and accuracy, to unveil the complex, messy, and controversial realities of a distributed knowledge platform. The essays, interviews and artworks brought together in this reader form part of the overarching 'Critical Point of View' research initiative, which began with a conference in Bangalore (January 2010), followed by events in Amsterdam (March 2010) and Leipzig (September 2010). With an emphasis on theoretical reflection, cultural difference and indeed, critique, contributions to this collection ask: What values are embedded in Wikipedia's software? On what basis are Wikipedia's claims to neutrality made?

LONG NIGHT OF THE TANKERS

HITLER'S WAR AGAINST CARIBBEAN OIL 1942-1944

Long Night of the Tankers is the story of the German effort to cut the Caribbean off from Britain, the United States and Canada and the desperate defence mounted by the Allies, along with a half dozen other Caribbean and South American nations. The loss of the oil threatened Britain's ability to wage war; the loss of the tankers almost strangled the oil supply to America's industrial north east. When even Churchill and Roosevelt began to worry about the vulnerable Caribbean, the US and its allies poured thousands of men, hundreds of aircraft and dozens of ships into the Caribbean region, organized an effective convoy system and rallied the Central and South American nations against the Germans. By mid 1944, the Caribbean had become an Allied lake and the submarine threat was defeated. But to this day, the old timers of the islands still remember the oil-soaked beaches, the explosions in the night and the bodies of dead sailors washed ashore that marked this dramatic chapter in the Second World War.

GAUGING U.S.-INDIAN STRATEGIC COOPERATION

Lulu.com The following volume consists of research that the Nonproliferation Policy Education Center (NPEC) commissioned and vetted throughout 2006. For at least half of the chapters, authors presented versions of their work as testimony before Congressional oversight committees. Among them are some of the sharpest critics and staunchest boosters of U.S.-Indian nuclear and strategic cooperation. No matter what one's point of view, though, these chapters deserve close attention since all are focused on what is needed to assure U.S.-Indian strategic cooperation succeeds. The volume offers U.S. and Indian policy and law makers a detailed checklist of things to watch, avoid, and try to achieve. Funding for this project came from the Catherine D. MacArthur Foundation.
