Understanding Crime Trends Workshop Report [National Academies Press](#) **Changes over time in the levels and patterns of crime have significant consequences that affect not only the criminal justice system but also other critical policy sectors. Yet compared with such areas as health status, housing, and employment, the nation lacks timely information and comprehensive research on crime trends. Descriptive information and explanatory research on crime trends across the nation that are not only accurate, but also timely, are pressing needs in the nation's crime-control efforts. In April 2007, the National Research Council held a two-day workshop to address key substantive and methodological issues underlying the study of crime trends and to lay the groundwork for a proposed multiyear NRC panel study of these issues. Six papers were commissioned from leading researchers and discussed at the workshop by experts in sociology, criminology, law, economics, and statistics. The authors revised their papers based on the discussants' comments, and the papers were then reviewed again externally. The six final workshop papers are the basis of this volume, which represents some of the most serious thinking and research on crime trends currently available. Beyond the HIPAA Privacy Rule Enhancing Privacy, Improving Health Through Research [National Academies Press](#) **In the realm of health care, privacy protections are needed to preserve patients' dignity and prevent possible harms. Ten years ago, to address these concerns as well as set guidelines for ethical health research, Congress called for a set of federal standards now known as the HIPAA Privacy Rule. In its 2009 report, Beyond the HIPAA Privacy Rule: Enhancing Privacy, Improving Health Through Research, the Institute of Medicine's Committee on Health Research and the Privacy of Health Information concludes that the HIPAA Privacy Rule does not protect privacy as well as it should, and that it impedes important health research. Vector-Borne Diseases Understanding the Environmental, Human Health, and Ecological Connections: Workshop Summary [National Academies Press](#)

Vector-borne infectious diseases, such as malaria, dengue fever, yellow fever, and plague, cause a significant fraction of the global infectious disease burden; indeed, nearly half of the world's population is infected with at least one type of vector-borne pathogen (CIESIN, 2007; WHO, 2004a). Vector-borne plant and animal diseases, including several newly recognized pathogens, reduce agricultural productivity and disrupt ecosystems throughout the world. These diseases profoundly restrict socioeconomic status and development in countries with the highest rates of infection, many of which are located in the tropics and subtropics. Although this workshop summary provides an account of the individual presentations, it also reflects an important aspect of the Forum philosophy. The workshop functions as a dialogue among representatives from different sectors and allows them to present their beliefs about which areas may merit further attention. These proceedings summarize only the statements of participants in the workshop and are not intended to be an exhaustive exploration of the subject matter or a representation of consensus evaluation.

The text covers topics such as: the transport of momentum; the transport of energy and the transport of chemical species. The organization of the material is similar to Bird/Stewart/Lightfoot, but presentation has been thoughtfully revised specifically for undergraduate students encountering these concepts for the first time. Devoting more space to mathematical derivations and providing fuller explanations of mathematical developments—including a section of the appendix devoted to mathematical topics—allows students to comprehend transport phenomena concepts at an undergraduate level. **Approaching Gender Parity Women in Computer Science at Afghanistan's Kabul University** **Trade and Markets in Byzantium** [Dumbarton Oaks Pub Service](#) **How are markets in antiquity to be characterized? Yet this new knowledge also raises complex and troubling issues concerning privacy and confidentiality. This thought-provoking book is the first comprehensive exploration of these ethical, legal, and social issues. Distinguished experts in law, medicine, bioethics, public health, science policy, clinical genetics, philosophy, and other fields consider the many contexts in which issues of genetic privacy arise--from research and clinical settings to workplaces, insurance offices, schools, and

the courts. The first chapters of this book set out a framework for analyzing genetic privacy and confidentiality, comparing genetic privacy with other forms of medical privacy. Later chapters deal with such topics as concerns that arise in the health care setting (the patient-physician relationship, genetic counseling and privacy); the effect of new technology (the role of commercial genomics, forensic DNA applications); nonmedical uses of genetic information (the law of medical and genetic privacy in the workplace, implications of genetic testing for health and life insurance); and a review of ethics and law in the United States and abroad. In the concluding chapter, Mark A. Rothstein discusses flaws in existing and proposed legislation designed to protect genetic privacy and confidentiality, and he offers a new set of guidelines for policy makers.

A Workable Balance Report to Congress on Family and Medical Leave Policies [The Self-Restorative Power of Music A Psychological Perspective](#) [Routledge](#)

This book explores how we can understand the place of music from a self psychological perspective, by investigating three journeys: the one we take when listening to music, the literal journey of the author from Nazi Germany to the United States, and the subjective round-trip between the past and the present. Drawing on the work of Heinz Kohut, the author examines how music can provide us with a way to reconnect with a sense of self, and how this can manifest in psychological and physical ways. There is particular reference to the work of Richard Wagner, Cole Porter, and Richard Strauss, and an examination of how their music enabled them, in times of stress and crisis, to restore and maintain a more positive sense of self. Finally, the book looks back at the author's own experiences of music and the place of music in the Jewish world. With clinical excerpts, personal narrative, and sophisticated psychoanalytic insights, this book will appeal to all psychoanalysts wanting to understand the place of music in shaping the psyche, as well as music scholars wishing to gain a deeper appreciation of the psychology of music.

The Youngest Doll [U of Nebraska Press](#)

A gentle maiden aunt who has been victimized for years unexpectedly retaliates through her talent for making life-sized dolls filled with honey. "The Youngest Doll," based on a family anecdote, is a stunning literary expression of Rosario Ferré's feminist and social concerns. It is the premier

story in a collection that was originally published in Spanish in 1976 as *Papeles de Pandora* and is now translated into English by the author. The daughter of a former governor of Puerto Rico, Ferré portrays women loosening the constraints that have bound them to a patriarchal culture. Anger takes creative rather than polemical form in ten stories that started Ferré on her way to becoming a leading woman writer in Latin America. The upper-middle-class women in *The Youngest Doll*, mostly married to macho men, rebel against their doll-like existence or retreat into fantasy, those without money or the right skin color are even more oppressed. In terms of power and influence, these women stand in the same relation to men as Puerto Rico itself does to the United States, and Ferré stretches artistic boundaries in writing about their situation. The stories, moving from the realistic to the nightmarish, are deeply, felt, full of irony and black humor, often experimental in form. The imagery is striking: an architect dreams about a beautiful bridge that “would open and close its arches like alligators making love”; a Mercedes Benz “shines in the dark like a chromium rhinoceros.” One story, “The Sleeping Beauty,” is a collage of letters, announcements, and photo captions that allows chilling conclusions to be drawn from what is not written. The collection includes Ferré’s discussion of “When Women Love Men,” a story about a prostitute and a society lady who unite in order to survive, and one that illustrates the woman writer’s “art of dissembling anger through irony.” In closing, she considers how her experience as a Latin American woman with ties to the United States has brought to her writing a dual cultural perspective.

One piece of evidence found in Bin Laden's personal sleeping quarters was an English language copy of Jim Gant's One Tribe at a Time. It contained notes in the margins consistent with others identified as written by Osama Bin Laden. A directive from Osama Bin Laden to his intelligence chief was also discovered. It identified Jim Gant by name as an impediment to Al Qaeda's operational objectives for eastern Afghanistan. Bin Laden ordered that Gant be assassinated. "[One Tribe at a Time] was hugely important...at a time when I was looking for ideas on Afghanistan...[Gant] was the first to write it down, in a very coherent fashion, very readable, very encouraging frankly...and there is enormous power in that." --General David H.
