COMMUNITY REHABILITATION IN NEUROLOGY

Cambridge University Press **Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.**

MANUAL OF PSYCHOSOCIAL REHABILITATION

John Wiley & Sons **Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.**

MANUAL OF INPATIENT PSYCHIATRY

Cambridge University Press **Explores the range of diagnoses found on inpatient psychiatric units providing practical advice in an accessible format for managing patients.**

MAKING SENSE OF DATA II

A PRACTICAL GUIDE TO DATA VISUALIZATION, ADVANCED DATA MINING METHODS, AND APPLICATIONS

John Wiley & Sons **A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naive Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.**

MATLAB GUIDE TO FINITE ELEMENTS

AN INTERACTIVE APPROACH

Springer Science & Business Media This book explores numerical implementation of Finite Element Analysis using MATLAB. Stressing interactive use of MATLAB, it provides examples and exercises from mechanical, civil and aerospace engineering as well as materials science. The text includes a short MATLAB tutorial. An extensive solutions manual offers detailed solutions to all problems in the book for classroom use. The second edition includes a new brick (solid) element with eight nodes and a one-dimensional fluid flow element. Also added is a review of applications of finite elements in fluid flow, heat transfer, structural dynamics and electro-magnetics. The accompanying CD-ROM presents more than fifty MATLAB functions.

MATHEMATICAL PHYSICS AND STOCHASTIC ANALYSIS

ESSAYS IN HONOUR OF LUDWIG STREIT

World Scientific In October 1998 a conference was held in Lisbon to celebrate Ludwig Streit's 60th birthday. This book collects some of the papers presented at the conference as well as other essays contributed by the many friends and collaborators who wanted to honor Ludwig Streit's scientific career and personality. The contributions cover many aspects of contemporary mathematical physics. Of particular importance are new results on infinite-dimensional stochastic analysis and its applications to a wide range of physical domains. SURVEYING FOR CONSTRUCTION

Surveying for Construction 5e is an essential textbook for students of engineering new to surveying, and will also appeal to students of building and environmental studies and archaeology. Offering a strong grounding in land and construction surveying, the authors clearly and comprehensively guide the reader through the principles, methods and equipment used in modern-day surveying. Taking into account recent advances in the field, the material has been fully updated and revised throughout including new and up-to-date coverage of levelling, total stations, detail surveys, and EDM. A new chapter on GPS technology has been added. In keeping with the practical nature of the book, there are chapters on setting out construction works and surveying existing buildings, which guide the reader step-by-step through the fundamental procedures. The clear and methodical nature of the explanations, supported by a wide range of exercises and examples, make Surveying for Construction 5e an invaluable and modern introduction to surveying. Key features include:

- Fully updated coverage and new material throughout, including a new chapter on GPS
- New Learning Objectives and Chapter Summaries which guide the student through the learning process and highlight the key principles and methods for each chapter
- Numerous diagrams and figures which give students a clear and detailed understanding of equipment and procedures
- Extensive boxed examples and exercises that guide students through real-world surveying methods and calculations

Website material: online material for creating your own surveying project allows students to practice the methods and techniques they have learnt

PERMISSIONS, A SURVIVAL GUIDE

BLUNT TALK ABOUT ART AS INTELLECTUAL PROPERTY

University of Chicago Press If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of “takes” that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “fair use” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

NUCLEAR MEDICINE THERAPY

PRINCIPLES AND CLINICAL APPLICATIONS

Springer Science & Business Media Nuclear Medicine Therapy presents the state of the art in targeted radionuclide therapy, both in clinical practice and contemporary clinical investigation and trials. With contributions from an internationally-distinguished group of physicians and scientists, the book is devoted entirely to the use of nuclear medicine techniques and technology for therapy of malignant and benign diseases. Individual chapters cover the scientific principles and clinical applications of radionuclide therapy and the state of clinical trials of agents currently under investigation in the therapy of tumors involving virtually every organ system. Due to overlapping interest in techniques, indications, and clinical use, the development of radionuclide therapy attracts considerable input

from other medical specialists whose collaboration is essential, including radiation and medical oncologists, hematologists, diagnostic radiologists, hepatologists, endocrinologists, and rheumatologists. And because radionuclide therapy is a rapidly evolving field of nuclear medicine, it is the aim of this volume to appeal to all specialists involved in targeted radionuclide therapy and to contribute to the standardization of the practice globally.

OF GODS AND MONSTERS

A CRITICAL GUIDE TO UNIVERSAL STUDIOS' SCIENCE FICTION, HORROR AND MYSTERY FILMS, 1929-1939

McFarland While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

Butterworth-Heinemann Concerned with the logical foundations of number systems from integers to complex numbers.

NUMERICAL METHODS WITH VBA PROGRAMMING

Jones & Bartlett Publishers Numerical Methods with VBA Programming provides a unique and unified treatment of numerical methods and VBA computer programming, topics that naturally support one another within the study of engineering and science. This engaging text incorporates real-world scenarios to motivate technical material, helping students understand and retain difficult and key concepts. Such examples include comparing a two-point boundary value problem to determining when you should leave for the airport to catch a scheduled flight. Numerical examples are accompanied by closed-form solutions to demonstrate their correctness. Within the programming sections, tips are included that go beyond language basics to make programming more accessible for students. A unique section suggest ways in which the starting values for non-linear equations may be estimated. Flow charts for many of the numerical techniques discussed provide general guidance to students without revealing all of the details. Useful appendices provide summaries of Excel and VBA commands, Excel functions accessible in VBA, basics of differentiation, and more!

NOW WHAT?

THE STIG

THE UNTOLD STORY

Random House The official biography of Top Gear's tame racing driver, from the early years to present day. The Stig is known to millions as Top Gear's tame racing driver, famed for his skillful driving and his legendary reluctance to speak. Other details of his life are the subject of much speculation, yet almost nothing of any substance is known about the man behind the visor. Where did he come from? What is his motivation? Did he really once punch a horse to the ground? Simon du Marche (Princess Margaret -- Gin & Gentility; Keith Chegwin -- Tears of An Idiot) has devoted over two years to getting inside that trademark white helmet. He has pursued The Stig -- sometimes literally -- in a relentless quest to unearth the truth and now, at last, his findings can be revealed. Through extensive research and in-depth interviews with celebrities, motorsport experts and Top Gear presenters Jeremy Clarkson, Richard Hammond and James May, du Marche has built up an unprecedented picture of what lies beneath the white suit. His quest threw up many questions: can

Stig-like characters really be seen in the hieroglyphics of ancient Egypt? Was The Stig present at some of the most pivotal moments in history? Why is a driver of The Stig's considerable ability not in Formula 1? Who was the mysterious figure in white seen leaving Angelina Jolie's hotel room? How can anyone not understand how stairs work? Happily, these questions -- and many, many others -- will be answered in Simon du Marche's landmark work, *The Stig*.

NOW THAT YOU'RE BACK

Random House Exposing and exploring the sinuous undercurrents of violence, anguish and love, A.L. Kennedy examines the nature of the individual, both in isolation and society, as characters define and deny their chosen identities. While showing us the unlikelihood of intimacy and the impossibility of communication, Kennedy also reveals the subversive liberation of impotence, the humour of discomfort as human beings chafe together, the crazed claustrophobia of the family and the wildly funny results of an eccentricity unleashed.

NOVEMBER MOURNS

A NOVEL

Bantam **BONUS:** This edition contains an excerpt from Tom Piccirilli's *The Last Kind Words*. Two years ago Shad Jenkins went to prison for assaulting his sister's attacker. Now he has returned to the southern mountain town of Moon Run Hollow, only to find that Megan is dead. No one knows how she died-or why she was found on Gospel Trail Road, a dirt path leading up to the gorge high above the Chatalaha River, where victims of yellow fever were once brought to die. Navigating a world filled with abnormal children and clandestine snake handlers, one that is slowly being poisoned by illegal moonshine, Shad must pierce the townsfolk's superstitions and terrible secrets to find out the truth about his sister's death. But the Blood Dreams he's suffered from since childhood have taken on an eerie urgency, revealing to Shad the nightmarish form of an unseen adversary. Plagued by the wraiths that haunt the hollow, Shad finds himself increasingly unsure of his own sanity as he begins to piece together what may have happened to his sister-and who exactly his enemy is....

NOWHERE ELSE ON EARTH

Random House Brought up in a mixed-race community - part Scots, part Native American - in the forests of North Carolina in the mid-nineteenth century, Rhoda is the first of her family to be able to read and her parents have plans for her. But the coming of the Civil War brings labour conscription for her brothers, who become outlaws, unwilling to fight for the Confederacy; and when Rhoda falls in love with the outlaw leader Henry, her mother fears the relationship can only lead to disaster-Beautifully written and stunningly observed, *Nowhere Else on Earth* takes the reader into the backwaters of the American South and the chaos and anarchy of civil war, in the heart-breaking story of one of the most appealing heroines of recent fiction.

ORACLE ALCHEMY

THE ART OF TRANSFORMATION IN LIFE AND CARD READING

Oracle Alchemy, *The Art of Transformation in Life and Card Reading*, is a beautiful book of diverse story, imagery, and practical magic. Two books in one, Part One describes the author's own early journey of struggle, healing, and self discovery intertwined with the fairytale like account of what ultimately became her calling as an "oracle." Part Two details groundbreaking transformational techniques that can be applied to any method of card reading, any type of cards. It is described by the author as, "pure undiluted BOOTLEG - unlike any other book or method of card reading..." She asserts that card reading is a perfect metaphor for life, and "We can have the life of our dreams using card reading techniques." A rare gem.

NOVY MIR

A CASE STUDY IN THE POLITICS OF LITERATURE 1952-1958

Cambridge University Press Originally published in 1981, this book is an examination of the politics of literary publishing in the Soviet Union, and in particular during the period after Stalin's death, in the 1950s. Dr Frankel focuses on the leading literary journal of the 1950s, *Novy Mir*, between whose covers so much important literary work first appeared: Pomerantsev's essay on sincerity in literature, Abramov's literary criticism, and Dudintsev's *Not By Bread Alone*. It was *Novy Mir* that published Solzhenitsyn's *One Day in the Life of Ivan Denisovich* in November, 1962. Under the editorship, first of Aleksandr Tvardovsky, then of Konstantin Simonov, the journal was strongly identified with the 'thaw', which, as Dr Frankel shows, had, paradoxically, been anticipated in the literary criticism of the last year of Stalin's life, a year known in other spheres for its repressive character. A detailed study of the journal combined with an analysis of the political and economic issues of the day enables the reader to appreciate the constant interaction of literature and politics in the Soviet Union.

NOW AND FOREVER [PSYCHIC DOCS 5]

Siren-BookStrand [Siren Classic ManLove: Erotic Alternative Interracial Paranormal Romance, M/M, HEA] Doctor Jacinto Alvarez is a man who knows what he wants, and his heart is set on spell caster James Caldwell. James is drawn to the sexy doctor, but he knows Jake's coven is in the middle of a nasty war and is determined to keep his distance. However, James doesn't count on Jake's determination to be his one and only or his own powerful feelings to be with Jake. As the showdown with Dark Spear grows closer, three of Jake's brothers decide they want out of the brotherhood, and Jake's mate becomes the next target in the deadly game. As the dominants plot to destroy the enemy, it is their mates who come up with a plan to ensure the coven's immortality. With James's spells, the plan is set, but unless James can overcome that shadow of doubt about Jacinto's feelings for him, the men will never become immortal. ** A Siren Erotic Romance
