MORAL CONFLICT

WHEN SOCIAL WORLDS COLLIDE

SAGE In an original synthesis of communication theory and their own research and experience as intervention agents, the authors of Moral Conflict describe a dialectical tension between the expression and suppression of conflict that can be transcended in ways that lead to personal growth and productive patterns of social action. Several projects are described as practical examples of these ways of working.

ETHICS OF PEACEBUILDING

Edinburgh University Press This book explores the ethical dimension of peacebuilding. In the aftermath of the Cold War the hope for a more stable and just international order was rapidly dissolved by the internecine conflicts that plagued all continents. The Rwanda and Srebrenica genocides demonstrated the challenge of promoting peace in a world increasingly defined by intra-state conflict and sub-national groups confronting nation-states. Murithi interrogates the role that ethics plays in promoting and consolidating peacebuilding and presents a synthesis of moral philosophy and international relations and an analysis of the ethics of negotiation, mediation, forgiveness and reconciliation. In its attempt to explore the extent to which ethical concerns influence and inform peacebuilding this book contributes to a growing body of literature on ethics and international relations which will enable students, scholars and practitioners to ground their understanding of a principled peacebuilding.

It helps connect the research of academia to the practical realities of peacemaking and peacebuilding like no other. It is both comprehensive and deeply informed on topics vital to the field like power, gender, cooperation, emotion, and trust. It now sits prominently on my bookshelf." —Leymah Gbowee, Nobel Peace Prize Laureate "The Handbook of Conflict Resolution offers an astonishing array of insightful articles on theory and practice by leading scholars and practitioners. Students, professors, and professionals alike can learn a great deal from studying this Handbook." —William Ury, Director, Global Negotiation Project, Harvard University; coauthor, Getting to Yes and author, The Third Side "Morton Deutsch, Peter Coleman, and Eric Marcus put together a handbook that will be helpful to many. I hope the book will reach well beyond North America to contribute to the growing worldwide interest in the constructive resolution of conflict. This book offers instructive ways to make this commitment a reality." —George J. Mitchell, Former majority leader of the United States Senate; former chairman of the Peace Negotiations in Northern Ireland and the International Fact-Finding Committee on Violence in the Middle East; chairman of the board, Walt Disney Company; senior fellow at the School of International and Public Affairs, Columbia University "Let's be honest. This book is just too big to carry around in your hand. But that's because it is loaded with the most critical essays linking the theory and practice of conflict resolution. The

ATTRACTED TO CONFLICT: DYNAMIC FOUNDATIONS OF DESTRUCTIVE SOCIAL RELATIONS

Springer Science & Business Media Conflict is inherent in virtually every aspect of human relations, from sport to parliamentary democracy, from fashion in the arts to paradigmatic challenges in the sciences, and from economic activity to intimate relationships. Yet, it can become among the most serious social problems humans face when it loses its constructive features and becomes protracted over time with no obvious means of resolution. This book addresses the subject of intractable social conflict from a new vantage point. Here, these types of conflict represent self-organizing phenomena, emerging quite naturally from the ongoing

dynamics in human interaction at any scale—from the interpersonal to the international. Using the universal language and computational framework of nonlinear dynamical systems theory in combination with recent insights from social psychology, intractable conflict is understood as a system locked in special attractor states that constrain the thoughts and actions of the parties to the conflict. The emergence and maintenance of attractors for conflict can be described by means of formal models that incorporate the results of computer simulations, experiments, field research, and archival analyses. Multi-disciplinary research reflecting these approaches provides encouraging support for the dynamical systems perspective. Importantly, this text presents new views on conflict resolution. In contrast to traditional approaches that tend to focus on basic, short-lived cause-effect relations, the dynamical perspective emphasizes the temporal patterns and potential for emergence in destructive relations. Attractor deconstruction entails restoring complexity to a conflict scenario by isolating elements or changing the feedback loops among them. The creation of a latent attractor trades on the tendency toward multi-stability in dynamical systems and entails the consolidation of incongruent (positive) elements into a coherent structure. In the bifurcation scenario, factors are identified that can change the number and types of attractors in a conflict scenario. The implementation of these strategies may hold the key to unlocking intractable conflict, creating the potential for constructive social relations.

PSYCHOLOGICAL COMPONENTS OF SUSTAINABLE PEACE

Springer Science & Business Media Scholarship on the psychology of peace has been accumulating for decades. The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace. Concerns around nuclear annihilation, enemy images, discrimination, denial of basic human needs, terrorism and torture have been the focal points of most research. The Psychological Components of a Sustainable Peace moves beyond a prevention-orientation to the study of the conditions for increasing the probabilities for sustainable, cooperative peace. Such a view combines preventative scholarship with a promotive-orientation to the study of peaceful situations and societies. The contributors to this volume examine the components of various psychological theories that contribute to the promotion of a harmonious, sustainable peace. Underlying this orientation is the belief that promoting the ideas and actions which can lead to a sustainable, harmonious peace will not only contribute to the prevention of war, but will also lead to more positive, constructive relations among people and nations and to a more sustainable planet. The Psychological Components of a Sustainable Peace is valuable and stimulating reading for researchers in peace psychology, political psychology, and conflict resolution as well as others who are interested in developing a sustainable, harmonious world.

INTERACTIVE JUSTICE

A PROCEDURALIST APPROACH TO VALUE CONFLICT IN POLITICS

Routledge Contemporary societies are riddled with moral disputes caused by conflicts between value claims competing for the regulation of matters of public concern. This familiar state of affairs is relevant for one of the most important debates within liberal political thought: should institutions seek to realize justice or peace? Justice-driven philosophers characterize the normative conditions for the resolution of value conflicts through the establishment of a moral consensus on an order of priority between competing value claims. Peace-driven philosophers have concentrated, perhaps more modestly, on the characterization of the ways in which competing value claims should be balanced, with a view to establishing a modus vivendi aimed at containing the conflict. Interactive Justice addresses an important question related to this debate: on what terms should the parties interact during their conflict for their interaction to be morally acceptable to them? Although largely unexplored by political philosophers, this is a main area of concern in conflict management. Building on a proceduralist interpretation of "relational" concerns of justice, the author develops a liberal normative theory of interactive justice for the management of value conflict in politics grounded in the

fundamental values of fair hearing and procedural equality. This book innovatively builds a bridge between works in political philosophy and peace studies to propose a fresh lens through which to view the normative responses liberal institutions ought to give to value conflict in politics, and moves beyond the apparent dichotomy between pursuing end-state justice through conflict resolution or peace through conflict containment.

MAKING SENSE OF INTRACTABLE ENVIRONMENTAL CONFLICTS

CONCEPTS AND CASES

Island Press Despite a vast amount of effort and expertise devoted to them, many environmental conflicts have remained mired in controversy, stubbornly defying resolution. Why can some environmental problems be resolved in one locale but remain contentious in another, often carrying on for decades? What is it about certain issues or the people involved that make a conflict seemingly insoluble.Making Sense of Intractable Environmental Conflicts addresses those and related questions, examining what researchers and experts in the field characterize as "intractable" disputes—intense disputes that persist over long periods of time and cannot be resolved through consensus-building efforts or by administrative, legal, or political means. The approach focuses on the "frames" parties use to define and enact the dispute—the lenses through which they interpret and understand the conflict and critical conflict dynamics. Through analysis of interviews, news media coverage, meeting transcripts, and archival data, the contributors to the book:examine the concepts of frames, framing, and reframing, and the role that framing plays in conflictsoutline the essential characteristics of intractability and its major causesoffer case studies of eight intractable environmental conflictspresent a rich body of original interview material from affected partiesset forth recommendations for intervention that can help resolve

disputesWithin each case chapter, the authors describe the historical development and fundamental nature of the conflict and then analyze the case from the perspective of the key frames that are integral to understanding the dynamics of the dispute. They also offer cross-case analyses of related conflicts.Conflicts examined include those over natural resource use, toxic pollutants, water quality, and growth. Specific conflicts examined are the Quincy Library Group in California; Voyageurs National Park in Minnesota; Edwards Aquifer in Texas; Doan Brook in Cleveland, Ohio; the Antidegradation Environmental Advisory Group in Ohio; Drake Chemical in Pennsylvania; Alton Park/Piney Woods in Tennessee; and three examples of growth-related conflicts along the Front Range of Colorado's Rocky Mountains.

LEARNING LESSONS FROM WACO

WHEN THE PARTIES BRING THEIR GODS TO THE NEGOTIATION TABLE

Syracuse University Press Presents a conceptual model of worldview conflict, using the example of Waco to extract principles for negotiating with communities motivated by unconventional beliefs. The author argues that parties with fundamentally different worldviews must first deal with reality, or "worldnaming," before they can begin to confront the issues, and suggests that because they used different "naming, framing, and blaming" language, the two sides in the Waco negotiation were destined to fail. While the Branch Davidians' reality was based on values and spirituality, that of the FBI was scientific and goal-centered, and it dismissed the Davidians' attempts to communicate as "Bible babble." She concludes with 14 lessons for future crisis negotiators dealing with such groups.

UNDERSTANDING VIOLENCE

THE INTERTWINING OF MORALITY, RELIGION AND VIOLENCE: A PHILOSOPHICAL STANCE

Springer Science & Business Media This volume sets out to give a philosophical "applied" account of violence, engaged with both empirical and theoretical debates in other disciplines such as cognitive science, sociology, psychiatry, anthropology, political theory, evolutionary biology, and theology. The book's primary thesis is that violence is inescapably intertwined with morality and typically enacted for "moral" reasons. To show this, the book compellingly demonstrates how morality operates to trigger and justify violence and how people, in their violent behaviors, can engage and disengage with discrete moralities. The author's fundamental account of language, and in particular its normative aspects, is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm. By employing concepts such as "coalition enforcement", "moral bubbles", "cognitive niches", "overmoralization", "military intelligence" and so on, the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence. The author's original claim is that disagreement can be understood naturalistically, described by an account of morality informed by evolutionary perspectives as well. This book might help us come to terms with the fact that we are intrinsically "violent beings". To acknowledge this condition, and our stupefying capacity to inflict harm, is a responsibility we must face up to: such understanding could ultimately be of help in order to achieve a safer ownership of our destinies, by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing.

INTERCULTURAL DISPUTE RESOLUTION IN ABORIGINAL CONTEXTS

UBC Press In the last twenty years, there has been a growing interest in alternative dispute resolution (ADR), as scholars and practitioners seek more effective, context-sensitive approaches to conflict. Where formerly conflict was tackled and "resolved" in formal legal settings and with an adversarial spirit, more conciliatory approaches -- negotiation, mediation, problem-solving, and arbitration -- are now gaining favour. These new methods are proving especially appropriate in intercultural contexts, particularly for Aboriginal land claims, self-government, and community-based disputes. The essays collected here by Catherine Bell and David Kahane provide a balanced view of ADR, exploring its opportunities and effectiveness alongside its challenges and limits. The essays are international in scope, with examples of efforts at dispute resolution involving Inuit and Arctic peoples, Dene, Gitxsan and Wet'suwet'en, Tsuu T'ina, Cree, Metis, Navajo, Maori, Aboriginal Australians, and Torres Strait Islanders. With contributions from Aboriginal and non-Aboriginal theorists and practitioners, Intercultural Dispute Resolution in Aboriginal Contexts presents an array of insightful perspectives. This book will appeal to students and scholars of Aboriginal law and alternative dispute resolution; legal and political theorists; dispute resolution practitioners; and anyone involved in struggles around land claims, treaty, and self-government agreements in Canada or abroad.

SPEAKING OF VIOLENCE

THE POLITICS AND POETICS OF NARRATIVE IN CONFLICT RESOLUTION

Oxford University Press In the context of ongoing or historical violence, people tell stories about what happened, who did what to whom and why. Yet frequently, the speaking of violence reproduces the social fractures and delegitimizes, again, those that struggle against their own marginalization. This speaking of violence deepens conflict and all too often perpetuates cycles of violence. Alternatively, sometimes people do not speak of the violence and it is erased, buried with the bodies that bear it witness. This reduces the capacity of the public to address issues emerging in the aftermath of violence and repression. This book takes the notion of "narrative" as foundational to conflict analysis and resolution. Distinct from conflict theories that rely on accounts of attitudes or perceptions in the heads of individuals, this narrative perspective presumes that meaning, structured and organized as narrative processes, is the location for both analysis of conflict, as well as intervention. But

meaning is political, in that not all stories can be told, or the way they are told delegitimizes and erases others. Thus, the critical narrative theory outlined in this book offers a normative approach to narrative assessment and intervention. It provides a way of evaluating narrative and designing "better-formed" stories: "better" in that they are generative of sustainable relations, creating legitimacy for all parties. In so doing, they function aesthetically and ethically to support the emergence of new histories and new futures. Indeed, critical narrative theory offers a new lens for enabling people to speak of violence in ways that undermine the intractability of conflict
