Il figlio del desiderio. Le nuove frontiere dell'adozione Istituzioni di diritto pubblico Maggioli Editore Unioni civili e genitorialità: le nuove frontiere della giurisprudenza Interesse del minore e genitorialità same sex CEDAM Il fascino del diritto della persona e della famiglia è legato alla sua continua evoluzione. Pubblica opinione, tesi dottrinarie, principi posti dalla giurisprudenza possono, per la loro durata, essere paragonati ai ghiacciai, i quali, un tempo perenni, ora, con il riscaldamento globale, possono esserci oggi e domani non esserci più, rivelando un paesaggio del tutto diverso. Tribunali e giudici sono spesso chiamati ad esplorare nuove frontiere e devono farlo in fretta, perché le questioni che una realtà sociale in rapido movimento suscita non possono restare irrisolte. Il nostro sistema giuridico non ha ancora metabolizzato l'istituto delle unioni civili, di recentissima approvazione, che già deve rapportarsi al problema della genitorialità, adottiva o procreativa assistita, delle nuove coppie ed all'intreccio di relazioni che ciò determina, con al centro la necessità di aggiornare il concetto di interesse del minore. Il libro affronta tali tematiche, valendosi dell'esperienza italiana ed europea e dell'ausilio, anche in questo caso insostituibile, della psicologia. La comunicazione non verbale nella Grecia antica gli schemata nella danza, nell'arte, nella vita La mente adottiva Aletti Editore L'opera presenta un'indagine approfondita sul fenomeno dell'adozione e sugli studi più recenti nel campo della Teoria della Mente, esplorando la loro possibilità di applicazione nell'esperienza adottiva e aprendo nuove prospettive di analisi e di pratica terapeutica. Si rivolge al mondo accademico, agli studenti universitari, agli Enti e alle Associazioni operative nel campo dell'adozione, ma anche alle famiglie adottive e a tutte quelle persone che coltivano un particolare interesse verso la tematica. La lettura consente di ottenere informazioni specifiche sulle nuove prospettive di studio, per acquisire un quadro più ampio di comprensione del fenomeno dell'adozione e dei processi di mentalizzazione. Rappresenta pertanto una novità assoluta per l'originalità che esprime attraverso la raccolta minuziosa di vari studi nel campo indagato e sulla loro specifica applicazione all'esperienza adottiva. Silvia Mariana De Marco, laureata in Psicologia ed in possesso dei Titoli di Consulente grafo-diagnostico e Perito grafo-tecnico, si è formata nell'ambito della Psicologia clinica e della Psico-diagnosi, partecipando a numerosi corsi, tra cui un Master biennale in Psicodiagnostica presso l'Istituto Italiano di Psicoanalisi di Gruppo di Milano. Ha inoltre frequentato il Corso di formazione "Adozione e oltre..." sugli aspetti psicologici-clinici, giuridici, evolutivi e scolastici del fenomeno dell'adozione nazionale e internazionale, organizzato dal Centro Studi per le Psicoanalisi Contemporanee. Ha operato in diversi periodi di Tirocinio curriculare sia presso lo studio di psicologia e psicoterapia "Un modo di essere" di Como, effettuando interventi nelle scuole, che presso il Centro di Ricerca sull'Apprendimento dell'Università e-Campus di Novedrate (Como), partecipando a progetti sull'orientamento scolastico. Per l'espletamento del Tirocinio Post Laurea, ha effettuato pratica professionale nel Centro di clinica psicanalitica "Jonas" di Como. Con la Casa Editrice Aletti ha già pubblicato nell'anno 2015 il saggio "Psicologia e Architettura: studio multidisciplinare dell'ambiente", ripetutamente premiato in concorsi nazionali e internazionali (Prima classificata al secondo Premio Internazionale Salvatore Quasimodo - 2° Premio alla XX Edizione del Concorso Internazionale "Il saggio-città di Eboli" - 3° Premio alla VI Edizione del Premio Letterario Nazionale "Franz Kafka Italia" - Finalista al Contropremio Carver 2016). Giustizia civile Repertorio generale annuale di legislazione, bibliografia, giurisprudenza Famiglia e adozione internazionale esperienze, normativa e servizi Vita e Pensiero La Nuova giurisprudenza civile commentata Scuola e città Getting an Heir Adoption and the Construction of Kinship in Late Imperial China University of Hawaii Press The need for heirs in any traditional society is a compelling one. In traditional China, where inheritance and notions of filiality depended on the production of progeny, the need was nearly absolute. As Ann Waltner makes clear in this broadly researched study of adoption in the late Ming and early Ch'ing periods, the getting of an heir was a complex, even paradoxical undertaking. Although adoption involving persons of the same surname was the only arrangement ritually and legally sanctioned in Chinese society, adoption of persons of a different surname was a relatively common practice. Using medical and ritual texts, legal codes, local gazetteers, biography, and fiction, Waltner examines the multiple dimensions of the practice of adoption and identifies not only the dominant ideology prohibiting adoption across surname lines, but also a parallel discourse justifying the practice. Care, Gender, and Justice Oxford University Press on Demand Women's unpaid work at home has not concerned theorists of social justice, despite the fact that it renders women vulnerable to exploitation and hence to social injustice. Based on a critical analysis of three conceptions of work and women's work in the materialist tradition of thought -Marx, the domestic labour debate, and Delphy and Leonard - the author develops her own theory of women's work as care. By focusing on the material, psychological and gendered aspects of care, the theory elucidates how and why care is exploitative as long as it remains women's work, and whatproblems it poses for conceptions of social justice. It also enables the author to develop a striking new interpretation of the much discussed ethic of care: how it relates to considerations of justice and the place it has in moral and political philosophy. Gazzetta di Firenze Entangled Minds Extrasensory Experiences in a Quantum Reality Simon and Schuster Is everything connected? Can we sense what's happening to loved ones thousands of miles away? Why are we sometimes certain of a caller's identity the instant the phone rings? Do intuitive hunches contain information about future events? Is it possible to perceive without the use of the ordinary senses? Many people believe that such "psychic phenomena" are rare talents or divine gifts. Others don't believe they exist at all. But the latest scientific research shows that these phenomena are both real and widespread, and are an unavoidable consequence of the interconnected, entangled physical reality we live in. Albert Einstein called entanglement "spooky action at a distance" -- the way two objects remain connected through time and space, without communicating in any conventional way, long after their initial interaction has taken place. Could a similar entanglement of minds explain our apparent psychic abilities? Dean Radin, senior scientist at the Institute of Noetic Sciences, believes it might. In this illuminating book, Radin shows how we know that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real, based on scientific evidence from thousands of controlled lab tests. Radin surveys the origins of this research and explores, among many topics, the collective premonitions of 9/11. He reveals the physical reality behind our uncanny telepathic experiences and intuitive hunches, and he debunks the skeptical myths surrounding them. Entangled Minds sets the stage for a rational, scientific understanding of psychic experience. Ocean literacy for all: a toolkit UNESCO Publishing Playing and Reality Psychology Press Winnicott is concerned with the springs of imaginative living and of cultural experience in every sense, with whatever determines an individual's capacity to live creatively and to find life worth living. The Cultural Context of Learning and Thinking An Exploration in Experimental Anthropology Taylor & Francis Surrogacy, Law and Human Rights Routledge Surrogacy presents particularly complex questions for human rights law and theory. This book provides a unique and insightful examination into the underexplored issues of how domestic and international law is responding to the sharp increase in the use of surrogacy. The work presents critical analysis of the current regulation of surrogacy via domestic law in Australia, India and the USA, and international law in the form of the UN Convention on the Rights of the Child. Including a wide range of views from academics and practitioners around the world, the contributors consider what could be done to further protect the rights of all persons involved in surrogacy arrangements. This in-depth study of the international and domestic law governing surrogacy provides much needed scholarly knowledge of this contemporary phenomenon, along with recommendations for improvement, regulation and reform. The book will be of great importance to human rights and legal scholars, and well as practitioners in this field. Adoption and Fosterage Practices in the Late Medieval and Modern Age Viella Libreria Editrice In recent years historical studies on adoption and fosterage have greatly advanced, very likely due to the importance that such practices have acquired in our own societies. Also in the past - not only during Roman or Late Antique periods, but throughout the Middle Ages and the Modern Era as well - a rather significant number of family units went through adoption and fosterage, experiencing these kinds of ties and relationships on the daily basis. Articles collected in this volume are aimed at analysing the various forms and methods by means of which the concept of "adoption" was interpreted and practiced during the Medieval and Early Modern periods, identifying especially relevant chronological points, examples from different regional and local contexts, reciprocal influences, and family relationships shaped by adoption. Personalism Read Books Ltd Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. The Origins of Love and Hate Psychology Press First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company. Il Foro italiano raccolta generale di giurisprudenza civile, commerciale, penale, amministrativa ... Contract Children Questioning Surrogacy ibidem-Verlag / ibidem Press Surrogate motherhood is expanding all over the world. Debates rage over how public policy should consider the signing away of the parental rights of birth mothers in favor of a 'commissioning' couple or an individual. In this book, Daniela Danna describes the situation in English-speaking countries and worldwide, from California to Greece, presenting the legal alternatives regulating (or not) these peculiar exchanges. Should surrogacy remain a private agreement? Should it be treated as an enforceable contract? Are surrogate mothers workers? What happens inside the countries that have chosen different ways of handling this new and controversial matter? And, the most important question of all: How can we live in this era of new techno-medical possibilities and try to stay human? Can we resist commodification in the field of human relations concerning procreation? Contract Children discusses the different ways available to obtain a child through surrogate motherhood. It is fundamental reading for anyone wanting to be involved in the surrogacy process. It gives prospective surrogate mothers and infertile couples the background information necessary for their own informed decision. It is also an essential instrument for policy makers and activists in the field of women's rights, social justice, and children's rights. The question of how to publicly deal with surrogate motherhood touches upon our social vision of motherhood, ultimately marking the position of women in contemporary society. Bibliografia nazionale italiana Monografie Epoca Handbook on Restorative Justice Programmes United Nations Publications The present handbook offers, in a quick reference format, an overview of key considerations in the implementation of participatory responses to crime based on a restorative justice approach. Its focus is on a range of measures and programmes, inspired by restorative justice values, that are flexible in their adaptation to criminal justice systems and that complement them while taking into account varying legal, social and cultural circumstances. It was prepared for the use of criminal justice officials, non-governmental organizations and community groups who are working together to improve current responses to crime and conflict in their community Encyclopedia of the third world Telexwork in the 21st Century An Evolutionary Perspective Edward Elgar

Publishing Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan, the United States, and ten EU countries regarding the development of telework, its various forms and effects. It also analyses large-scale surveys and company case studies regarding the incidence of telework and its effects on working time, work-life balance, occupational health and well-being, and individual and organizational performance. Logo Mondo This book is divided into categories, including typographic, icons, and illustrations, and further classified into categories, like Hip-Hop, Neo-Baroque, kanji, kana, psychedelic, 60s to 70s, corporate, erotic, and other distinct groups, this book features more than 1,000 works, selected from thousands of entries submitted from hundreds of designers worldwide. Heinz Von Foerster 1911-2002 Imprint Academic Dedicated to the life and work of Heinz Von Foerster, this is a double issue of the journal "Cybernetics and Human Knowing". Speakable and Unspeakable in Quantum Mechanics Collected Papers on Quantum Philosophy Cambridge University Press John Bell, FRS was one of the leading expositors and interpreters of modern quantum theory. He is particularly famous for his discovery of the crucial difference between the predictions of conventional quantum mechanics and the implications of local causality, a concept insisted on by Einstein. John Bell's work played a major role in the development of our current understanding of the profound nature of quantum concepts and of the fundamental limitations they impose on the applicability of the classical ideas of space, time and locality. This book includes all of John Bell's published and unpublished papers on the conceptual and philosophical problems of quantum mechanics, including two papers that appeared after the first edition was published. The book includes a short Preface written by the author for the first edition, and also an introduction by Alain Aspect that puts into context John Bell's enormous contribution to the quantum philosophy debate. Corporate Governance Strengthening Latin American Corporate Governance The Role of Institutional Investors The Role of Institutional Investors OECD Publishing This report reflects long-term, in-depth discussion and debate by participants in the Latin American Roundtable on Corporate Governance. Lone Parents, Employment and Social Policy Cross-national Comparisons Policy makers across the world are confronting issues relating to lone parents and employment, with many governments seeking to increase the participation of lone parents in the labour market. This book is based on an up-to-date analysis of provisions within particular countries, examining whether and how policies support and encourage employment, and drawing out policy lessons. The countries examined are the UK, USA, Australia, France, the Netherlands and Norway. Unlike other studies which have considered this issue, this book includes both country-specific chapters and makes thematic comparisons across countries. Chapters are written by leading experts on lone parenthood in each country. Lone parents, employment and social policy is essential reading for students in social policy, sociology, human geography, gender and women's studies, as well as policy makers and practitioners in the field of lone parents and employment. It will be of interest to those who want to know more about these policy developments but also to those interested in broader issues about gender and welfare states. The Point of Being Cambridge Scholars Publishing Current digital processes of production, reproduction and distribution of information affect the perception of time, space, matter, senses and identity. This book explores the research question: what are the psycho-physiological dimensions of the ways people experience their presence in the world and the world's presence in them? Because they deal principally with issues of perception and sentience, with a particular emphasis on art, there is in all chapters an invitation to experience a shift of perception. An embodied sensation of the world and a re-sensorialization of the environment are described to complement the visually-biased perspective with a renewed sense of humans' relationship to their spatial and material surrounding. As such, this book presents the topological reunion of sensation and cognition, of sense and sensibility and of body, self and world. The perception of the "Point of Being", to which the various chapters of this book invite the reader, proposes an alternative to the "Point of View" inherited from the Renaissance; it offers a way to situate the sense of self through the physical, digital and electronic domains that shape physical, social, cultural, economic and spiritual conditions at the beginning of the twenty-first century. Nine authors explore different ways in which the paradigm of the Point of Being can bridge the interval, the discontinuity, between subjects and objects that began with the diffusion of the phonetic alphabet. The Point of Being is a signpost on that journey. Dividing the Domestic Men, Women, and Household Work in Cross-National Perspective Stanford University Press In Dividing the Domestic, leading international scholars roll up their sleeves to investigate how culture and country characteristics permeate our households and our private lives. The book introduces novel frameworks for understanding why the household remains a bastion of traditional gender relations—even when employed full-time, women everywhere still do most of the work around the house, and poor women spend more time on housework than affluent women. Education systems, tax codes, labor laws, public policies, and cultural beliefs about motherhood and marriage all make a difference. Any accounting of "who does what" needs to consider the complicity of trade unions, state arrangements for children's schooling, and new cultural prescriptions for a happy marriage. With its cross-national perspective, this pioneering volume speaks not only to sociologists concerned with gender and family, but also to those interested in scholarship on states, public policy, culture, and social inequality. OECD Employment Outlook 2014 OECD Publishing The OECD Employment Outlook 2014 includes chapters on recent labour market developments with a special section on earnings, job quality, youth employment, and forms of employment and employment protection. Annali della Scuola normale superiore di Pisa, Classe di lettere e filosofia The Single Currency and European Citizenship Unveiling the Other Side of The Coin A&C Black Established in 2002, the Euro is now the currency of 17 countries used by over 335 million people daily. Although the single currency is much discussed in terms of macroeconomics and global finances, policymakers rarely address its impact on European citizenship in social, cultural, political, and everyday life economics terms. This hidden side of the single currency is the focus of the essays, which use various approaches, from economic history and political sociology to citizenship and legitimacy, to reveal the connections between the Euro and European citizenship. This timely contribution by renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated, and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis. It will be an essential tool to anyone studying the political, social, and economic development of the E.U. Metallica and Philosophy A Crash Course in Brain Surgery John Wiley & Sons Hit the lights and jump in the fire, you're about to enter the School of Rock! Today's lecture will be a crash course in brain surgery. This hard and fast lesson is taught by instructors who graduated from the old school—they actually paid \$5.98 for The \$5.98 EP. But back before these philosophy professors cut their hair, they were lieutenants in the Metal Militia. A provocative study of the 'thinking man's' metal band Maps out the connections between Aristotle, Nietzsche, Marx, Kierkegaard, and Metallica, to demonstrate the band's philosophical significance Uses themes in Metallica's work to illuminate topics such as freedom, truth, identity, existentialism, questions of life and death, metaphysics, epistemology, the mind-body problem, morality, justice, and what we owe one another Draws on Metallica's lyrical content, Lars Ulrich's relationship with Napster, as well as the documentary Some Kind of Monster Serves as a guide for thinking through the work of one of the greatest rock bands of all time Compiled by the editor of Seinfeld and Philosophy: A Book about Everything and Nothing and The Simpsons and Philosophy: The D'oh! of Homer Contested Categories Life Sciences in Society Routledge Drawing on social science perspectives, Contested Categories presents a series of empirical studies that engage with the often shifting and day-to-day realities of life sciences categories. In doing so, it shows how such categories remain contested and dynamic, and that the boundaries they create are subject to negotiation as well as re-configuration and re-stabilization processes. Organized around the themes of biological substances and objects, personhood and the genomic body and the creation and dispersion of knowledge, each of the volume's chapters reveals the elusive nature of fixity with regard to life science categories. With contributions from an international team of scholars, this book will be essential reading for anyone interested in the social, legal, policy and ethical implications of science and technology and the life sciences. Maternita Createspace Independent Publishing Platform This collection of literature attempts to compile many of the classic works that have stood the test of time and offer them at a reduced, affordable price, in an attractive volume so that everyone can enjoy them.
