The Grammar of

Perspective The Sumerian Conjugation Prefixes As a System of Voice *BRILL*

The so-called Sumerian conjugation prefixes are the most poorly understood and perplexing elements of Sumerian verbal morphology. Approaching the problem from a functional-typological perspective and basing the analysis upon semantics, Professor Woods argues that these elements, in their primary function, constitute a system of grammatical voice, in which the active voice is set against the middle voice. The latter is represented by heavy and light markers that differ with respect to focus and emphasis. As a system of grammatical voice, the conjugation prefixes provided Sumerian speakers with a linguistic means of altering the perspective from which events may be viewed, giving speakers a series of options for better approximating in language the infinitely graded spectrum of human

conceptualization and experience. **Language and Death The Place of Negativity**

Exile and Return The Babylonian Context *Walter de Gruyter GmbH & Co KG*

Many books of the Hebrew Bible were either composed in some form or edited during the Exilic and post-Exilic periods among a community that was to identify itself as returning from Babylonian captivity. At the same time, a dearth of contemporary written evidence from Judah/Yehud and its environs renders any particular understanding of the process within its social, cultural and political context virtually impossible. This has led some to label the period a dark age or black box – as obscure as it is essential for understanding the history of Judaism. In recent years, however, archaeologists and historians have stepped up their effort to look for and study material remains from the period and integrate the local history of Yehud, the return from Exile, and the restoration of Jerusalem's temple more firmly within the regional, and indeed global, developments of the time. At the same time, Assyriologists have also been introducing a wide range of cuneiform material that illuminates the economy, literary traditions, practices of literacy and the ideologies of the Babylonian host society – factors that affected those taken into Exile in variable, changing and multiple ways. This volume of essays seeks to exploit these various advances. **The First Dynasty of the Sealand in Mesopotamia** *Walter de Gruyter GmbH & Co KG* The Sealand kingdom arose from the rebellion against Babylonian hegemony in the latter half of the 18th century BCE., forcing it to share power over Sumer and Akkad. Although its kings maintained themselves throughout the turmoil leading to the demise of the Amorite dynasty at Babylon, it remains one of the most poorly documented Mesopotamian polities. Until recently, it was known to us mainly through its inclusion into later king lists and chronicles, but the recent publication of well over 400 archival texts from a Sealand palace, soon followed by literary and divinatory tablets, finally makes it possible to study this polity from primary sources. This book proposes a history of the Sealand kingdom based on the new evidence and a reevaluation of previously known sources. The aspects examined are: the economy – mainly the palatial administration and transformation of agricultural and animal resources; the pantheon and the palace-sponsored cult, which show that Sealand I kings may have positioned their rule in a Larsaean tradition; the political history, including a discussion of the geography and the relative chronology; the recording and transmission of knowledge on the Sealand I dynasty in Mesopotamian historiography. **Occult Spinal Dysraphism** *Springer* This volume covers the known details of all subtypes of occult spinal dysraphism in unprecedented detail. This 21 chapter invaluable resource begins with a deep dive into the history and embryology of occult spinal dysraphisms. Following this, subtypes of occult spinal dysraphism are thoroughly explored – of which include split cord malformations, tethered cord syndromes, adult presentations/outcomes of occult spinal dysraphism, cutaneous stigmata. Chapters will cover the clinical presentation, radiological features, and surgical nuances of each of the occult spinal dysraphisms. Throughout the book, expertly written text is supplemented by a number of high quality figures and tables, as well as a video documenting surgical treatment of type 1 split cord malformation. By focusing on each entity currently grouped within this topic as a separate chapter, the most up-to-date information will

be provided to the reader, making *Occult Spinal Dysraphism* a must-have resource for students, practitioners and medical professionals involved in treating spinal dysraphism. **Mesopotamian Astrology An Introduction to Babylonian and Assyrian Celestial Divination** *Museum Tusulanum Press* This book is intended to serve as a general introduction to Mesopotamian astrology, both its outward phenomena and its inner structure. **Virtual and Networked Organizations, Emergent Technologies and Tools First International Conference, ViNOrg 2011, Ofir, Portugal, July 6-8, 2011. Revised Selected Papers** *Springer* This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Virtual and Networked Organizations, Emergent Technologies, and Tools, ViNOrg 2011, held in Ofir, Portugal, in July 2011. The 35 revised full papers presented were carefully reviewed and selected from over 60 initial submissions. The papers cover a wide range of topics, such as ubiquitous computing and organizations, cloud computing and architectures, grid computing, human-computer interfaces, serious games, data mining, Web services, cognitive systems, social networks and other emergent IT/IS approaches in various function domains, such as decision support systems, planning, design, control, negotiation, marketing, management and many other, in the context of virtual and networked enterprises and organizations. **Complex Systems Concurrent Engineering Collaboration, Technology Innovation and Sustainability** *Springer Science & Business Media* This volume features the proceedings of the 14th ISPE Conference on Concurrent Engineering, held in São José dos Campos, São Paulo, Brazil, on the 16th - 20th of July 2007. It highlights the application of concurrent engineering to the development of complex systems. **Atlas of Thyroid and Neuroendocrine Tumor Markers** *Springer* This book highlights the increase in thyroid tumors and NET and demonstrates the growing importance of circulating markers in diagnosis as well as treatment and follow-up. Dramatic technical improvements have heightened the clinical impact of well-established, conventional biochemical markers. In addition, more recent genetic and molecular approaches have provided innovative molecular markers. In this context, effective communication between clinicians and laboratory physicians/scientists is essential in allowing all those involved to fully profit from these exciting advances. In this comprehensive, up-to-date book, authors from different laboratory and clinical areas link laboratory and clinical topics. Analytical problems such as interferences, false-negative and false-positive results are discussed in depth, and flow-charts offer insights into identifying and avoiding them. Illustrated clinical cases detail the clinical role and limitations of different tumor markers. Lastly, it explores health technology assessment and economic issues. This is a valuable resource for endocrinologists, oncologists, nuclear medicine physicians, scientists and technologists who want to keep abreast of the latest developments. **Liturgies, Eastern and Western, Being the Texts Original Or Translated of the Principal Liturgies of the Church Vol. 1: Eastern Liturgies;** *Franklin Classics* This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Mesopotamian Protective Spirits The Ritual Texts *BRILL* Wiggerman's study of Mesopotamian monsters bridges the gap between text and image. Wooden and clay figures of monstrous spirits such as Hairy-One (lahmu), Bison-Bull (kusarikku), and Furious-Snake (mushussu) stand guard at the entrances to buildings to protect the inhabitants from demonic intruders. Deriving his information from the ritual texts that describe the production and installation of these figures, the author identifies the monsters of the texts with objects from the archaeological record and presents a detailed discussion of the identities and histories of a variety of Mesopotamian monsters.

Greek Theories of Elementary Cognition from Alcmaeon to Aristotle *Lulu.com* Greek theories of elementary cognition from Alcmaeon to Aristotle, by John I. Beare. The aim of this book is to give a close General historical account of the various theories, partly physiological and partly psychological, by which the Greek philosophers from Alcmaeon to Aristotle endeavoured to explain the elementary phenomena of cognition. The pre-Aristotelean writers who applied themselves to this subject, and of whose writings we possess any considerable information, are Alcmaeon of Crotona, Empedocles, Democritus, Anaxagoras, Diogenes of Apollonia, and Plato. We propose to set forth here their speculations, together with those of Aristotle, as to the so-called Five Senses, Sensation in general, and the psychical processes, such as Imagination and Memory, which involve the synthetic function referred by Aristotle to Sense, and named by his Latin commentators the *Sensits Communis*. Reproduction of the 1906 Edition.

Mechanisms of Gastrointestinal Motility and Secretion *Springer Science & Business Media* **Designing Sustainability for All The Design of Sustainable Product-Service Systems Applied to Distributed Economies** *Springer Nature* This open access book introduces design for Sustainable Product-Service Systems (S.PSS) and for Sustainable Distributed Economies (S.DE). These are introduced as technical and operative tools for the development of a new generation of designers, responsible and capable of designing environmentally, socially and economically sustainable solutions, accessible to all. The book provides a comprehensive framework and also practical tools to support the system design for sustainability process. It overviews methodologies, tools and strategies for Sustainable PSS design applied to Distributed Economies (DE) and provides strategies and design guidelines. All of these are highlighted and expanded upon with international case studies.

Commensality and ceremonial meals in the neo-assyrian period. Ediz. italiana e inglese **Music in Antiquity The Near East and the Mediterranean** *Walter de Gruyter* Music was one component of the cultural continuum that developed in the contiguous civilizations of the ancient Near East and of Greece and Rome. This book covers the range and gamut of this symbiosis, as well as scrutinizes archeological findings, texts, and iconographical materials in specific geographical

areas along this continuum. The book, volume VIII of Yuval – Studies of the Jewish Music Research Centre at the Hebrew University, provides an updated scholarly assessment of the rich soundscapes of ancient civilizations. **Njals Saga and Its Christian Background: A Study of Narrative Method. Germanica Latina VIII** Peeters Njals saga is universally recognised as the greatest and most complex of all the sagas of Icelanders (Islendingasögur). The originality with which the writer composed his narrative has led to its being likened to a novel created by an author who certainly used sources, although identifying which parts of the saga descend from oral and which from written sources has proved difficult. The 'Christian background' of the title of this study refers to the ecclesiastical texts (including Scripture and its exegesis, church liturgy and the liturgical year, and hagiographical and apocryphal writings) which, it is argued, were used by the author of Njals saga as he both created a bipartite structure, using familiar Christian metaphors to help unify the work; and developed his central thematic concern: that good legal judgement depends upon justice and mercy acting together, as in divine judgement. It is this which finally redeems Skarphedinn Njalsson. **Roman Woodworking** Yale University Press *Tecnicas Romanas en madera. Biblical Essays Land and Calendar The Priestly Document from Genesis 1 to Joshua 18* Bloomsbury Publishing Thanks to very peculiar style and theology, Pg was identified as far back as 1869 by Theodor Nöldeke and remains one of the last pillars of Pentateuch research after the fall of the Wellhausen model. Its existence is rarely doubted, but its extent is debated. Does it end already in Exodus (Otto, Pola, Bauks) or does it go as far as Deuteronomy (Noth, Frevel) or even into Joshua (Lohfink, Knauf)? The end determines Pg's notion of the land and its conquest, important subjects today for the formation of the Pentateuch (was there first a Hexateuch?). The 364-day perpetual calendar offers a reliable criterion to identify Pg within the final text of the Hexateuch because the simple mathematic of the calendar are easier to control than hypothetical redactors. Pg is divided into seven periods, from creation to the entry of the sons of Israel in an empty land of Canaan. The festival calendar of Leviticus 23, and the Jubilee of Lev 25 constitute the heart of Pg, the practical outworking of principles presented in the narrative. Bloodless atonement with no connection to any temple whatsoever, peaceful entry into the empty Promised Land, eternal sabbatical rhythm, are Pg's major theological characteristics. **Hurrians and Subarians Safety Management Systems in Aviation** Routledge Although aviation is among the safest modes of transportation in the world today, accidents still happen. In order to further reduce accidents and improve safety, proactive approaches must be adopted by the aviation community. The International Civil Aviation Organization (ICAO) has mandated that all of its member states implement Safety Management System (SMS) programs in their aviation industries. While some countries (the United States, Australia, Canada, members of the European Union and New Zealand, for example) have been engaged in SMS for a few years, it is still non-existent in many other countries. This unique and comprehensive book has been designed as a textbook for the student of aviation safety, and as an invaluable reference tool for the SMS practitioner in any segment of aviation. It discusses the quality management underpinnings of SMS, the four components, risk management, reliability engineering, SMS implementation, and the scientific rigor that must be designed into

proactive safety. The authors introduce a hypothetical airline-oriented safety scenario at the beginning of the book and conclude it at the end, engaging the reader and adding interest to the text. To enhance the practical application of the material, the book also features numerous SMS in Practice commentaries by some of the most respected names in aviation safety. In this second edition of *Safety Management Systems in Aviation*, the authors have extensively updated relevant sections to reflect developments since the original book of 2008. New sections include: a brief history of FAA initiatives to establish SMS, data-driven safety studies, developing a system description, SMS in a flight school, and measuring SMS effectiveness.

Principles of Akkadian Textual Criticism *Walter de Gruyter* Errors of many kinds abound in Akkadian writings, but this fact's far-reaching implications have never been unraveled and systematized. To attempt this is the aim of this book. Drawing on scholarship from other fields, it outlines a framework for the critical evaluation of extant text and the formulation of conjectural emendations. Along the way, it explores issues at the interface of orthography, textual transmission, scribal education, grammar, literacy, and literary interpretation.

PET/CT in Neuroendocrine Tumors *Springer* This pocket book provides up-to-date descriptions of the most relevant features of neuroendocrine tumors (NETs) and the imaging modalities currently available to assist specialists (clinicians, pathologists, radiologists, nuclear medicine physicians) in selecting optimal patient management based on interdisciplinary collaboration. As the title indicates, the focus is particularly on PET/CT, with coverage of basic principles, the available radiopharmaceuticals, indications, typical and atypical appearances, normal variants and artifacts, advantages, limitations, and pitfalls. In addition, succinct information is provided on the use of other imaging modalities, including SPECT, CT, and MRI, and on pathology and treatment options. Imaging teaching cases are presented, and key points are highlighted throughout. The book is published as part of a series on hybrid imaging that is specifically aimed at referring clinicians, nuclear medicine/radiology physicians, radiographers/technologists, and nurses who routinely work in nuclear medicine and participate in multidisciplinary meetings.

Pi: A Source Book *Springer Science & Business Media* Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important

mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Women in the Ancient Near East *Walter de Gruyter GmbH & Co KG* *Women in the Ancient Near East* offers a lucid account of the daily life of women in Mesopotamia from the third millennium BCE until the beginning of the Hellenistic period. The book systematically presents the lives of women emerging from the available cuneiform material and discusses modern scholarly opinion. Stol's book is the first full-scale treatment of the history of women in the Ancient Near East.

A Global Overview of the Conservation of Freshwater Decapod Crustaceans *Springer* This book introduces updated information on conservation issues, providing an overview of what is needed to advance the global conservation of freshwater decapods such as freshwater crabs, crayfish, and shrimps. Biodiversity loss in general is highest in organisms that depend on intact freshwater habitats, because freshwater ecosystems worldwide are suffering intense threats from multiple sources. Our understanding of the number and location of threatened species of decapods, and of the nature of their extinction threats has improved greatly in recent years, and has enabled the development of species conservation strategies. This volume focuses on saving threatened species from extinction, and emphasizes the importance of the successful implementation of conservation action plans through cooperation between scientists, conservationists, educators, funding agencies, policy makers, and conservation agencies.

The SBL Handbook of Style For Ancient Near Eastern, Biblical, and Early Christian Studies *Hendrickson Pub* The "one-stop" reference for authors preparing manuscripts in biblical studies and related fields.

Sophocles The Plays and Fragments Pedagogic Frailty and Resilience in the University *Springer* *Pedagogic Frailty and Resilience in the University* presents a theoretical model and a practical tool to support the professional development of reflective university teachers. It can be used to highlight links to key issues in higher education. Pedagogic frailty exists where the quality of interaction between elements in the evolving teaching environment succumbs to cumulative pressures that eventually inhibit the capacity to develop teaching practice. Indicators of frailty can be observed at different resolutions, from the individual, to the departmental or the institutional. Chapters are written by experts in their respective fields who critique the frailty model from the perspectives of their own research. This will help readers to make practical links between established bodies of research literature and the

concept of frailty, and to form a coherent and integrated view of higher education. This can then be explored and developed by individuals, departments or institutions to inform and evaluate their own enhancement programmes. This may support the development of greater resilience to the demands of the teaching environment. In comparison with other commonly used terms, we have found that the term 'frailty' has improved resonance with the experiences of colleagues across the disciplines in higher education, and elicits a personal (sometimes emotional) response to their professional situation that encourages positive dialogue, debate and reflection that may lead to the enhancement of university teaching. This book offers a particular route through the fractured discourses of higher education pedagogy, creating a coherent and cohesive perspective of the field that may illuminate the experiences and observations of colleagues within the profession. "If we are to realise the promise of higher education ... we will need the concepts, methods, and reflections contained in this book." - Robert R. Hoffman

Reframing Consciousness *Intellect Books* We are in the middle of a process of complex cultural transformation, but to what extent is this matched by the transformation in the way we see ourselves? This book covers a wide-ranging discussion on the interaction between Art, Science and Technology, and goes on to challenge assumptions about 'reality'. Loosely themed around four key elements of Mind, Body, Art and Values, the editor leads the investigation through the familiar territories of interactive media and artificial life, combining them with new and ancient ideas about creativity and personal identity. The contributing authors numb.
