## **AN ANARCHIST HISTORY OF UPLAND SOUTHEAST ASIA**

---

Yale University Press From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and warfare. This book, essentially an “anarchist history,” is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of “internal colonialism.” This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott’s work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

## **QUESTIONS AND ANSWERS ON PHYSIOLOGY AND MEDICAL ASPECTS OF SCUBA DIVING**

---

Lawrence Martin

---

## **YOGA FOR SCUBA DIVERS**

---

Yoga for Scuba Divers teaches you poses, breathing exercises, visualization methods, and yoga ethics that make you a better diver. By practicing the poses you can: enhance your finning techniques and underwater stability, build core

power and abdominal control to fine-tune your buoyancy, and improve your balance and strength for walks on the shore in full gear. The breathing exercises teach you to breathe steadily during physical exertion, keeping you calm under water. All the yoga poses are practiced on land. Yoga for Scuba Divers includes visualizations to prepare you mentally for upcoming dives. Athletes use visualization to enhance performance; it's powerful for divers, too. You will also learn yoga principles, such as non-violence, and how they apply to divers. Todd Stedl is a PADI Open Water Scuba Instructor. Kimberlee Jensen Stedl is a Registered Yoga Teacher and an American Council on Exercise Faculty member. Together they have been diving and doing yoga since they met in 2002.

## **THE ALMANACK OF NAVAL RAVIKANT**

---

### **A GUIDE TO WEALTH AND HAPPINESS**

---

Harper Collins **GETTING RICH IS NOT JUST ABOUT LUCK; HAPPINESS IS NOT JUST A TRAIT WE ARE BORN WITH.** These aspirations may seem out of reach, but building wealth and being happy are skills we can learn. So what are these skills, and how do we learn them? What are the principles that should guide our efforts? What does progress really look like? Naval Ravikant is an entrepreneur, philosopher, and investor who has captivated the world with his principles for building wealth and creating long-term happiness. The Almanack of Naval Ravikant is a collection of Naval's wisdom and experience from the last ten years, shared as a curation of his most insightful interviews and poignant reflections. This isn't a how-to book, or a step-by-step gimmick. Instead, through Naval's own words, you will learn how to walk your own unique path toward a happier, wealthier life.

## **DIVING IN THAILAND**

---

With 2170 kilometers of coastline fronting on the Gulf of Thailand and the Andaman Sea, Thailand has one of the richest marine faunas in the world. Its tropical climate ensures year-round diving pleasure in pristine waters and varied underwater terrain that host a diversity of marine life, from brilliant colored coral polyps to graceful featherstars and a wide variety of reef fish, shark, marlin, sailfish, and barracuda. In a unique compilation of facts and photographs, writer Collin Piprell and photographer Ashley J. Boyd take an enticing look at some of Thailand's best dive sites - along with expert advice on travel, preparation, and facilities. Whether it is scuba diving, wreck diving or live-aboard cruises to premier destinations such as the Similans, the Surins, or the fabled Burma Banks, Diving in Thailand opens up an exciting vista of undersea life and diving spots that are among the best in the world. Contents Introduction Weather Conditions Diving Regulations Thailand's Marine Life Dangerous Marine Life Conserving Thailand's Coral Reefs Underwater Photography: Some Basic Tips Using this Guide ANDAMAN SEA Destination Phuket and Immediate Environs Destination Trang Destination Islands and Banks North and Northwest of Phuket GULF of

**THAILAND Destination Pattaya/Sattahip/Samae San Destination Chumphon. Destination Koh Samui/Koh Tao Destination Koh Chang Marine National Park A Concluding Note** Author Collin Piprell, a Canadian, is a professional writer based in Bangkok. He has had wide experience of sports diving and has collaborated with Ashley J. Boyd on **THAILAND'S CORAL REEFS** and dozens of articles related to diving and the natural history of coral reefs. About the Photographer: Ashley J. Boyd, an Australian, is a professional still and video photographer based in Bangkok. His photographs have appeared in a wide variety of books, magazines, calendars and posters. His video work has appeared on television and in promotional and educational films. A qualified PADI scuba instructor who specialises in underwater photography courses, Boyd has so far logged over 2,500 dives in tropical Asia.

## **STAYING ALIVE**

---

---

### **APPLYING RISK MANAGEMENT TO ADVANCED SCUBA DIVING**

---

Scuba divers are dying in caves, on wrecks, and in open water. These are not explorers pushing the boundaries of the known world, and they are not scientist seeking to prove new concepts and expand our understanding of the marine environment. These are ordinary divers. The man buying a coffee ahead of us in the morning; the woman we see walking her dog on our street. Brothers, sisters, aunts and uncles. Someone's wife or husband, mom or dad. Just regular people who are diving for the fun of it. These deaths are tragic, life-altering, devastating, a terrible waste. Worst of all, they are totally unnecessary, a sad mistake and often completely avoidable. In *Staying Alive*, Steve Lewis tells us there are very few diving accidents. Most of the heart-breaking events claiming the lives of scores of recreational divers are mistakes that result from established limits being ignored. Lewis revisits the survival guidelines originally proposed by the legendary Sheck Exley and shows us in eight straightforward steps how simple it is for sport and technical divers to avoid becoming a statistic.

**MAKE: ROCKETS**

---

---

**DOWN-TO-EARTH ROCKET SCIENCE**

---

Maker Media, Inc. **This book teaches the reader to build rockets--powered by compressed air, water, and solid propellant--with the maximum possible fun, safety, and educational experience. Make: Rockets is for all the science geeks who look at the moon and try to figure out where Neil Armstrong walked, watch in awe as rockets lift off, and want to fly their own model rockets. Starting with the basics of rocket propulsion, readers will start out making rockets made from stuff lying around the house, and then move on up to air-, water-, and solid propellant-powered rockets. Most of the rockets in the book can be built from parts in the Estes Designer Special kit.**

### **BECOMING A MARINE BIOLOGIST**

---

Simon & Schuster **A fascinating guide to a career in marine biology written by bestselling journalist Virginia Morell and based on the real-life experiences of an expert in the field—essential reading for someone considering a path to this profession. For the last two decades, Dr. Robin Baird has spent two months out of each year aboard a twenty-four-foot Zodiac boat in the waters off the big island of Hawai'i, researching the twenty-five species of whales and dolphins that live in the Pacific Ocean. His life may seem an impossible dream—but his career path from being the first person in his family to graduate college to becoming the leading expert on some of Hawai'i's marine mammals was full of twists and turns. Join Baird aboard his Zodiac for a candid look at the realities of life as a research scientist, from the ever-present struggles to secure grants and publish new data, to the joys of helping to protect the ocean and its inhabitants. You'll also learn pro tips, like the unexpected upsides to not majoring in marine biology and the usefulness of hobbies like sailing, birdwatching, photography, and archery. (You'll need good aim to tag animals with the tiny recording devices that track their movements.) Becoming a Marine Biologist is an essential guide for anyone looking to turn a passion for the natural world into a career. This is the most valuable informational interview you'll have—required reading for anyone considering this challenging yet rewarding path.**

### **TAKE THE SLOW ROAD: ENGLAND AND WALES**

---

---

### **INSPIRATIONAL JOURNEYS ROUND ENGLAND AND WALES BY CAMPER VAN AND MOTORHOME**

---

Bloomsbury Publishing **Forget hurrying. Forget putting your foot down and racing through sweeping bends. Forget the understeer (whatever that is). Forget the blur of a life lived too fast. This is a look at taking life slowly. It's about taking the time to enjoy journeys and places for their own sake. It's about stopping and putting the kettle on. Stopping**

to take a picture. Stopping to enjoy stopping. How are you going to do it? In a camper van or a motorhome, of course. In this book we define the best driving routes around England and Wales for camper vans and motorhomes. We show you the coolest places to stay, what to see, what to do and explain why it's special. We meander around England and Wales on the most breathtaking roads, chugging up mountain passes and pootling along the coast. We show you stuff that's fun, often free. We include the best drives for different kinds of drivers; for surfers, wildlife watchers, climbers and walkers. We include the steepest, the bendiest, those with the most interesting bridges or views or obstacles, ferries and tidal causeways. And you don't even have to own a camper van or motorhome - we'll tell you the many places you can rent one to take you on the journey. All of this is interspersed with beautiful photos, handy maps and quirky travel writing from the king of camper vans and motorhomes, Martin Dorey. So if all you want to do is flick through it on a cold day and plan your next outing, you'll be transported (albeit slowly) to pastures, beaches, mountains and highways that make you want to turn the key and go, go, go!

---

## **THE DARKNESS BECKONS**

---

---

## **THE HISTORY AND DEVELOPMENT OF WORLD CAVE DIVING**

---

[Vertebrate Publishing](#) **Martyn Farr's The Darkness Beckons charts the history and development of cave diving, from early underwater expeditions in France in the late nineteenth century, through to cutting-edge dives across the globe, where iron-willed individuals are pushing the limits of equipment and techniques in the pursuit of exploration. Cave diving is the natural evolution of caving, where cavers and open-water divers overcome the challenges of water-filled passages by using specialist breathing apparatus to explore further and deeper than ever before. The challenges are many ; distance, depth, temperature, visibility, rockfall and simple restriction in passage size ; together with the**

physical and mental demands placed on an individual in an environment where, despite meticulous preparation, equipment can malfunction and one cannot expect to be rescued if something goes wrong. Early cave dives were made using Standard Equipment diving suits, before 'frogman' equipment was adopted by British and Italian divers in the 1940s. Around the same time, Jacques-Yves Cousteau and Émile Gagnan designed the compressed-air aqualung, the first scuba equipment. The development of breathing apparatus has continued, alongside solutions to evermore challenging projects, especially those at extreme depth. British cave divers, including the author, have been at the forefront of many developments, such as the explorations at Wookey Hole in the Mendips, Keld Head in the Yorkshire Dales and Pozo Azul in Spain. Cave diving today is a truly international endeavour, and Farr gives detailed and engaging accounts of developments in Europe, the Americas, Australia and New Zealand, Southern Africa and more. Farr introduces cave diving's pioneers and chronicles their achievements. Among a cast of many are the Britons Graham Balcombe and Mike Boon; the American Sheck Exley, who died while attempting to establish a new depth record in the Zacatón sinkhole in Mexico; and the outstanding German cave diver and equipment innovator Jochen Hasenmayer. The stories of their adventures are charged with courage, danger and excitement, and some have led to tragedy. First published in 1980, this 2017 edition of *The Darkness Beckons* has been fully revised and updated to reflect the latest developments. Featuring over 400 breathtaking photographs and illustrations, and with a foreword by renowned American cave diver and explorer Bill Stone, it is an inspirational read for anyone with an interest in exploration and adventure.
