ADVANCES IN MIXED METHODS RESEARCH

THEORIES AND APPLICATIONS

SAGE Advances in Mixed Methods Research provides an essential introduction to the fast-growing field of mixed methods research. Bergman's book examines the current state of mixed-methods research, exploring exciting new ways of conceptualizing and conducting empirical research in the social and health sciences. Contributions from the world's leading experts in qualitative, quantitative, and mixed methods approaches are brought together, clearing the way for a more constructive approach to social research. These contributions cover the main practical and methodological issues and include a number of different visions of what mixed methods research is. The discussion also covers the use of mixed methods in a diverse range of fields, including sociology, education, politics, psychology, computational science and methodology. This book represents an important contribution to the ongoing debate surrounding the use of mixed methods in the social sciences and health research, and presents a convincing argument that the conventional, paradigmatic view of qualitative and quantitative research is outdated and in need of replacement. It will be essential reading for anyone actively engaged in qualitative, quantitative and mixed methods research and for students of social research methods. Manfred Max Bergman is Chair of Methodology and Political Sociology at the University of Basel.

ENGAGING CHINESE STUDENTS IN TEACHING AND LEARNING AT WESTERN HIGHER EDUCATION INSTITUTIONS

Cambridge Scholars Publishing There has been an increase over the past decade in the number of Chinese students studying in western Higher Education Institutions, with figures expected to increase over the next 10 years. However, this has proved particularly challenging for the lecturers in these Institutions regarding how best to engage and teach this particularly unique student group. The Chinese student presents these challenges due to the many cultural and language differences that can be identified, as well as to the western teacher's perception of how these students like to be taught. This book disputes such myths, and provide a useful guide on what those challenges are, offering practical guidance on how to overcome them. The book firstly identifies and defines the Chinese student studying for a degree in western universities and institutions, before going on to examine and explore the cultural differences by discussing issues around teaching and learning. A chapter focusing specifically on language breaks down the differences in detail, with discussions around tonal language and its impact on the student's understanding. Further chapters discuss attitudes to learning, staff support for teaching this particular group, and, finally, some practical suggestions on how best to engage the student and enable them to achieve.

DEVELOPING DISASTER RESILIENT HOUSING IN VIETNAM: CHALLENGES AND SOLUTIONS

Springer This book provides a comprehensive understanding on disaster resilient housing within the Vietnam context particularly and the developing world generally. The book has identified the root causes of housing vulnerability, restrictions to safe housing development, concepts of disaster resilient housing, key issues/factors implementers and building designers need to consider, and ways of achieving resilient housing outcomes in actual design projects. The design and development of disaster resilient housing has been framed into three main themes: (i) community consultation, (ii) the role of built-environment professionals and (iii) design responses for resilience. To achieve these themes, there is a variety of contextual and intervening conditions that need to be addressed and met to provide an enabling environment for promoting disaster resilient housing. These three themes are among the most arguable issues in recent debates and discussions, academically and practically, regarding disaster risk reduction and safe housing development. In addition, this book also provides the evidence-based design framework for disaster resilient housing upon which design ideas and solutions for safe and resilient housing can be generated and shaped.

THE MIXED METHODS READER

This integrative collection draws from the international literature appearing across diverse research disciplines over the past thirty years.

ADVANCED RESEARCH METHODS IN THE BUILT ENVIRONMENT

John Wiley & Sons This book provides a bridge between the introductory research methods books and the discipline-specific, higher level texts. Its unique feature is the coverage of the detailed process of research rather than the findings of research projects. Chapter authors have been carefully selected by their expertise, discipline and location to give an eclectic range of perspectives. Particular care has been taken to balance positivist with interpretivist approaches throughout. The authors focus is on the practical consequences of research philosophies, strategies and techniques by using their own research and by evaluating the work of others. Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process. Issues covered range from the practicalities of producing a journal article to the role of theory in research. The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research.

MIXING METHODS: QUALITATIVE AND QUANTITATIVE RESEARCH

Routledge This book focuses on a key issue in the methodology of the social and behavioural sciences: the mixing of different research methods. The extent to which qualitative and quantitative research differ from one another has long been a subject of debate. Although many methodologists have concluded that the two approaches are not mutually exclusive, there are few books on either the theory or the practice of mixing methods. Mixing Methods: Qualitative and Quantitative Research presents a comprehensive discussion of the theoretical, methodological and practical issues. It also covers a number of case studies of research which have successfully combined qualitative and quantitative approaches. Contributors include sociologists who have written extensively on the methodology of the social sciences and researchers who have concerned themselves with important social policy issues in the fields of further education, community services and household finances.

STUDENT'S GUIDE TO WRITING DISSERTATIONS AND THESES IN TOURISM STUDIES AND RELATED DISCIPLINES

Routledge Around the world every year very many students have to complete dissertations or theses as part of their undergraduate or masters studies in tourism and related subjects. Often this substantial piece of self-directed work is the culmination of their programmes. More than just a means to consolidate their final grades, it is also an exciting chance to research a topic of their choosing and a potential gateway to more advanced study as well as job offers and future career paths. Yet for all these reasons, many students view the dissertation as a tricky challenge. This comprehensive book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines. The process is examined from the germination of an idea to the submission and assessment of the final document. Written primarily for students conducting independent research for the first time, this book offers simple advice and a clear framework which students can adopt even in more advanced studies at masters and doctoral level. This book debunks popular myths, and aims to overcome common pitfalls. It focuses on the aims and objectives as the DNA of every dissertation. Rather than view it as a single, overwhelming project, the dissertation is presented as a series of more modest, manageable yet crucially inter-linked tasks that all students can successfully complete through careful preparation and effective time management. Dissertations are not to be underestimated and they demand great care and attention, but they can also be immensely rewarding and enriching experiences academically and personally. This 'jargon free' book is also written with overseas students specifically in mind, drawing directly on our overseas students' experiences. This valuable resource contains start of chapter learning objectives and end of chapter checklists, as well as numerous boxed case studies, to further help assist students through their dissertation.

HYBRIDITY IN CONTEMPORARY COMMERCIAL ORGANIZATIONS

IMPLICATIONS FOR EMPLOYEE TRUST

Cambridge Scholars Publishing Times of extensive institutional pressure challenge the existence of commercial organizations as entities that reproduce a single coherent market-orientated institutional template to achieve effectiveness. In tune with pressure from changing markets, contemporary commercial organizations adopt various combinations of skills, templates, and processes for new sources of competitive advantage. At a conceptual level, hybridity embraces the notion that organizations may embody multiple templates, logics or values to achieve effective organizational performance. However, at a practical level, hybridity presents tensions, inconsistencies and contradictions for these organizations; a state of affairs that could have adverse negative consequences for employees' behaviour and trust in the organization. This book offers an exploration of individual-level responses to logics multiplicity for all those interested in the future of commercial organizations.

AN INFUSION APPROACH

Springer This book presents an innovative teaching experiment and an analytical study of critical thinking and the sociocultural theory of learning to illustrate the cognitive learning development mechanisms. It addresses the issues in developing critical thinking, including the controversy surrounding the definition, measurement and teaching of critical thinking, particularly in the L2 context. The book explains how infusion-thinking lessons can be structured to help students develop critical thinking along with language learning.
