Epistemologies of the South

Justice Against Epistemicide

Routledge This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. *Epistemologies of the South* outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Beyond Relief

Food Security in Protracted Crises

Practical Action Pub In many countries, prolonged conflicts result in food emergencies that recur over years or even decades. Initial humanitarian relief efforts are rarely replaced by programmes that offer a longer-term perspective on food security. This book provides examples of opportunities to bridge the gap between emergency relief and longer term developmental approaches, which can help us rethink how to support food security in protracted crises. Somalia, Sudan and the Democratic Republic of Congo have all been affected by severe protracted crises. For the first time, evidence and in-depth analysis from these countries sheds light on how to support the livelihoods of local populations. Using concrete examples, Beyond Relief demonstrates how food security means different things in different contexts while also advocating a crosscutting learning process for longer-term approaches to protracted crisis. Published in association with the Food and Agriculture Organization of the United Nations.

A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.
