A STEVE JOBS BIOGRAPHY

[Createspace Independent Publishing Platform](#) Steve Jobs was an American entrepreneur, businessman, inventor, and industrial designer. Jobs was the chairman, and the chief executive officer (CEO), and a co-founder of Apple Inc.; CEO and majority shareholder of Pixar; a member of The Walt Disney Company's board of directors following its acquisition of Pixar; and founder, chairman, and CEO of NeXT. Jobs and Apple co-founder Steve Wozniak are widely recognized as pioneers of the microcomputer revolution of the 1970s and 1980s. He was born in San Francisco to parents who had to put him up for adoption at birth; he was raised in the San Francisco Bay Area during the 1960s. Jobs then attended Reed College in 1972 before dropping out, and decided to travel through India in 1974 seeking enlightenment and studying Zen Buddhism. Jobs's declassified FBI report stated that an acquaintance knew that Jobs had used marijuana (the formerly illegal drug in California), and LSD while he was in college. Jobs once told a reporter that taking LSD was "one of the two or three most important things" he did in his life. Jobs and Wozniak co-founded Apple in 1976 to sell Wozniak's Apple I personal computer. The visionaries gained fame and wealth a year later for the Apple II, one of the first highly successful mass-produced personal computers. In 1979, after a tour of PARC, Jobs saw the commercial potential of the Xerox Alto, which was mouse-driven and had a graphical user interface (GUI). This led to development of the unsuccessful Apple Lisa in 1983, followed by the breakthrough Macintosh in 1984. In addition to being the first mass-produced computer with a GUI, the Macintosh introduced the sudden rise of the desktop publishing industry in 1985 with the addition of the Apple LaserWriter, the first laser printer to feature vector graphics. Following a long power struggle, Jobs was forced out of Apple in 1985. After leaving Apple, Jobs took a few of its members with him to found NeXT, a computer platform development company that specialized in state-of-the-art computers for higher-education and business markets. In addition, Jobs helped to initiate the development of the visual effects industry when he funded the spinout of the computer graphics division of George Lucas's Lucasfilm in 1986. The new company, Pixar, would eventually produce the first fully computer-animated film, Toy Story—an event made possible in part because of Jobs's financial support. In 1997, Apple merged with NeXT. Within a few months of the merger, Jobs became CEO of his former company; he revived Apple at the verge of bankruptcy. Beginning in 1997 with the "Think different" advertising campaign, Jobs worked closely with designer Jonathan Ive to develop a line of products that would have larger cultural ramifications: the iMac, iTunes and iTunes Store, Apple Store, iPod, iPhone, App Store, and the iPad. In 2001, the original Mac OS was replaced with a completely new Mac OS X, based on NeXT's NeXTSTEP platform, giving the OS a modern Unix-based foundation for the first time. Jobs was diagnosed with a pancreatic neuroendocrine tumor in 2003 and died on October 5, 2011, of respiratory arrest related to the pancreatic tumor.

DO FISH DRINK WATER?

PUZZLING AND IMPROBABLE QUESTIONS AND ANSWERS

[Harper Collins](#) Is it true that elephants are afraid of mice? How much gold does the United States store in Fort Knox? Why do I get a headache when I eat ice cream too fast? How did the "seventh inning stretch" originate? As the official webmaster for Xerox, Bill McLain was surprised by the kinds of questions he was receiving, like whether people born blind can see in their dreams and why rabbits are associated with Easter. McLain began to answer each and every question—attracting national attention from MSNBC, CNN, and People—and the result, collected in Do Fish Drink Water?, is a surprising, funny, and informative collection of facts. McLain's answers can often be as wild as the questions and prompt entertaining anecdotes about where he found them. McLain explains how magnets are made, what caused the Great Depression of 1922, and even explains why cats purr. Also included is an extensive list of websites where he conducts research, offering an informative guide to making the most of the Internet.

THE LINGUISTICS OF PUNCTUATION

[Center for the Study of Language \(CSLI\)](#) Geoffrey Nunberg challenges a widespread assumption that the linguistic structure of written languages is qualitatively identical to that of spoken language: It should no longer be necessary to defend the view that written language is truly language, but it is surprising to learn of written-language category indicators that are realized by punctuation marks and other figural devices.' He shows that traditional approaches to these devices tend to describe the features of written language exclusively by analogy to those of spoken language, with the result that punctuation has been regarded as an unsystematic and deficient means for presenting spoken-language intonation. Analysed in its own terms, however, punctuation manifests a coherent linguistic subsystem of 'text-grammar' that coexists in writing with the system of 'lexical grammar' that has been the traditional object of linguistic inquiry. A detailed analysis of the category structure of English text-sentences reveals a highly systematic set of syntactic and presentational rules that can be described in terms independent of the rules of lexical grammar and are largely matters of the tacit knowledge that writers acquire without formal instruction. That these rules obey constraints that are structurally analogous to those of lexical grammar leads Nunberg to label the text-grammar an 'application' of the principles of natural language organization to a new domain. Geoffrey Nunberg is a researcher at Xerox Palo Alto Research Center.

HYDROGENATED AMORPHOUS SILICON

[Cambridge University Press](#) Divided roughly into two parts, the book describes the physical properties and device applications of hydrogenated amorphous silicon. The first section is concerned with the atomic and electronic structure, and covers growth defects and doping and defect reactions. The emphasis is on the optical and electronic properties that result from the disordered structure. The second part of the book describes electronic conduction, recombination, interfaces, and multilayers. The special attribute of a-Si:H which makes it useful is the ability to deposit the material inexpensively over large areas, while retaining good semiconducting properties, and the final chapter discusses various applications and devices.

FAIRIES AFIELD

Book Excerpt: ... But she said nothing of the sort of mystery connected with the powder; some instinct prevented her doing so. Nor did she tell that but a little of it remained, or that their stock of rose-leaves would soon be exhausted."Who knows what may happen before that?" she reflected, and the words of Linde's dream-visitor recurred to her, "Three times, and then ask the robin."Dame Barbara was quite satisfied and greatly delighted."Here," she said, fumbling for her substantial purse, "a groat for two ounces of it, did you say? No, a half-groat only? My dear, you'll have to raise your prices if the perfume is so excellent! Well to begin with, give me the four ounces straight away, and here's a half-groat over and above what it all comes to--dried leaves and fresh ones and flowers, all together--just the tiny silver piece for luck, you know."...

PLEASURED BY THE ENGLISH SPY

Harlequin English spy Andrew Truesdale has been sent to Florence on a mission--to befriend widowed contessa Olivia di Montebaldi and discover if she's plotting a nationalist revolution in the aftermath of Napoleon's defeat. Andrew expects the assignment to be easy. After all, his job with the British Diplomatic Corps required him to perfect the art of flirtation and become a consummate seducer of women. Everything changes, however, when he arrives at Olivia's villa. Instead of the middle-aged woman he expects, Andrew finds a vivacious young beauty who piques his interest...and his lust. But while Andrew may be taken aback by the contessa, Olivia knows exactly who Andrew is...and that he is dangerous. She may let him claim her body, but can she trust him with her secrets?

MUSIC SAVED THEM, THEY SAY**SOCIAL IMPACTS OF MUSIC-MAKING AND LEARNING IN KINSHASA (DR CONGO)**

Routledge Music Saved Them, They Say: Social Impacts of Music-Making and Learning in Kinshasa (DR Congo) explores the role music-making has played in community projects run for young people in the poverty-stricken and often violent surroundings of Kinshasa, the capital city of the Democratic Republic of the Congo. The musicians described here - former gang members and so-called witch children living on the streets - believe music was vital in (re)constructing their lives. Based on fieldwork carried out over the course of three-and-a-half years of research, the study synthesizes interviews, focus group sessions, and participant observation to contextualize this complicated cultural and social environment. Inspired by those who have been saved by music, Music Saved Them, They Say seeks to understand how structured musical practice and education can influence the lives of young people in such difficult living conditions, in Kinshasa and beyond. ... a tribute to the persistence, engagement and courage of the people in these projects, who can be proud that their work is now exposed to a global audience, not just of researchers but also to practitioners around the world who could learn from and be inspired by these hitherto unknown projects. --John Sloboda, Research Professor, Guildhall School of Music & Drama This book is very moving but never sentimental, one of the best accounts of music's real transformative capacities that I have come across. --Lucy Green, Emerita Professor of Music Education, University College London Institute of Education

PRINCE2 FOUNDATION TRAINING MANUAL

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

COURTESAN'S KISS

Bantam From Mary Blayney, the acclaimed author of Stranger's Kiss, comes this irresistible new novel of historical romance featuring the Pennistan family. In Courtesan's Kiss, an independent woman is determined to make her way in the world—even if it's a scandalous one. But first she must escape a nobleman with plans of his own In the wake of a broken engagement and shunned by the ton, Mia Castellano does not retire to the country, as a proper young lady might, but sees her chance to escape society's restraints—by becoming a courtesan. In her mind, no unmarried young woman is as free as a courtesan. She alone controls her destiny: managing her own money, having her own house, choosing her lovers. There's only one obstacle in Mia's path—Lord David Pennistan. As a favor to his brother, Lord David agrees to escort Mia to his family's home in Derbyshire, where her guardian awaits. Mia attracts nothing but trouble from the outset of their journey, yet with every adventure they share, Lord David's desire for his charge grows. When they're caught in a compromising situation, Lord David insists that she marry him. But there's only one thing Mia wants from David, and it isn't his charity or his title. Can he convince her before it's too late that the love she wants is already hers—to take or to lose forever? Can he win more from this untamed beauty than just a courtesan's kiss?
