### Kingdom Under Glass

## A Tale of Obsession, Adventure, and One Man's Quest to Preserve the World's Great Animals

*Picador* In this epic account of an extraordinary life lived during remarkable times, Jay Kirk follows the adventures of legendary explorer and taxidermist Carl Akeley, who revolutionized taxidermy and environmental conservation and created the famed African Hall at New York's Museum of Natural History. Akeley risked death time and again in the jungles of Africa as he stalked animals for his dioramas and hobnobbed with outsized personalities of the era, such as Theodore Roosevelt and P. T. Barnum. Kingdom Under Glass is "a rollicking biography...an epic adventure...[and] a beguiling novelistic portrait of a man and an era straining to hear the call of the wild" (Publishers Weekly).

### The Great Apes

## A Short History

*Yale University Press* Foreword / by Jane Goodall -- The uncanniness of similitude : wild men, simians, and hybrid beings -- Skeletons, skins, and skulls : apes in the age of colonial expansion and natural history collections -- Apes as guinea pigs : primates and experimental research -- Great apes in the eyes of scientists : what does it mean to be an ape? -- Apes that think they are human : astronaut apes, painting apes, talking apes -- Conquering the field : pioneers, the quest for origins, and primates -- Socialities, culture, and traditions among primates : when the boundary between humans and apes blurs -- Women and apes : sex, gender, and primatology -- Becoming-human, being-ape

### Encountering Gorillas

## A Chronicle of Discovery, Exploitation, Understanding, and Survival

*Rowman & Littlefield Publishers* Newman brings a lifetime of study to this exploration of the varied interaction between gorillas and humans. Tragically, most gorillas are now endangered, and those in zoos and sanctuaries now lead much more secure lives. This compelling book helps us understand how our image of gorillas has been distorted and clarified through culture and science and how we now control the destiny of these magnificent apes.

### Emerald Labyrinth

## A Scientist's Adventures in the Jungles of the Congo

*University Press of New England* Emerald Labyrinth is a scientist and adventurer's chronicle of years exploring the rainforests of sub-Saharan Africa. The richly varied habitats of the Democratic Republic of the Congo offer a wealth of animal, plant, chemical, and medical discoveries. But the country also has a deeply troubled colonial past and a complicated political present. Author Eli Greenbaum is a leading expert in sub-Saharan herpetology - snakes, lizards, and frogs - who brings a sense of wonder to the question of how science works in the twenty-first century. Along the way he comes face to face with spitting cobras, silverback mountain gorillas, wild elephants, and the teenaged armies of AK-47-toting fighters engaged in the continent's longest-running war. As a bellwether of the climate and biodiversity crises now facing the planet, the Congo holds the key to our planet's future. Writing in the tradition of books like *The Lost City of Z*, Greenbaum seeks out the creatures struggling to survive in a war-torn, environmentally threatened country. Emerald Labyrinth is an extraordinary book about the enormous challenges and hard-won satisfactions of doing science in one of the least known, least hospitable places on earth.

### American Zoo

## A Sociological Safari

*Princeton University Press* Orangutans swing from Kevlar-lined fire hoses. Giraffes feast on celebratory birthday cakes topped with carrots instead of candles. Hi-tech dinosaur robots growl among steel trees, while owls watch animated cartoons on old television sets. In *American Zoo*, sociologist David Grazian takes us on a safari through the contemporary zoo, alive with its many contradictions and strange wonders. Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots, Grazian introduces us to zookeepers and animal rights activists, parents and toddlers, and the other human primates that make up the zoo's social world. He shows that in a major shift away from their unfortunate pasts, American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes, breeding programs for endangered animals, and enrichment activities for their captive creatures. In doing so, zoos blur the imaginary boundaries we regularly use to separate culture from nature, humans from animals, and civilization from the wild. At the same time, zoos manage a wilderness of competing priorities—animal care, education, scientific research, and recreation—all while attempting to serve as centers for conservation in the wake of the current environmental and climate-change crisis. The world of the zoo reflects how we project our own prejudices and desires onto the animal kingdom, and invest nature with meaning and sentiment. A revealing portrayal of comic animals, delighted children, and feisty zookeepers, *American Zoo* is a remarkable close-up exploration of a classic cultural attraction.

## The Impact of Relief Models on Data Science

*FriesenPress* Discover the University of Wisconsin collection of historic relief models, or three-dimensional maps. The University of Wisconsin relief models were crafted from 1875-1943 at the dawn of the analytics age. Relief models are an extremely effective visualization tool. They help us intuitively understand big data sets and to create spatial awareness--the knowledge of relationships between objects, places and ourselves. Each relief model is shown in beautiful color photography. Learn their fascinating stories of expeditions and earthquakes, mountains and museums, bankruptcy and battlefields, governments and glaciers.

## Moral Claims in the Age of Spectacles

### Shaping the Social Imaginary

*Springer* This volume considers the rise of a new mode of creating, spreading, and encountering moral claims and ideas as they are expressed within spectacles. Brian M. Lowe explains how spectacles emerge when we are saturated with mediated representations—including pictures, texts, and videos—and exposed to television and movies and the myriad stories they tell us. The question of which moral issues gain our attention and which are neglected increasingly relates to how societal concerns are supported—or obscured—by spectacles. This project explores how this new form of moral understanding came to be. Through a series of case studies, including the use of radio and comic books; the crafting of Russian national identity through art; television and film; the evolution of human rights law through film and journalism; and the promotion of animal rights campaigns, this book unveils some of the ways in which our spectacular environment shapes moral understanding, and is in turn shaped by spectacle.

## Taxidermy Art

### A Rogue's Guide to the Work, the Culture, and How to Do It Yourself

*Hachette UK* In this collection of taxidermy art, you'll find a winged monkey with a fez and a martini glass, a jewel-encrusted piglet, a bionic fawn, and a polar bear balancing on a floating refrigerator. Author Robert Marbury makes for a friendly (and often funny) guide, addressing the three big questions people have about taxidermy art: What is it all about? Can I see some examples? and How can I make my own? He takes readers through a brief history of taxidermy (and what sets artistic taxidermy apart) and presents stunning pieces from the most influential artists in the field. Rounding out the book are illustrated how-to lessons to get readers started on their own work, with sources for taxidermy materials and resources for the budding taxidermist.

## Colonial Documentary Film in South and South-East Asia

*Edinburgh University Press* Based on rare archival documents and films, this anthology is the first to focus primarily on the use of official and colonial documentary films in the South and South-East Asian regions. Drawing together a range of international scholars, the book sheds new light on historical, theoretical and empirical issues pertaining to the documentary film, in order to better comprehend the significant transformations of the form in the colonial, late colonial and immediate post-colonial period. Covering diverse geographical and colonial contexts in countries like Singapore, Malaysia, the Philippines and Hong Kong, and focusing on under-researched or little-known films, it demonstrates the complex set of relations between the colonisers and the colonised throughout the region.

## Animal Modernity: Jumbo the Elephant and the Human Dilemma

*Springer* The concept of 'modernity' is central to many disciplines, but what is modernity to animals? Susan Nance answers this question through a radical reinterpretation of the life of Jumbo the elephant. In the 1880s, consumers, the media, zoos, circuses and taxidermists, and (unknowingly) Jumbo himself, transformed the elephant from an orphan of the global ivory trade and zoo captive into a distracting international celebrity. Citizens on two continents imaged Jumbo as a sentient individual and pet, but were aghast when he died in an industrial accident and his remains were absorbed by the taxidermic and animal rendering industries reserved for anonymous animals. The case of Jumbo exposed the 'human dilemma' of modern living, wherein people celebrated individual animals to cope or distract themselves from the wholesale slaughter of animals required by modern consumerism.

## Delia Akeley and the Monkey

### A Human-Animal Story of Captivity, Patriarchy and Nature

*Black Inc.* On an East-African hunting expedition in 1909, Delia Akeley, a forty-year-old American woman, captured a baby female monkey. Delia's loneliness in an isolating patriarchal world, and her long-frustrated desire to adopt a child, had motivated her to nurture the animal. She named the monkey JT Jr and decided to study her interactions with humans. The unique relationship between Delia and JT unlocked Delia's latent talents of research and observation, anticipating both Jane Goodall's chimpanzee writings and Margaret Mead's Samoan ethnographies. However, Delia's love for JT clashed with her husband Carl's obsession to create a temple of African wildlife dioramas at the Museum of Natural History in New York. Nursing Carl's broken body and realising their diverging interests pushed Delia into a breakdown in Uganda, which led to a savage divorce in Manhattan, and the heartbreaking caging of JT in a Washington zoo. Carl's death triggered a long battle between Delia and Carl's widow, who succeeded in obliterating most of Delia's achievements. In *Delia Akeley and the Monkey*, Iain McCalman uses official records and personal documents to build a story of passionate love and hate among women, men, animals and museums that predates our times but speaks to our present. It illuminates much about human-animal relations and the tyranny of gender inequality, through reinstating an obscured story of a dedicated amateur primatologist.

## The Fair Chase

### The Epic Story of Hunting in America

*Hachette UK* An award-winning historian tells the story of hunting in America, showing how this sport has shaped our national identity. From Daniel Boone to Teddy Roosevelt, hunting is one of America's most sacred-but also most fraught-traditions. It was promoted in the 19th century as a way to reconnect "soft" urban Americans with nature and to the legacy of the country's pathfinding heroes. Fair chase, a hunting code of ethics emphasizing fairness, rugged independence, and restraint towards wildlife, emerged as a worldview and gave birth to the conservation movement. But the sport's popularity also caused class, ethnic, and racial divisions, and stirred debate about the treatment of Native Americans and the role of hunting in preparing young men for war. This sweeping and balanced book offers a definitive account of hunting in America. It is essential reading for anyone interested in the evolution of our nation's foundational myths.

## Still Life

### Adventures in Taxidermy

*Houghton Mifflin Harcourt* After her curiosity is piqued by a safari gone awry, a journalist delves into the curious world of taxidermy and shares her findings. It's easy to dismiss taxidermy as a kitschy or morbid sideline, the realm of trophy fish and jackalopes or an anachronistic throwback to the dusty diorama. Yet theirs is a world of intrepid hunter-explorers, eccentric naturalists, and gifted museum artisans, all devoted to the paradoxical pursuit of creating the illusion of life. Into this subculture of passionate animal-lovers ventures journalist Melissa Milgrom, whose journey stretches from the anachronistic family workshop of the last chief taxidermist for the American Museum of Natural History to the studio where an English sculptor, granddaughter of a surrealist artist, preserves the animals for Damien Hirst's most disturbing artworks. She wanders through Mr. Potter's Museum of Curiosities in the final days of its existence to watch dealers vie for preserved Victorian oddities, and visits the Smithsonian's offsite lab, where taxidermists transform zoo skins into vivacious beasts. She tags along with a Canadian bear trapper and former Roy Orbison impersonator—the three-time World Taxidermy Champion—as he resurrects an extinct Irish elk using DNA studies and Paleolithic cave art for reference; she even ultimately picks up a scalpel and stuffs her own squirrel. Transformed from a curious onlooker to an empathetic participant, Milgrom takes us deep into the world of taxidermy and reveals its uncanny appeal. "Hilarious but respectful." —Washington Post "Engrossing." —New Yorker "[A] delightful debut . . . Milgrom has in *Still Life* opened up a whole world to readers." —Chicago Tribune "Milgrom's lively account will appeal to readers who enjoyed Mary Roach's quirky science books." —Library Journal

### Avoid the Day

### A New Nonfiction in Two Movements

*HarperCollins* "Avoid the Day truly seems to me to push nonfiction memoir as far as it can go without it collapsing into a singularity and I am at a loss for words. You are just going to have to read it." -Helen Macdonald, author of *H is for Hawk* A surreal, high-wire act of narrative nonfiction that redefines the genre, *Avoid the Day* is part detective story, part memoir, and part meditation on the meaning of life—all told with a dark pulse of existential horror. What emerges is an unforgettable study of mortality and the artist's journey. Seeking to answer the mystery of a missing manuscript by Béla Bartók, and using the investigation to avoid his father's deathbed, award-winning magazine writer Jay Kirk heads off to Transylvania, going to the same villages where the "Master," like a vampire in search of fresh plasma, had found his new material in the folk music of the peasants. With these stolen songs, Bartók redefined music in the 20th Century. Kirk, who is also seeking to renew his writing, finds inspiration in the composer's unorthodox methods, but begins to lose his tether as he sees himself in Bartók's darkest and most personal work, the *Cantata Profana*, which revolves around the curse of fathers and sons. After a near-psychotic episode under the spell of Bartók, the author suddenly finds himself on a posh eco-tourist cruise in the Arctic. There, accompanied by an old friend, now a documentary filmmaker, the two decide to scrap the documentary and make a horror flick instead—shot under the noses of the unsuspecting passengers and crew. Playing one of the main characters who finds himself inexplicably trapped on a ship at the literal end of the world, alone, and under the influence of the midnight sun, Kirk gets lost in his own cerebral maze, struggling to answer his most plaguing question: can we find meaning in experience?

### The Authentic Animal

### Inside the Odd and Obsessive World of Taxidermy

*St. Martin's Press* Why would someone want to create or own the mounted skin of a dead animal? That's the question Dave Madden explores in *The Authentic Animal*. Madden starts his journey with the life story of Carl Akeley, the father of modern taxidermy. Akeley started small by stuffing a canary, but by the end of his life he had created the astonishing Akeley Hall of African Mammals at The American Museum of Natural History. What Akeley strove for and what fascinates Madden is the attempt by the taxidermist to replicate the authentic animal, looking as though it's still alive. To get a first-hand glimpse at this world, Madden travels to the World Taxidermy Championships, the garage workplaces of people who mount freeze-dried pets for bereaved owners, and the classrooms of a taxidermy academy where students stretch deer pelts over foam bases. On his travels, he looks at the many forms taxidermy takes—hunting trophies, museum dioramas, roadside novelties, pet memorials—and considers what taxidermy has to tell us about human-animal relationships. *The Authentic Animal* is an entertaining and thought-provoking blend of history, biology, and philosophy that will make readers think twice the next time they scoff at a moose head hung lovingly on a wall.

### Visions of Lost Worlds

### The Paleoart of Jay Matternes

*Smithsonian Institution* A lavish showcase of paleoartist Jay Matternes's spectacular murals and sketches For half a century, the artwork of Jay Matternes adorned the fossil halls of the Smithsonian National Museum of Natural History. These treasured Matternes murals documenting mammal evolution over the past 56 million years and dioramas showing dinosaurs from the Mesozoic Era are significant works of one of the most influential paleoartists in history. Simultaneously epic in size and scope and minutely detailed, they also provide a window into the study and interpretation of vertebrate paleontology and paleoecology. *Visions of Lost Worlds* presents these unparalleled works of art, and also includes the sketches and drawings Matternes prepared as he planned the murals. Known for his technical genius and eye for detail, Matternes sketched from skeletons in museum collections and added muscle, skin, and fur to bring mammals and dinosaurs from prehistory to vivid life. This book offers a close look at these works of art, a peek inside the artist's process, and an examination of the works' impact and legacy.

### A Story of the Future

*Penguin UK* \*\*SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER\*\* 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live-the planet no longer nurturing a dream of abundance, but a living nightmare.

### The Death and Life of Great American Cities

*Random House* In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review

### African, American

## From Tarzan to Dreams from My Father Africa in the US Imagination

*Zed Books Ltd.* Africa has long gripped the American imagination. From the Edenic wilderness of Edgar Rice Burroughs's Tarzan novels to the 'black Zion' of Garvey's Back-to-Africa movement, all manner of Americans - whether white or black, male or female - have come to see Africa as an idealized stage on which they can fashion new, more authentic selves. In this remarkable, panoramic work, David Peterson del Mar explores the ways in which American fantasies of Africa have evolved over time, as well as the role of Africans themselves in subverting American attitudes to their continent. Spanning seven decades, from the post-war period to the present day, and encompassing sources ranging from literature, film and music to accounts by missionaries, aid workers and travel writers, *African, American* is a fascinating deconstruction of 'Africa' as it exists in the American mindset.

### The Tragedy of Titus Andronicus

*Lulu.com* Turmoil hits the Roman Empire when its current emperor dies and his two sons Saturninus and Bassianus start to fight over the throne. As a matter of the dead emperor's apparent wishes, his brother Titus is offered the throne but he refuses and lets Saturninus take the coveted seat. After coming to power, the new emperor desires his brothers betrothed as his wife and Titus agrees but ends up killing one of his own children when disagreements occur as to who is in the right. The sons of Titus then plot to rape their own sister so that such a thing will not happen and Titus, her father, will be forced to take the situation into his own hands but ends up going to further extremes.

## The Psychosocial Implications of Disney Movies

*MDPI* In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

### Harper's Weekly

## When Species Meet

*U of Minnesota Press* In 2006, about 69 million U.S. households had pets, giving homes to around 73.9 million dogs, 90.5 million cats, and 16.6 million birds, and spending more than 38 billion dollars on companion animals. As never before in history, our pets are truly members of the family. But the notion of "companion species"—knotted from human beings, animals and other organisms, landscapes, and technologies—includes much more than "companion animals." In *When Species Meet*, Donna J. Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters, especially with those called domestic. At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland, but Haraway's vision here also encompasses wolves, chickens, cats, baboons, sheep, microorganisms, and whales wearing video cameras. From designer pets to lab animals to trained therapy dogs, she deftly explores philosophical, cultural, and biological aspects of animal-human encounters. In this deeply personal yet intellectually groundbreaking work, Haraway develops the idea of companion species, those who meet and break bread together but not without some indigestion. "A great deal is at stake in such meetings," she writes, "and outcomes are not guaranteed. There is no assured happy or unhappy ending—socially, ecologically, or scientifically. There is only the chance for getting on together with some grace." Ultimately, she finds that respect, curiosity, and knowledge spring from animal-human associations and work powerfully against ideas about human exceptionalism.

### Marine Mammal Welfare

## Human Induced Change in the Marine Environment and its Impacts on Marine Mammal Welfare

*Springer* Marine mammals attract human interest - sometimes this interest is benign or positive - whale watching, conservation programmes for whales, seals, otters, and efforts to clear beaches of marine debris are seen as proactive steps to support these animals. However, there are many forces operating to affect adversely the lives of whales, seals, manatees, otters and polar bears - and this book explores how the welfare of marine mammals has been affected and how they have adapted, moved, responded and sometimes suffered as a result of the changing marine and human world around them. Marine mammal welfare addresses the welfare effects of marine debris, of human traffic in the oceans, of noise, of hunting, of whale watching and tourism, and of some of the less obvious impacts on marine mammals - on their social structures, on their behaviours and migration, and also of the effects on captivity for animals kept in zoos and aquaria. There is much to think and talk about - how marine mammals respond in a world dramatically influenced by man, how are their social structures affected and how is their welfare impacted?

## Planetary Health

### Human Health in an Era of Global Environmental Change

*CABI* Planetary Health - the idea that human health and the health of the environment are inextricably linked - encourages the preservation and sustainability of natural systems for the benefit of human health. Drawing from disciplines such as public health, environmental science, evolutionary anthropology, welfare economics, geography, policy and organizational theory, it addresses the challenges of the modern world, where human health and well-being is threatened by increasing pollution and climate change. A comprehensive publication covering key concepts in this emerging field, Planetary Health reviews ideas and approaches to the subject such as natural capital, ecological resilience, evolutionary biology, One Earth and transhumanism. It also sets out through case study chapters the main links between human health and environmental change. Providing an extensive overview of key theories and literature for academics and practitioners who are new to the field, this engaging and informative read also offers an important resource for students of a diverse range of subjects, including environmental sciences, animal sciences, geography and health.
