AGILE PRODUCT MANAGEMENT WITH SCRUM

CREATING PRODUCTS THAT CUSTOMERS LOVE (ADOBE READER)

Addison-Wesley Professional **The First Guide to Scrum-Based Agile Product Management In Agile Product Management with Scrum**, leading Scrum consultant Roman Pichler uses real-world examples to demonstrate how product owners can create successful products with Scrum. He describes a broad range of agile product management practices, including making agile product discovery work, taking advantage of emergent requirements, creating the minimal marketable product, leveraging early customer feedback, and working closely with the development team. Benefitting from Pichler's extensive experience, you'll learn how Scrum product ownership differs from traditional product management and how to avoid and overcome the common challenges that Scrum product owners face. Coverage includes Understanding the product owner's role: what product owners do, how they do it, and the surprising implications Envisioning the product: creating a compelling product vision to galvanize and guide the team and stakeholders Grooming the product backlog: managing the product backlog effectively even for the most complex products Planning the release: bringing clarity to scheduling, budgeting, and functionality decisions Collaborating in sprint meetings: understanding the product owner's role in sprint meetings, including the dos and don'ts Transitioning into product ownership: succeeding as a product owner and establishing the role in the enterprise This book is an indispensable resource for anyone who works as a product owner, or expects to do so, as well as executives and coaches interested in establishing agile product management.

CONDUCTING NETWORK PENETRATION AND ESPIONAGE IN A GLOBAL ENVIRONMENT

CRC Press When it's all said and done, penetration testing remains the most effective way to identify security vulnerabilities in computer networks. Conducting Network Penetration and Espionage in a Global Environment provides

detailed guidance on how to perform effective penetration testing of computer networks—using free, open source, and commercially available tools, including Backtrack, Metasploit, Wireshark, Nmap, Netcat, and Nessus. It also considers exploits and other programs using Python, PERL, BASH, PHP, Ruby, and Windows PowerShell. The book taps into Bruce Middleton’s decades of experience with computer security, including penetration testing of military networks, the White House, utilities, manufacturing facilities, CIA headquarters, the Defense Information Systems Agency, and NASA. Mr. Middleton begins with a chapter on defensive measures/privacy issues and then moves on to describe a cyber-attack on one of his labs and how he responded to the attack. Next, the book explains how to research a target without directly "touching" that target. Once you’ve learned all you can, the text describes how to gather even more information using a more direct approach. From there, it covers mathematical analysis, considers target exploitation, and discusses Chinese and Syrian cyber-attacks. Providing authoritative guidance on cyberforensics, reverse engineering, and penetration testing, the book categorizes testing tools according to their use within the standard penetration testing framework. For each of the above-mentioned categories, you will find basic and advanced tools and procedures to help you identify security vulnerabilities in today’s networks. After reading this book, you will understand how to perform an organized and efficient penetration test. You will also learn techniques used to bypass anti-virus software and capture keystrokes of remote systems. Explaining how to put together your own penetration testing lab, the text concludes by describing how to utilize various iPhone apps to perform reconnaissance activities on wireless networks.

PRECISION DIMENSIONAL MEASUREMENTS

MDPI This collection represents successful invited submissions from the papers presented at the 8th Annual Conference of Energy Economics and Management held in Beijing, China, 22-24 September 2017. With over 500 participants, the conference was co-hosted by the Management Science Department of National Natural Science Foundation of China, the Chinese Society of Energy Economics and Management, and Renmin University of China on the subject area of “Energy Transition of China: Opportunities and Challenges”. The major strategies to transform the energy system of China to a sustainable model include energy/economic structure adjustment, resource conservation, and technology innovation. Accordingly, the conference and its associated publications encourage research to address the major issues faced in supporting the energy transition of China. Papers published in this collection cover the broad spectrum of energy economics issues, including building energy efficiency, industrial energy demand, public policies to promote new energy technologies, power system control technology, emission reduction policies in energy-intensive industries,

emission measurements of cities, energy price movement, and the impact of new energy vehicle.

TULSA, 1921

REPORTING A MASSACRE

University of Oklahoma Press In 1921 Tulsa's Greenwood District, known then as the nation's "Black Wall Street," was one of the most prosperous African American communities in the United States. But on May 31 of that year, a white mob,

inflamed by rumors that a young black man had attempted to rape a white teenage girl, invaded Greenwood. By the end of the following day, thousands of homes and businesses lay in ashes, and perhaps as many as three hundred people were dead. *Tulsa, 1921* shines new light into the shadows that have long been cast over this extraordinary instance of racial violence. With the clarity and descriptive power of a veteran journalist, author Randy Krehbiel digs deep into the events and their aftermath and investigates decades-old questions about the local culture at the root of what one writer has called a white-led pogrom. Krehbiel analyzes local newspaper accounts in an unprecedented effort to gain insight into the minds of contemporary Tulsans. In the process he considers how the *Tulsa World*, the *Tulsa Tribune*, and other publications contributed to the circumstances that led to the disaster and helped solidify enduring white justifications for it. Some historians have dismissed local newspapers as too biased to be of value for an honest account, but by contextualizing their reports, Krehbiel renders *Tulsa's* papers an invaluable resource, highlighting the influence of news media on our actions in the present and our memories of the past. The Tulsa Massacre was a result of racial animosity and mistrust within a culture of political and economic corruption. In its wake, black Tulsans were denied redress and even the right to rebuild on their own property, yet they ultimately prevailed and even prospered despite systemic racism and the rise during the 1920s of the second Ku Klux Klan. As Krehbiel considers the context and consequences of the violence and devastation, he asks, Has the city—indeed, the nation—exorcised the prejudices that led to this tragedy?

SOFTWARE ARCHITECTURE 2

John Wiley & Sons Over the past 20 years, software architectures have significantly contributed to the development of complex and distributed systems. Nowadays, it is recognized that one of the critical problems in the design and development of any complex software system is its architecture, i.e. the organization of its architectural elements.

Software Architecture presents the software architecture paradigms based on objects, components, services and models, as well as the various architectural techniques and methods, the analysis of architectural qualities, models of representation of architectural templates and styles, their formalization, validation and testing and finally the engineering approach in which these consistent and autonomous elements can be tackled.

THE GRACE WALK EXPERIENCE

ENJOYING LIFE THE WAY GOD INTENDS

Harvest House Publishers For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

GENDER, RHETORIC, AND PRINT CULTURE IN FRENCH RENAISSANCE WRITING

Cambridge University Press In this book Floyd Gray explores how the treatment of controversial subjects in French Renaissance writing was affected both by rhetorical conventions and by the commercial requirements of an expanding publishing industry. Focusing on a wide range of discourses on gender issues - misogynist, feminist, autobiographical, homosexual and medical - Gray reveals the extent to which these marginalized texts reflect literary concerns rather

than social reality. He then moves from a close analysis of the rhetorical factor in the Querelle des femmes to consider ways in which writing, as a textual phenomenon, inscribes its own, sometimes ambiguous, meaning. Gray offers richly detailed readings of writing by Rabelais, Jean Flore, Montaigne, Louise Labé, Pernette du Guillet and Marie de Gournay among others, challenging the inherent anachronism of those forms of criticism that fail to take account of the rhetorical and cultural conditions of the period.

TELEHEALTH IN THE DEVELOPING WORLD

IDRC **Health care is primarily about people-to-people interactions. It is about understanding, diagnosis, physical contact, communication, and, ultimately, providing care. By bringing people together, telecommunication technologies have the potential to improve both the quality of and access to health care in the remotest areas of the developing world. Telemedicine offers solutions for emergency medical assistance, long-distance consultation, administration and logistics, supervision and quality assurance, and education and training for healthcare professionals and providers. This book aims to redress the relative lack of published information on successful telehealth solutions in the developing world. It presents real-life stories from Asia, Africa, and Latin America. It is rich in practical experience and will be of interest to health professionals, development workers, and e-health and telehealth proponents interested in learning about, or contributing to the implementation of, appropriate solutions for 80% of the world's population.**

THE CLIMATE OF DARKNESS

SLAVE STEALERS

TRUE ACCOUNTS OF SLAVE RESCUES: THEN AND NOW

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual

advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
