INTRODUCTION TO RADAR USING PYTHON AND MATLAB

Artech House This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

RADAR INSTRUCTION MANUAL

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. HONEYBALL & BOWERS' TEXTBOOK ON EMPLOYMENT LAW

Oxford University Press Honeyball and Bowers' Textbook on Employment Law is an approach to employment law with strong critical analysis whilst placing it in its wider contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essay preparation and research. Setting employment law in context, this book considers both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

JANEY THE VET

SAVING SRI LANKA'S STREET DOGS

Michael O'Mara Books 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey

and her team and saved.

Major topics are treated separately so that students can easily grasp key concepts and ideas.

THE LITTLE TYPER

MIT Press An introduction to dependent types, demonstrating the most beautiful aspects, one step at a time. A program's type describes its behavior. Dependent types are a first-class part of a language, and are much more powerful than other kinds of types; using just one language for types and programs allows program descriptions to be as powerful as the programs they describe. The Little Typer explains dependent types, beginning with a very small language that looks very much like Scheme and extending it to cover both programming with dependent types and using dependent types for mathematical reasoning. Readers should be familiar with the basics of a Lisp-like programming language, as presented in the first four chapters of The Little Schemer. The first five chapters of The Little Typer provide the needed tools to understand dependent types; the remaining chapters use these tools to build a bridge between mathematics and programming. Readers will learn that tools they know from programming—pairs, lists, functions, and recursion—can also capture patterns of reasoning. The Little Typer does not attempt to teach either practical programming skills or a fully rigorous approach to types. Instead, it demonstrates the most beautiful aspects as simply as possible, one step at a time.

THE SHAPE OF SOLA SCRIPTURA

Canon Press & Book Service In what shape do we find the doctrine of sola Scriptura today? Many modern Evangelicals see it as a license to ignore history and the creeds in favor of a more splintered approach to the Christian living. In the past two decades, Roman Catholic and Eastern Orthodox apologists have strongly tried to undermine sola Scriptura as unbiblical, unhistorical, and impractical. But these groups rest their cases on a recent, false take on sola Scriptura. The ancient, medieval, and classical Protestant view of sola Scriptura actually has a quite different shape than most opponents and defenders maintain. Therein lies the goal of this book-an intriguing defense of the ancient (and classical Protestant) doctrine of sola Scriptura against the claims of Rome, the East, and modern Evangelicalism. "The issue of sola Scriptura is not an abstract problem relevant only to the sixteenth-century Reformation, but one that poses increasingly more serious consequences for contemporary Christianity. This work by Keith Mathison is the finest and most comprehensive treatment of the matter I've seen. I highly recommend it to all who embrace the authority of sacred Scripture." -R.C. Sproul, Ligonier Ministries
