### The Musical from the Inside Out

*Ivan R. Dee Rarely is a book about the theatre as entertaining and informative as Stephen Citron's new guidebook to the creation of the musical. Filled with anecdotes, practical advice, and sparkling comments from the biggest Broadway insiders, The Musical from the Inside Out examines this major theatrical form from the creator's point of view. Mr. Citron takes the reader through basic training and onto finding and securing material, writing the libretto, adding the songs, auditioning the players, workshopping, rehearsals, previews, and the excitement of opening night. He reveals the secrets of*

success as well as some of the common pitfalls of failure. "There's never been a book like this," wrote a columnist from London's West End. Mr. Citron's bounty of information comes from his own vast experience; from interviews with well-known directors, producers, lyricists, composers, librettists, stage managers, and scenic artists; and from such luminaries as Stephen Sondheim, Andrew Lloyd Webber, Jerry Herman, Hal Prince, Jerome Robbins, Jerry Bock, Sheldon Harnick, John Kander, and Fred Ebb. *The Musical From the Inside Out* is an adventure for musical fans and required reading for professionals or amateurs involved in creating a musical.

## The Book of L

Springer Science & Business Media This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

## 308 Circuits

*Elektor International Media This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.*

## Slave Stealers

### True Accounts of Slave Rescues: Then and Now

*Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.*

### The Teenage Guide to Stress

*Nicola Morgan is something of an authority on the teenage brain and is often invited to schools and colleges to speak on the subject. She came up with the idea of 'The Teenage Guide to Stress' because so many parents and teenagers contacted her for advice and help. The book is divided into three sections: Section one explains what stress is and looks at the ways teenage stress is different. Section two deals with a number of issues that affect teenagers - from anger, depression and sexual relationships to cyber-bullying, exams and eating disorders - and offers guidance and advice, as well as looking at how pre-existing conditions such as OCD and dyslexia are affected by adolescence. Section three is concerned with how to deal with and prevent the symptoms of stress, as well as healthy ways of looking after your mind and body.*

### The Winning Way

*By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going and to advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin. Helen Row*
