The Right to Sex

Shortlisted for the Orwell Prize 2022

Bloomsbury Publishing A SUNDAY TIMES BESTSELLER BLACKWELL'S BOOK OF THE YEAR 2021 SHORTLISTED FOR THE ORWELL PRIZE 2022 Essential lessons on the world we live in, from one of our greatest young thinkers - a guide to what everybody is talking about today 'Unparalleled and extraordinary . . . A bracing revivification of a crucial lineage in feminist writing' JIA TOLENTINO 'I believe Amia Srinivasan's work will change the world' KATHERINE RUNDELL 'Rigorously researched, but written with such spark and verve. The best non-fiction book I have read this year' PANDORA SYKES ----- How should we talk about sex? It is a thing we have and also a thing we do; a supposedly private act laden with public meaning; a personal preference shaped by outside forces; a place where pleasure and ethics can pull wildly apart. Since #MeToo many have fixed on consent as the key framework for achieving sexual justice. Yet consent is a blunt tool. To grasp sex in all its complexity - its deep ambivalences, its relationship to gender, class, race and power - we need to move beyond 'yes and no', wanted and unwanted. We need to interrogate the fraught relationships between discrimination and preference, pornography and freedom, rape and racial injustice, punishment and accountability, pleasure and power, capitalism and liberation. We need to rethink sex as a political phenomenon. Searching, trenchant and extraordinarily original, The Right to Sex is a landmark examination of the politics and ethics of sex in this world, animated by the hope of a different one.

Curried Cultures

Globalization, Food, and South Asia

Univ of California Press Although South Asian cookery and gastronomy has transformed contemporary urban foodscape all over the world, social scientists have paid scant attention to this phenomenon. **Curried Cultures**-a wide-ranging collection of essays-explores the relationship between globalization and South Asia through food, covering the cuisine of the colonial period to the contemporary era, investigating its material and symbolic meanings. **Curried Cultures** challenges disciplinary boundaries in considering South Asian gastronomy by assuming a proximity to dishes and diets that is often missing when food is a lens to investigate other topics. The book's established scholarly contributors examine food to comment on a range of cultural activities as they argue that the practice of cooking and eating matter as an important way of knowing the world and acting on it.

The Plague Year

America in the Time of Covid

Penguin UK 'A virtuoso feat ... a book of panoramic breadth' New York Times Book Review 'A devastating analysis ... Wright is a master of knitting together complex narratives' The Observer Just as Lawrence Wright's *The Looming Tower* became the defining account of our century's first devastating event, 9/11, so *The Plague Year* will become the defining account of the second. The story starts with the initial moments of Covid's appearance in Wuhan and ends with Joseph Biden's inauguration in an America ravaged by well over 400,000 deaths - a mortality already some ten times worse than US combat deaths in the entire Vietnam War. This is an anguished, furious memorial to a year in which all of America's great strengths - its scientific knowledge, its great civic and intellectual institutions, its spirit of voluntarism and community - were brought low, not by a terrifying new illness alone, but by political incompetence and cynicism on a scale for which there has been no precedent. With insight, sympathy, clarity and rage, *The Plague Year* allows the reader to see the unfolding of this great tragedy, talking with individuals on the front line, bringing together many

moving and surprising stories and painting a devastating picture of a country literally and fatally misled. 'Maddening and sobering - as comprehensive an account of the first year of the pandemic as we've yet seen' Kirkus

The Shock Doctrine

The Rise of Disaster Capitalism

Penguin UK 'Impassioned, hugely informative, wonderfully controversial, and scary as hell' John le Carré Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors.

Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed. 'Packed with thinking dynamite ... a book to be read everywhere' John Berger 'If you only read one non-fiction book this year, make it this one' Metro Books of the Year 'There are a few books that really help us understand the present. The Shock Doctrine is one of those books' John Gray, Guardian 'A brilliant book written with a perfectly distilled anger, channelled through hard fact. She has indeed surpassed No Logo' Independent

Vogue Model

The Faces of Fashion

Little Brown GBR Throughout history, fashion models have occupied a curious position: while their faces were instantly familiar, virtually nothing else was known about them. But their impression upon Vogue's readership has always been considerable -- they reflect and represent the ever-changing ideal of beauty. It was models such as Barbara Goalen and Fiona-Campbell Walter in Britain and Lisa Fonssagrives and Dorien Leigh in the US, in the 1950s, who were the first to become household names and to achieve the glamour and prestige that came with world fame. The supermodels of the 1990s turned the profession into a billion-dollar industry, and today models like Kate Moss, Claudia Schiffer and Gisele Bundchen are brand names. Our fascination with these sublime creatures never seems to wane. Shining a light on these women's lives, Vogue Model uses photographs and illustrations from more than ninety years of Vogue's history to tell the fascinating story of the real faces of fashion.

Behavioral Finance: The Second Generation

CFA Institute Research Foundation Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Questionnaire Design, Interviewing and Attitude Measurement

Bloomsbury Publishing This second edition of Dr Bram Oppenheim's established work, like the first, is a practical teaching text of survey methods. The new edition has extended its scope to include interviewing (both clip-board and depth interviewing), sampling and research design, data analysis, and a special chapter on pilot work. As before, the chapters on questionnaire design are supported by further chapters on attitude scaling methods, and on projective techniques. There is refreshingly critical treatment of problems such as faulty research designs, errors in sampling, ambiguities in question wording, biases in interviewing, losses of information, and the interpretation of attitude scales and of projective data. The book is laced throughout with instructive examples from many fields, ranging from marketing surveys to the study of children's political perceptions. Problems of reliability and validity are kept to the fore. Above all, the need for pilot work is emphasized at every stage. The book is intended for graduate methodology courses in the social sciences, but it is also designed to reach other professionals, including teachers, social workers,

medical researchers, and opinion pollsters, who have to evaluate or carry out social surveys.

Social Media in Trinidad

Values and Visibility

UCL Press Drawing on 15 months of ethnographic research in one of the most under-developed regions in the Caribbean island of Trinidad, this book describes the uses and consequences of social media for its residents. Jolynna Sinanan argues that this semi-urban town is a place in-between: somewhere city dwellers look down on and villagers look up to. The complex identity of the town is expressed through uses of social media, with significant results for understanding social media more generally. Not elevating oneself above others is one of the core values of the town, and social media becomes a tool for social visibility; that is, the process of how social norms come to be and how they are negotiated. Carnival logic and high-impact visuality is pervasive in uses of social media, even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways. The study also has surprising results in how residents are explicitly non-activist and align themselves with everyday values of maintaining good relationships in a small town, rather than espousing more worldly or cosmopolitan values.

Albion's Seed

Four British Folkways in America

Oxford University Press This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
