ECONOMIC AND PHILOSOPHIC MANUSCRIPTS OF 1844

Courier Corporation **This predecessor to the Communist Manifesto offers a historical analysis of the human condition. Combining elements of psychology, sociology, and anthropology, it forms an accessible introduction to Marxist theory.**

THE ECONOMIC AND PHILOSOPHIC MANUSCRIPTS OF 1844 AND THE COMMUNIST MANIFESTO

Prometheus Books **Communism as a political movement attained global importance after the Bolsheviks toppled the Russian Czar in 1917. After that time the works of Karl Marx and Frederick Engels, especially the influential Communist Manifesto (1848), enjoyed an international audience. The world was to learn a new political vocabulary peppered with "socialism," "capitalism," "the working class," "the bourgeoisie," "labor theory of value," "alienation," "economic determinism," "dialectical materialism," and "historical materialism." Marx's economic analysis of history has been a powerful legacy, the effects of which continue to be felt world-wide. Serving as the foundation for Marx's indictment of capitalism is his extraordinary work titled Economic and Philosophic Manuscripts, written in 1844 but published nearly a century later. Here Marx offers his theory of human nature and an analysis of emerging capitalism's degenerative impact on man's sense of self and his creative potential.**

What is man's true nature? How did capitalism gain such a foothold on Western society? What is alienation and how does it threaten to undermine the proletariat? These and other vital questions are addressed as the youthful Marx sets forth his first detailed assessment of the human condition.

THE POLITICS OF THE BOOK

A STUDY ON THE MATERIALITY OF IDEAS

Penn State Press It is impossible to separate the content of a book from its form. In this study, Filipe Carreira da Silva and Mónica Brito Vieira expand our understanding of the history of social and political scholarship by examining how the entirety of a book mediates and constitutes meaning in ways that affect its substance, appropriation, and reception over time. Examining the evolving form of classic works of social and political thought, including W. E. B. Du Bois's *The Souls of Black Folk*, G. H. Mead's *Mind, Self, and Society*, and Karl Marx's *1844 Economic and Philosophic Manuscripts*, Carreira da Silva and Brito Vieira show that making these books involved many hands. They explore what publishers, editors, translators, and commentators accomplish by offering the reading public new versions of the works under consideration, examine debates about the intended meaning of the works and discussions over their present relevance, and elucidate the various ways in which content and material form are interwoven. In doing so, Carreira da Silva and Brito Vieira characterize the editorial process as a meaning-producing action involving both collaboration and an ongoing battle for the importance of the book form to a work's disciplinary belonging, ideological positioning, and political significance. Theoretically sophisticated and thoroughly researched, *The Politics of the Book* radically changes our understanding of what doing social and political theory—and its history—implies. It will be welcomed by scholars of book history, the history of social and political

thought, and social and political theory.

CRITIQUE OF HEGEL'S 'PHILOSOPHY OF RIGHT'

Cambridge University Press This book is a complete translation of Marx's critical commentary on paragraphs 261-313 of Hegel's major work in political theory. In this text Marx subjects Hegel's doctrine on the internal constitution of the state to a lengthy analysis. It was Marx's first attempt to expose and criticize Hegel's philosophy in general and his political philosophy in particular. It also represents his early efforts to criticize existing political institutions and to clarify the relations between the political and economic aspects of society. The Critique provides textual evidence in support of the argument that Marx's early writings do not exhibit radically different doctrinal principles and theoretical and practical concerns from his later work. This edition also includes a translation of the introduction Marx wrote for his proposed revised version of the Critique which he never completed. In a substantial introduction, Professor O'Malley provides valuable information on Marx's intellectual development.

THE ECONOMY OF THE WORD

LANGUAGE, HISTORY, AND ECONOMICS

Oxford Studies in History of E Keith Tribe elaborates an explicitly philological approach to the history of economic thought. Beginning with an account of the transformation in the concept of 'economy' from antiquity to modernity, he presents readings of the writings of Adam Smith, Karl Marx, and Léon Walras which seek to demonstrate what can be achieved by an attention to the construction of text, concept, and number.

PHILOSOPHY OF JUSTICE

Springer This book presents surveys of significant trends in contemporary philosophy. Contributing authors explore themes relating to justice including natural rights, equality, freedom, democracy, morality and cultural traditions. Key movements and thinkers are considered, ranging

from ancient Greek philosophy, Roman and Christian traditions to the development of Muslim law, Enlightenment perspectives and beyond. Authors discuss important works, including those of Aristotle, Ibn Khaldun, John Locke, Immanuel Kant and Mary Wollstonecraft. Readers are also invited to examine Hegel and the foundation of right, Karl Marx as a utopian socialist and the works of Paul Ricœur, amongst the wealth of perspectives presented in this book. Through these chapters, readers are able to explore the relationship of the state to justice and consider the rights of the individual and the role of law. Contributions presented here discuss concepts including Sharia law, freedom in the community and Libertarian Anarchism. The surveys presented here show different approaches and a variety of interpretations. Each contribution has its own bibliography.

THE POVERTY OF PHILOSOPHY

Book Jungle The founder of Communism was Karl Heinrich Marx (1818 -1883). Marx was a German philosopher, political economist, historian, sociologist, humanist, political theorist and revolutionary. The Communist Manifesto (1848) was his most important work. Marx said, "Just as capitalism replaced feudalism, socialism will in its turn replace capitalism and lead to a stateless, classless society which will emerge after a transitional period, the 'dictatorship of the proletariat.'" The Poverty of Philosophy discusses the distribution of economic wealth. Marx has a plan to produce a more democratic distribution of the wealth.

A CONTRIBUTION TO THE CRITIQUE OF POLITICAL ECONOMY

TIMON OF ATHENS

Simon and Schuster The real Timon of Athens lived there in the fifth century BCE, making him a contemporary of Socrates and Pericles. Shakespeare presents Timon as a figure who suffers such profound disillusionment that he becomes a misanthrope, or man-hater. This makes him a more interesting character than the caricature he had become to Shakespeare's contemporaries, for whom "Timonist" was a slang term for an unsociable man. Shakespeare's play includes the wealthy, magnificent, and extravagantly generous figure of Timon before his transformation. Timon expects that, having received as gifts all that he owned, his friends will be equally generous to him. Once his creditors clamor for repayment, Timon finds that his idealization of friendship is an illusion. He repudiates his friends, abandons Athens, and retreats to the woods. Yet his misanthropy arises from the destruction of an admirable illusion, from which his subsequent hatred can never be entirely disentangled. The authoritative edition of Timon of Athens from The Folger Shakespeare Library, the

trusted and widely used Shakespeare series for students and general readers, includes: -The exact text of the printed book for easy cross-reference -Hundreds of hypertext links for instant navigation -Freshly edited text based on the best early printed version of the play -Full explanatory notes conveniently placed on pages facing the text of the play -Scene-by-scene plot summaries -A key to the play's famous lines and phrases -An introduction to reading Shakespeare's language -An essay by a leading Shakespeare scholar providing a modern perspective on the play - Fresh images from the Folger Shakespeare Library's vast holdings of rare books -An annotated guide to further reading Essay by Coppélia Kahn The Folger Shakespeare Library in Washington, DC, is home to the world's largest collection of Shakespeare's printed works, and a magnet for Shakespeare scholars from around the globe. COLLECTED WORKS

THE LOGIC OF MARX'S CAPITAL

REPLIES TO HEGELIAN CRITICISMS

SUNY Press Beginning with "value" and "commodity" at the start of Volume I in Marx's major work, and progressing step-by-step to the end of Volume III, Smith establishes in detail that Capital is a systematic theory of socio-economic categories ordered according to dialectical logic. At each stage in his analysis of the theory Smith makes Marx's arguments more accessible. He also considers in depth the objections to Marx's employment of dialectical logic that have been formulated by Hegelians (especially those presented in Klaus Hartmann's *Die Marxsche Theorie*). Smith presents a persuasive case against this whole range of Marx criticisms, many of which have also been proposed from non-Hegelian standpoints.

A SECULAR ABSOLUTE

HOW MODERN PHILOSOPHY DISCOVERED AUTHENTICITY

Springer Nature **Premodern societies** believed in something sacred that obliged unconditionally. Modern societies rely on fallible science. Do they also need something absolute, a secular sacred? Steinvoth analyzes the writings of modern philosophers who claim that there is an absolute norm: the norm to be rational and authentic. In his view, their claim is true if it is reinterpreted. The norm is not moral, as it was thought to be, but metaphysical, and authenticity is not self-realization, but doing things for their own sake. In discussing the pros and cons of philosophical claims on absolutes, this book spreads out the rich pool of philosophical ideas and clarifies urgent contemporary questions about what can be demanded with universal validity. It argues this is not only the principle of justice, not to harm, but also a metaphysical principle by which to find meaning in life. Moreover, it points to some consequences this principle has in politics.

‘CAPITAL’ IN THE EAST

REFLECTIONS ON MARX

Springer Nature This book pursues a Marxist approach with an emphasis on class to reflect on Marx’s *Capital* in the context of the East. It critically reassesses some of the familiar concepts in *Capital* and teases out issues that are at its periphery. In various essays, it explores this borderland to promote new concepts and modes of analysing Marx’s treatise in the twenty-first century. Accordingly, it represents an advance in Marxian

theory and politics. Examining Marx's *Capital* from the perspective and location of the East, the book focuses on many issues that are at the 'borders' of *Capital*, which is concerned principally on unpacking developed capitalism. New concepts are introduced and set in relation to those championed by Marx in order to advance our understanding of economy, capitalism, development and politics. In this regard, the book offers a reading of *Capital* that is distinct from conventional reflections on it in the Western world. The scope is vast, covering much of the territory in Marx's *Capital*, as well as addressing a few new issues connected to *Capital*. The content is divided into the following sections: Reception of *Capital* in the East; Value, Commodity, Surplus Value and Capitalism; Population and Rent in *Capital*; and Issues Beyond *Capital*.

NIGERIA'S RESOURCE WARS

Vernon Press 'Nigeria's Resource Wars' reflects on the diversity of conflicts over access to, and allocation of, resources in Nigeria. From the devastating effects of crude oil exploration in the Niger Delta to desertification caused by climate change, and illegal gold mining in Zamfara, to mention a few, Nigeria faces new dimensions of resource-related struggles. The ravaging effects of these resource conflicts between crop farmers and Fulani herders in Nigeria's Middlebelt and states across Southern Nigeria call for urgent scholarly interventions; with the Fulani cattle breeders' onslaught altering the histories of many Nigerian families through deaths, loss of homes and investments, and permanent physical incapacity. Currently, there is an almost total breakdown of interethnic relations, with political commentators acknowledging that Nigeria has never been so divided as it presently is in its history. The struggles have now degenerated into kidnaps, armed robbery, and incessant targeted and random killings across the country; compounding the already complex problem of insecurity in Nigeria. The chapters in this volume engage with these issues, presenting the different arguments on resource conflicts in Nigeria. They draw insights from similar conflicts in Nigeria's colonial/post-independence past and events from around the world to proffer possible solutions to resource-related confrontations in Africa. By offering a collection of different intellectual perspectives on resource conflicts in Nigeria, this volume will be an important reference material for understanding the diversity of thought patterns that underpin the struggle and policy approaches towards resolving conflict situations in Africa. This volume will be of considerable interest to scholars of Africa, researchers in the humanities, social sciences, and conflict studies, and policymakers interested in understanding the resource crisis in Africa.

EDUCATION AND TECHNOLOGICAL UNEMPLOYMENT

Springer This book examines the challenge of accelerating automation, and argues that countering and adapting to this challenge requires new

methodological, philosophical, scientific, sociological, economic, ethical, and political perspectives that fundamentally rethink the categories of work and education. What is required is political will and social vision to respond to the question: What is the role of education in a digital age characterized by potential mass technological unemployment? Today's technologies are beginning to cost more jobs than they create - and this trend will continue. There have been many proposed solutions to this problem, and they invariably involve an educational vision. Yet, in a world that simply doesn't offer enough work for everyone, education is clearly not a panacea for technological unemployment. This collection presents responses to this question from a wide spectrum of disciplines, including but not limited to education studies, philosophy, history, politics, sociology, psychology, and economics.

CORPORATE CAPITALISM'S USE OF OPENNESS

PROFIT FOR FREE?

Springer Nature **"Matching the rigour of the analysis with an extraordinary pedagogical capacity, the authors unveil all the arcana of the 'openness' capitalism model and digital labour. Essential for scholars and students across the social and economic sciences." (Carlo Vercellone, Université de Paris 8, France) "This vital book is an objective and detailed assessment of the private capture of common value, concluding with an in-depth survey of what commons-friendly public authorities could do to defend the new 'common-wealth'." (Michel Bauwens, Founder of the P2P Foundation, The Netherlands) "An outstanding analysis of how digital capital uses openness as principle of capital accumulation and exploitation. A must-read for everyone who wants to understand what the internet and digital media are all about." (Christian Fuchs, University of Westminster, UK) This book tackles the concept of openness (as in open source software, open access and free culture), from a critical political economy perspective to consider its encroachment by capitalist corporations, but also how it advances radical alternatives to cognitive capitalism. Drawing on four case studies, Corporate Capitalism's Use of Openness will add to discussion on open source software, open access content platforms, open access publishing, and open university courses. These otherwise disparate cases share two fundamental features: informational capitalist corporations base their successful business models on unpaid productive activities, play, attention, knowledge and labour, and do so crucially by resorting to ideological uses of concepts such as "openness", "communities" and "sharing". The**

authors present potential solutions and alternative regulations to counter these exploitative and alienating business models, and to foster digital knowledge commons, ranging from co-ops and commons-based peer production to state agencies' platforms. Their research and findings will appeal to students, academics and activists around the world in fields such as sociology, economy, media and communication, library and information science, political sciences and technology studies.
