INNOVATIVE SOLUTIONS FOR SUSTAINABLE SUPPLY CHAINS

Springer **This book presents the latest tools, techniques, and solutions that decision makers use to overcome the challenges faced by their sustainable supply chains. Given the ever increasing significance of socio-economic and environmental factors, the management of sustainable supply chains has become a complex and dynamic task. Multiple and conflicting objectives of stakeholders including suppliers, manufacturers, service providers, and retailers add to the complexity of decisions that modern day managers of supply chains face. With the unprecedented technological developments and innovations at hand, sustainability can be maximized for all the activities of a supply chain including: service concept and product design, material sourcing and procurement, manufacturing processes, delivery of the final product, and end-of-life management of the product. Consequently, the sustainable supply chains' problems require a systematic and integrated approach. Modeling and simulation, in general, as well as system dynamics and agent-based modeling, in particular, have the capabilities to deal with the complexity of sustainable supply chain related problems. This book will appeal to professionals and researchers in the field.**

DIGITAL SOLUTIONS FOR CONTEMPORARY DEMOCRACY AND GOVERNMENT

IGI Global **The dot-com revolution has brought many advances before unimagined. Of them all, it may be said that none have surpassed e-government in attracting a significant number of researchers and practitioners from around the world. However, the question remains**

whether everyone is ready to join the e-government movement, or if some are just blindly following the latest trend. **Digital Solutions for Contemporary Democracy and Government** touches on several key issues and challenges surrounding the recent e-government boom and offers practical solutions from those who have been a part of implementing e-government programs internationally. Due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics, democracy, and government, this authoritative book is a valuable reference source for professionals, researchers, and students in the field of e-government, information management, or knowledge management.

INNOVATIVE SOLUTIONS FOR BUILDING COMMUNITY IN ACADEMIC LIBRARIES

IGI Global The library has always been an essential part of the collegiate experience, providing students with access to knowledge and literature. However, as virtual services and online learning become more prominent within collegiate environments, the ways students conduct research and access resources has been altered. **Innovative Solutions for Building Community in Academic Libraries** examines new methods librarians use to engage both on-campus and online users in library services, taking into account the significant impacts of online learning on students' interaction with library resources. Focusing on various outreach practices, techniques of literacy instruction, and the utilization of library spaces, this research-supported book is a pivotal reference source for distance educators, program planners, academics, and library professionals interested in new ways to attract users to library services.

SMART CITIES AS A SOLUTION FOR REDUCING URBAN WASTE AND POLLUTION

IGI Global The exponential growth of urban settings has led to an increase in pollutants and waste management issues around the world. As the environment continues to falter under the weight of these pressing issues, it has become increasingly imperative to develop new technologies and methodologies that have the potential to improve the overall sustainability and cleanliness of these cities. *Smart Cities as a Solution for Reducing Urban Waste and Pollution* examines emergent research on smart innovations within built urban environments. Featuring best practices and theoretical frameworks, as well as potential issues in the implementation of smart and green technology in urban settings, this publication is a vital reference source for graduate students, researchers, academics, engineers, architects, facility managers, and government officials.

DESIGNING CLIMATE SOLUTIONS

A POLICY GUIDE FOR LOW-CARBON ENERGY

Island Press With the effects of climate change already upon us, the need to cut global greenhouse gas emissions is nothing less than urgent. It's a daunting challenge, but the technologies and strategies to meet it exist today. A small set of energy policies, designed and implemented well, can put us on the path to a low carbon future. Energy systems are large and complex, so energy policy must be focused and cost-effective. One-size-fits-all approaches simply won't get the job done. Policymakers need a clear, comprehensive resource that outlines the energy policies that will have the biggest impact on our climate future, and describes how to design these policies well. *Designing Climate Solutions: A Policy Guide for Low-*

Carbon Energy is the first such guide, bringing together the latest research and analysis around low carbon energy solutions. Written by Hal Harvey, CEO of the policy firm Energy Innovation, with Robbie Orvis and Jeffrey Rissman of Energy Innovation, *Designing Climate Solutions* is an accessible resource on lowering carbon emissions for policymakers, activists, philanthropists, and others in the climate and energy community. In Part I, the authors deliver a roadmap for understanding which countries, sectors, and sources produce the greatest amount of greenhouse gas emissions, and give readers the tools to select and design efficient policies for each of these sectors. In Part II, they break down each type of policy, from renewable portfolio standards to carbon pricing, offering key design principles and case studies where each policy has been implemented successfully. We don't need to wait for new technologies or strategies to create a low carbon future—and we can't afford to. *Designing Climate Solutions* gives professionals the tools they need to select, design, and implement the policies that can put us on the path to a livable climate future.

DECENTRALIZATION AND GOVERNANCE IN INDONESIA

Springer Indonesia over the past two decades has embarked on a process of decentralization as part of a broader process of democratization, which followed earlier periods of centralized governance and authoritarian rule across the archipelago. The purpose of this book is to begin to explore the connections between governance and sustainable society in a wide variety of policy fields in Indonesia, and how reforming governance structures may contribute to societal benefits and the creation of a long-term sustainable society. This book bridges important theoretical debates related to governance and sustainable society and provides empirical research from Indonesia in important policy areas related to this debate. By placing research in different policy areas in a single volume, the link to the broader concepts of governance, decentralization, and societal outcomes is strengthened. The book builds on the recent interest that has focused on Indonesia and the continued development of democracy in the country. The chapters in the book show a rich variety of decentralized governance arrangements and capacity building at the local level in particular. Central standards (for example for social sustainability, anti-corruption arrangements, or for dealing with direct foreign investment), combined with local innovation (for example for municipal coordination of primary health care or metropolitan transport), are key to Indonesia as a country in

a continuing process of transformation. We identify three key trends in the on-going process of decentralization and governance in Indonesia. First, we find that formal governance, the relation between the national and local government, is characterized by a system of 'variable geometry multi-level governance' depending on the policy area. The challenge ahead is strengthening accountability mechanisms to assure national standards while preserving and encouraging local innovation. Secondly, informal governance mechanisms are evolving to move from 'hierarchical to network' forms of governance. Here the challenge is to insure democratic input by citizens and civil society organizations. Finally, we identify a trend toward 'shared value creation and sustainable cooperation.' Indonesia is beginning to move from a rather singular policy focus on economic growth to a more complex and developing notion of policymaking for inclusive growth and the creation of a sustainable society for present and future generations. Here the challenge is sound implementation and to increase the effectiveness of governance mechanisms. There is also a noted diffusion of goals, to focus beyond the Jakarta metropolitan area to smaller regional cities, as urbanization continues and rural areas are changing. This book will be of interest for use in advanced undergraduate and graduate courses related to Southeast Asia in the fields of international relations, political science, public administration, economics, law, sociology, education, public health, and the spatial sciences. It will also be of interest to policymakers and government officials at the national and local level in Southeast Asia and middle-income developing countries, officials and policymakers in institutions of regional governance such as the Association of Southeast Asian Nations (ASEAN), and of global governance such as the United Nations and World Bank. It will also be of interest to civil society organizations and other actors focused on policy development and economic development, health, education, the environment, sustainable transport, etc. The book will also be of interest to business people interested in economic and governance issues, such as the management and governance of in-bound foreign investment, inclusive growth, and corporate governance. Finally, the book should be of interest to citizens in advanced, middle-income, and developing countries motivated to learn more about the links between governance and the creation of a sustainable society for current and future generations.

FINDING SOLUTIONS FOR PROTECTING AND SHARING ARCHAEOLOGICAL HERITAGE RESOURCES

Springer This volume provides case studies about successful strategies employed in diverse world areas for the protection of archaeological heritage resources. Some chapters focus on a search for solutions arrived at by diverse groups of people working in specific areas rather than simply describing loss of cultural heritage. Other chapters provide a long-term view of intensified efforts at protection of archaeological resources. The

authors describe challenges and solutions derived by concerned people in eastern Asia (China, Japan, Thailand), West Africa, Easter Island, Jordan, Honduras and more than one area of Peru. All of the authors draw upon deep, personal involvement with the protection of cultural heritage in each area. This volume is a timely addition to a growing number of conferences and publications about the management of cultural heritage—both archaeological and historical.

HANDBOOK ON EAST ASIAN ECONOMIC INTEGRATION

Edward Elgar Publishing This comprehensive Handbook provides an in-depth analysis of the nature of East Asian economic integration alongside thoughtful insights into contemporary issues, such as agricultural development, structural transformation and East Asian trade, alongside skills and human capital development policies of ASEAN. FORENSIC AND ETHICAL ISSUES IN MILITARY BEHAVIORAL HEALTH

Government Printing Office **NOTE: NO FURTHER DISCOUNT FOR THIS TITLE-OVERSTOCK SALE -Significantly reduced price** Dealing with ethical and forensic issues, this book is authored by active duty psychiatrists and psychologists from the Army, Navy, Air Force, as well as civilians from within and outside of the Department of Defense. Ethical issues will refer to areas in which basic principles are in play: autonomy, justice, beneficence, and nonmaleficence. Forensic issues will refer to the intersection of military mental health issues and the law. Chapter topics include training about forensic issues, a legal overview of confidentiality and reporting of military behavioral health records, sanitary board evaluations, updates on disability proceedings, forensic psychological testing, death investigations and psychological autopsies, epidemiological consultation team findings, mitigation of risk and means restriction, psychiatric assistance in capital cases, posttraumatic stress disorder, substance abuse, rape and sexual trauma, suicide, and violence. Emerging subjects covered include behavioral science consultation teams and mefoquine and neurotoxicity.

THE FUTURE OF LAW AND ETECHNOLOGIES

Springer This book presents groundbreaking discussions on e-residency, cryptocurrencies, scams, smart contracts, 3D printing, software agents, digital evidence and e-governance at the intersection of law, legal policies and modern technologies. The reader benefits from cutting-edge analyses that offer ideas and solutions to some of the most pressing issues caused by e-technologies. This collection is a useful tool for law and IT practitioners and an inspiring source for interdisciplinary research. Besides serving as a practical guideline, this book also reflects theoretical

dimensions of future perspectives, as new technologies are not meant to change common values but to accommodate them.

COMPETENCE-BASED INNOVATION IN HOSPITALITY AND TOURISM

Routledge Dr Pechlaner and Dr Innerhofer, the editors of *Competence-Based Innovation in Hospitality and Tourism*, argue that the industry operates within highly challenging and competitive environments. Changing environmental and market conditions continually force hotel businesses and service providers to offer their customers new and modified products and services, in order to remain competitive; those which respect value perceptions of markets and sustainable stakeholder reactions. This then raises the question of how innovations within this industry must be developed in order to achieve competitive differentiation. The book demonstrates that the development and analysis of successful innovation strategies should integrate the resource-based view and its advancements, the competence-based view, as well as the dynamic capabilities approach and the relational view. Resource-based strategic management approaches view the firm as a bundle of resources and competences. They point to the importance of firm-specific resources and competences in explaining variations in competitive positions and performance differentiation between companies. The challenge of hospitality and tourism is to develop resources and competences that drive innovations. This book will serve to advance the status quo of tourism research literature by combining innovation theories with network theories and tourism and destination development, by illustrating the development of cooperative competences and innovations in tourism and by showing, in a tailored way, how the challenge of the development of resources and competences that drive innovations in tourism can be managed.

ICCSM2014-PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON CLOUD SECURITY MANAGEMENT ICCSM-2014

ICCSM2014

Academic Conferences Limited These Proceedings are the work of researchers contributing to the 2nd International Conference on Cloud Security Management Security (ICCSM 2014), being held this year at the University of Reading, UK on the 23-24 October 2014, . The conference chair is Dr John McCarthy, Vice President, from the Cyber Security, ServiceTech, UK and the Programme Chair is Dr. Barbara Endicott-Popovsky, from the Center for Information Assurance and Cybersecurity, University of Washington, Seattle, USA. As organisations rush to adopt Cloud Computing at a rate faster than originally projected, it is safe to predict that, over the coming years, Cloud Computing will have major impacts, not only on the way we conduct science and research, but also on the quality of our daily human lives. Computation research, education, and business communities

have been exploring the potential benefits of Cloud Computing and the changes these imply. Experts have predicted that the move to the cloud will alter significantly the content of IT jobs, with cloud clients needing fewer hands-on skills and more skills that administer and manage information. Bill Gates was recently quoted: "How you gather, manage, and use information will determine whether you win or lose." Cloud Computing impacts will be broad and pervasive, applying to public and private institutions alike.

SUSTAINABLE HEALTH AND LONG-TERM CARE SOLUTIONS FOR AN AGING POPULATION

IGI Global Lasting healthcare for the entire population, specifically the elderly, has become a main priority in society. It is imperative to find ways to boost the longevity of healthcare services for all users. Sustainable Health and Long-Term Care Solutions for an Aging Population is a pivotal reference source featuring the latest scholarly research on issues pertinent to health cost and finding effective ways of financing healthcare for the elderly. Including coverage on a number of topics such as provider accreditation, corporate social responsibility, and data management, this book is ideally designed for policy makers, academicians, researchers, and advanced-level students seeking current research on the innovative planning and development of healthcare.

ENHANCING ENVIRONMENTAL EDUCATION THROUGH NATURE-BASED SOLUTIONS

Springer Nature This Book presents innovative and state of the art studies developed in Environmental Education in different countries to highlight this theme and promote its implementation all over the world. It will give a scientific perspective of Nature-based solutions to promote environmental education in all citizens and a more educational perspective as to how this approach can be implemented at schools and universities. Not less important is that includes science communication as a key factor for training and disseminating about the environment. The invited authors are recognized experts with excellent work developed in Environmental Education. This contributed volume presents innovative and creative work in the area giving a step forward in the implementation of Environmental Education, namely as a target of 2020 United Nations Agenda for Sustainable Development. The invitation of authors from many different countries allows the creation of a network and subsequently the book will bring concrete ideas as to how to develop operational capacities to bring added values to Environmental Education at an international level.

researchers, engineers and practitioners whose work involves methodologies in and applications of modeling and simulation. The papers showcased here represent the very best papers from the Conference, and report on a broad range of new and innovative solutions.

ONE CURRENCY, TWO EUROPES

TOWARDS A DUAL EUROZONE

World Scientific The aftermath of the US subprime mortgage crisis in 2008 saw its influence spread around the world, including Europe. The European crisis turned out to be longer, deeper and more resilient than anticipated. An unexpected consequence was the increasingly divergent economic and financial situation of two main groups of countries within the Eurozone, which includes the countries that adopt the euro as their common currency. The divergence was caused by a number of factors, fundamentally stemming from the dissimilar economic and financial situation of its member countries and from the incomplete institutional architecture and the monetary and fiscal policies in the Eurozone. **One Currency, Two Europes: Towards a Dual Eurozone** seeks to explore these factors which give rise to the Eurozone's asymmetric composition and the growing difficulties and ineffectiveness that policies meet. It presents evidence to show how the presently incomplete institutional architecture of the Eurozone is the main reason for the extreme detrimental effects of the international crisis and austerity policies, along with the asymmetric economic situation and the insufficient mutual trust demonstrated by the vulnerable as well as resilient countries. Other than presenting a complete overview and analysis of the events that unfolded in the Eurozone as a result of the financial crisis that first emerged in the US, this book also suggests possible solutions which could help to reunify the Eurozone, and make the common currency sustainable and beneficial for all member countries. **One Currency, Two Europes** will be useful for policymakers who want to learn from the Eurozone's experience with the financial crisis and the importance of complete institutional architectures and inter-country economic convergence. It will also serve as a reference to students and researchers who would like more in-depth analysis of the crisis and the Eurozone's fiscal, monetary and institutional past, present, and future. **Contents:** Acronyms Preface and Acknowledgments Introduction: Prolegomena to the International Crisis The Facts: The Crisis and the Eurozone: The World Economy and Europe The International Crisis and Its Origin Financial Causes and Real Sources of the European Crisis Institutions and Policies: The Internal Economic Asymmetry of the Eurozone Convergence and Divergence in the Eurozone The Eurozone as a Quasi-Optimum Currency Area A Detour on the Working of the EU: The Asymmetric and Incomplete Build-Up of the Union Outcomes and Ways Out: Policies and Their Frames The Crisis and the Incomplete Institutional Architecture Internal Contagion and the Eurozone Economies Policies Under

WILL SUSTAINABILITY FLY?

AVIATION FUEL OPTIONS IN A LOW-CARBON WORLD

Routledge While international negotiations to reduce greenhouse gas (GHG) emissions have been less than satisfactory, there is a presumption that a significant level of multi-lateral commitment will be realized at some point. International air and marine travel have been left to one side in past talks because the pursuit of agreement proceeds on the basis of commitment by sovereign nations and the effects of these specific commercial activities are, by their nature, difficult to corral and assign to specific national jurisdictions. However, air travel is increasing and, unless something is done, emissions from this segment of our world economy will form a progressively larger percentage of the total, especially as emissions fall in other activities. This book focuses on fuel. The aim is to provide background in technical and policy terms, from the broadest reliable sources of information available, for the necessary discourse on society's reaction to the evolving aviation emissions profile. It considers what policy has been, why and how commercial air travel is committed to its current liquid fuel, how that fuel can be made without using fossil-source materials, and the barriers to change. It also advances some elements of policy remedies that make sense in providing an environmentally and economically sound way forward in a context that comprehends a more complete vision of sustainability than 'renewable fuels' traditionally have. The goal of *Will Sustainability Fly?* is to broaden and contextualize the knowledge resource available to academics, policy makers, air industry leaders and stakeholders, and interested members of the public.

OVERTOURISM, TECHNOLOGY SOLUTIONS AND DECIMATED DESTINATIONS

Springer Nature This book meticulously focuses on seeing technological solutions of overtourism on decimated destinations from a comprehensive viewpoint. Considering the present crisis situation, the global tourism industry is in need to formulate revised strategies to recover and to be more resilient. The book creates a platform to deliberate the measures needed to be taken to tackle the issue of this most recent crisis of COVID-19 on the lens of overtourism and technology application. The book

adds some unique suggestions to direct a new outlook towards overtourism, technology solutions and decimated destinations. This book discusses the responsibilities of tourists towards decimated destinations as well as provides in-deep knowledge and debates about technological solutions to overtourism in decimated destinations.

HUMAN DEVELOPMENT REPORT 2015

WORK FOR HUMAN DEVELOPMENT

United Nations This report takes a broad view of the link between work and human development. Work is a critical tool for economic growth and security, poverty reduction and gender equality. It enables full participation in society while affording people a sense of dignity and worth. Humans working together not only increase their material well-being, they also accumulate a wide body of knowledge that serves as the basis for cultures and civilizations. The report finds that work enhances human development when policies are taken to expand productive, remunerative and satisfying work opportunities. Workers' skills and potentials are enhanced, their well-being in terms of rights, safety and benefits are ensured with targeted interventions, and an agenda incorporating decent work, a new Social Contract and a Global Deal is pursued.

GOOD ECONOMICS FOR HARD TIMES

BETTER ANSWERS TO OUR BIGGEST PROBLEMS

Penguin UK **FROM THE WINNERS OF THE 2019 NOBEL PRIZE IN ECONOMICS** 'Wonderfully refreshing . . . A must read' Thomas Piketty In this revolutionary book, prize-winning economists Abhijit V. Banerjee and Esther Duflo show how economics, when done right, can help us solve the thorniest social and political problems of our day. From immigration to inequality, slowing growth to accelerating climate change, we have the resources to address the challenges we face but we are so often blinded by ideology. Original, provocative and urgent, *Good Economics for Hard Times* offers the new thinking that we need. It builds on cutting-edge research in economics - and years of exploring the most effective solutions to alleviate extreme poverty - to make a persuasive case for an intelligent interventionism and a society built on compassion and respect. A much-needed antidote to polarized discourse, this book shines a light to help us appreciate and understand our precariously balanced world.

WORLD DEVELOPMENT REPORT 2016

DIGITAL DIVIDENDS

World Bank Publications Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital

economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

ECEL2015-14TH EUROPEAN CONFERENCE ON E-LEARNING,

ECEL2015

Academic Conferences and publishing limited **These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 Phd Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway,**

Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org).

HEAR #METOO IN INDIA

NEWS, SOCIAL MEDIA, AND ANTI-RAPE AND SEXUAL HARASSMENT ACTIVISM

Rutgers University Press **Hear #MeToo in India** examines the role media platforms play in anti-rape and sexual harassment feminist activism in India. Including 75 interviews with rural and subaltern feminist activists and journalists working in urban and rural regions of India, the book proposes a nuanced framework of agenda building on rape and establishes a theoretical framework to examine media coverage of issues in the digitally emerging countries of the Global South. In 2017, TIME announced The Silence Breakers, individuals who set off an international movement against sexual harassment, as its Person of the Year, amplifying the #MeToo movement. The intersection of issues of gender violence and activism receives inconsistent focus from the media, policymakers and the citizens. Some rapes and sexual harassments become the focus of mainstream and social media attention, while others are relegated to the background. **Hear #MeToo in India** emphasizes the interdependent association between social media networks and mainstream mass media which can strengthen anti-rape and sexual harassment activism. It provides a contextual framework to the relationship between subaltern anti-rape feminist activists in India and transnational anti-rape cyberfeminism and investigates why hashtags may or may not be successful in digitally emerging countries. The book illuminates how and why rape and sexual harassment incidents slip through the existing media, activism, and policy gap.

EDUCATION FOR SUSTAINABLE HAPPINESS AND WELL-BEING

Routledge In this innovative and cogent presentation of her concept of

sustainable happiness, Catherine O'Brien outlines how the leading recommendations for transforming education can be integrated within a vision of well-being for all. Solution-focused, the book demonstrates how aspects of this vision are already being realized, and the potential for accelerating education transitions that enable people and ecosystems to flourish. Each chapter assists educators to understand how to apply the lessons learned, both personally and professionally. The aim is to support educators to experience themselves as change-makers with growing confidence to implement new teaching strategies and inspire their students to become change-makers as well—engaged in deep learning that develops character, connections with life, and invigorating collaborations that revitalize the very purpose of education.
