Dante's Poets

Textuality and Truth in the COMEDY

Princeton University Press By systematically analyzing Dante's attitudes toward the poets who appear throughout his texts, Teodolinda Barolini examines his beliefs about the limits and purposes of textuality and, most crucially, the relationship of textuality to truth. Originally published in 1984. The Princeton Legacy Library uses the latest print-on-demand technology to again make available

previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Innovators Behind Leonardo

The True Story of the Scientific and Technological Renaissance

Springer This engaging book places Leonardo da Vinci's scientific achievements within the wider context of the rapid development that occurred during the Renaissance. It demonstrates how his contributions were not in fact born of isolated genius, but rather part of a rich period of collective advancement in science and technology, which began at least 50 years prior to his birth. Readers will discover a very special moment in history, when creativity and imagination were changing the future—shaping our present. They will be amazed to discover how many technological inventions had already been conceived or even designed by the engineers and inventors who preceded Leonardo, such as Francesco di Giorgio and Taccola, the so-called Siena engineers. This engaging volume features a wealth of illustrations from a variety of original sources, such as manuscripts and codices, enabling the reader to see and judge for him or herself the influence that other Renaissance engineers and inventors had on Leonardo.

Europe and Empire

On the Political Forms of Globalization

Fordham Univ Press The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a

federation of “islands” both distinct and connected. Though drawing on philosophers of Europe’s past, Cacciari calls not to resist Europe’s sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today’s politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

Elias Ashmole

The Quatercentenary Biography

L'Erma di Bretschneider The Quatercentenary Biography of Elias Ashmole aims to complement previous scholarship about him both by eminent past historians and by myself, while telling an incredible rags-to-riches story. Having spent most of the last twenty years on Elias Ashmole's collection of manuscripts and books, I felt I owed it to Ashmole that I should write his Quatercentenary Biography. The year 2017 marks 400 years since Elias Ashmole's birth, in Lichfield. The son of a modest saddler, Ashmole died as the founder of the first public museum in the British Isles. His successful life against all the odds is a great tale. Tercentenary celebrations for the foundation of the Ashmolean Museum, in Oxford, focussed more on the worth of that institution than on the merits of its founder. It belongs to the very nature of celebrations the tendency to overemphasise some positive aspects over other, less positive ones. Historians, moreover, sometimes prefer winning arguments rhetorically rather than balancing facts, thereby coming up with a less powerful, far more nuanced argument. They fear appearing weak, as if historians were lawyers in imaginary academic courts. We are not. When historians feel the urge to win arguments by omitting crucial evidence, they behave like propagandists. Take the importance of book collecting for Ashmole and his Museum, for example. Ever since the magisterial studies of Robert Theodore Gunther, back in the 1930s, theoretically we should all have been aware of the extent, composition, and value of Ashmole's collection of printed works. Instead, Ashmole has received some bad publicity, his own collected books having often been omitted from the picture. He has been treated as almost a thief of Tradescant's collections, as if those curiosities were the only founding nucleus of Ashmole's Museum.

Normal Breathing

The Key to Vital Health

CreateSpace This book has been the most comprehensive book on the Buteyko method since 2006. The first edition was available only as a PDF file which had slightly more than 100 pages. Later, it has several major and many minor updates with added sections, results of new clinical trials, and new chapters. The current edition is about 3 times larger than the initial version. The book was written for Buteyko breathing practitioners and advanced students. It provides practical education in physiology of respiration, as well as some unique details related to the application of the Buteyko method. For example, the book provides a list of factors that is required to break through 40 s morning CP (control pause) threshold: the hardest challenge in breathing retraining and the Buteyko breathing technique. For more details, see the content of the book that includes Chapters and sub-Chapters.

World Development Report 2019

The Changing Nature of Work

World Bank Publications Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of

advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

Animals and Animality in Primo Levi's Work

Springer Situated at the intersection of animal studies and literary theory, this book explores the remarkable and subtly pervasive web of animal imagery, metaphors, and concepts in the work of the Jewish-Italian writer, chemist, and Holocaust survivor Primo Levi (1919-1987). Relatively unexamined by scholars, the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetical and ethical function of testimony, as well as an original perspective on contemporary debates surrounding human-animal relationships and posthumanism. The three main sections that compose the book mirror Levi's approach to non-human animals and animality: from an unquestionable bio-ethical origin ("Suffering"); through an investigation of the relationships between writing, technology, and animality ("Techne"); to a creative intellectual project in which literary animals both counterbalance the inevitable suffering of all creatures, and suggest a transformative image of interspecific community ("Creation").

Dialectical Passions

Negation in Postwar Art Theory

Columbia University Press [Representing a new generation of theorists reaffirming the radical dimensions of art, Gail Day launches a bold critique of late twentieth-century art theory and its often reductive analysis of cultural objects. Exploring core debates in discourses on art, from the New Left to theories of "critical postmodernism" and beyond, Day counters the belief that recent tendencies in art fail to be adequately critical. She also challenges the political inertia that results from these conclusions. Day organizes her defense around critics who have engaged substantively with emancipatory thought and social process: T. J. Clark, Manfredo Tafuri, Fredric Jameson, Benjamin H. D. Buchloh, and Hal Foster, among others. She maps the tension between radical dialectics and left nihilism and assesses the interpretation and internalization of negation in art theory. Chapters confront the claim that exchange and equivalence have subsumed the use value of cultural objects and with it critical distance and interrogate the proposition of completed nihilism and the metropolis put forward in the politics of Italian operaismo. Day covers the debates on symbol and allegory waged within the context of 1980s art and their relation to the writings of Walter Benjamin and Paul de Man. She also examines common conceptions of mediation, totality, negation, and the politics of anticipation. A necessary unsettling of received wisdoms, *Dialectical Passions* recasts emancipatory reflection in aesthetics, art, and architecture.](#)

Language and Culture in Medieval Britain

The French of England, C.1100-c.1500

Boydell & Brewer Ltd Groundbreaking surveys of the complex interrelationship between the languages of English and French in medieval Britain.

Code-Switching in Early English

Walter de Gruyter The complex linguistic situation of earlier multilingual Britain has led to numerous contact-induced changes in the history of English. However, bi- and multilingual texts, which are attested in a large variety of text types, are still an underresearched aspect of earlier linguistic contact. Such texts, which switch between Latin, English and French, have increasingly been recognized as instances of written code-switching and as highly relevant evidence for the linguistic strategies which medieval and early modern multilingual speakers used for different purposes. The contributions in this volume approach this phenomenon of mixed-language texts from the point of view of code-switching, an important mechanism of linguistic change. Based on a variety of text types and genres from the medieval and Early Modern English periods, the individual papers present detailed linguistic analyses of a large number of texts, addressing a variety of issues, including methodological questions as well as functional, pragmatic, syntactic and lexical aspects of language mixing. The very specific nature of language mixing in some text types also raises important theoretical questions such as the distinction between borrowing and switching, the existence of discrete linguistic codes in earlier multilingual Britain and, more generally, the possible limits of the code-switching paradigm for the analysis of these mixed texts from the early history of English. Thus the volume is of particular interest not only for historical linguists, medievalists and students of the history of English, but also for sociolinguists, psycholinguists, language theorists and typologists.

Stick Control

For the Snare Drummer

Alfred Music George Lawrence Stone's Stick Control is the original classic, often called the bible of drumming. In 1993, Modern Drummer magazine named it one of the top 25 drumming books of all-time. In the words of the author, this is the ideal book for improving "control, speed, flexibility, touch, rhythm, lightness, delicacy, power, endurance, preciseness of execution, and muscular

coordination," with extra attention given to the development of the weak hand. This indispensable book for drummers of all types includes hundreds of basic to advanced rhythms and moves through categories of single-beat combinations, triplets, short roll combinations, flam beats, flam triplets and dotted notes, and short roll progressions.

Erunt qui voluptates laudent, erunt qui labores malint; erunt qui dolorem maximum malum dicant, erunt qui ne malum quidem appellent; divitias aliquis ad summum bonum admittet, alius illas dicet malo vitae humanae repertas, nihil esse eo locupletius, cui quod donet fortuna non invenit. In tanta iudiciorum diversitate referendam bene merentibus gratiam omnes tibi uno, quod aiunt, ore adfirmabunt. In hoc tam discors turba consentiet; cum interim iniurias pro beneficiis reddimus, et prima causa est, cur quis ingratus sit, si satis 32 gratus esse non potuit. Eo perductus est furor, ut periculosissima res sit beneficia in aliquem magna conferre; nam quia putat turpe non reddere, non vult esse, cui reddat. Tibi habe, quod accepisti; we should take counsel regarding them, not with their reputation but with their nature; those things possess no grandeur wherewith to enthral our minds, except the fact that we have become accustomed to marvel at them. For they are not praised because they ought to be desired, but they are desired because they have been praised; and when the error of individuals has once created error on the part of the public, then the public error goes on creating error on the part of individuals. But just as we take on faith such estimates of values, so let us take on the faith of the people this truth, that nothing is more honourable than a grateful heart. This phrase will be echoed by all cities, and by all races, even those from savage countries. Upon this point good and bad will agree. Some praise pleasure, some prefer toil; some say that pain is the greatest of evils, some say it is no evil at all; some will include riches in the Supreme Good, others will say that their discovery meant harm to...

Ventilazione meccanica non invasiva

Come, quando e perché

Springer Science & Business Media La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

Unveiling Galileo's unorthodox path from a challenging

problem to a new science

Springer This volume explores the reorganisation of knowledge taking place in the course of Galileo's research process extending over a period of more than thirty years, pursued within a network of exchanges with his contemporaries, and documented by a vast collection of research notes. It has revealed the challenging objects that motivated and shaped Galileo's thinking and closely followed the knowledge reorganization engendered by these challenges. It has thus turned out, for example, that the problem of reducing the properties of pendulum motion to the laws governing naturally accelerated motion on inclined planes was the mainspring for the formation of Galileo's comprehensive theory of naturally accelerated motion.

Il Volume è anche la documentazione di diciassette anni di attività appassionata per e nei Nidi.

Proceedings of the Second Italian Conference on Computational Linguistics CLiC-it 2015

CLiC-it 2015 is held in Trento on December 3-4 2015, hosted and locally organized by Fondazione Bruno Kessler (FBK), one the most important Italian research centers for what concerns CL. The organization of the conference is the result of a fruitful conjoint effort of

different research groups (Università di Torino, Università di Roma Tor Vergata and FBK) showing the nationwide spreading of CL in Italy. As in the first edition, the main aim of the event is at establishing a reference forum on CL, covering all the aspects needed to describe the multi-faceted and cross-disciplinary reality of the involved research topics and of the Italian community working in this area. Indeed the spirit of CLiC-it is inclusive, in order to build a scenario as much as possible comprehensive of the complexity of language phenomena and approaches to address them, bringing together researchers and scholars with different competences and skills and working on different aspects according to different perspectives. The large number of researchers that have decided to present their work at CLiC-it and the number of directions here investigated are proof of the maturity of our community and a promising indication of its vitality. We received a total of 64 paper submissions, out of which 52 have been accepted to appear in the Conference Proceedings, which are available online and on the OpenEdition platform. Overall, we collected 129 authors from 15 countries.

The New Avant-garde in Italy

Theoretical Debate and Poetic Practices

University of Toronto Press The debate on literature and the arts provoked by the Italian neoavant-garde (neoavanguardia) is undoubtedly one of the most animated and controversial the country has witnessed from World War II to the present. Comprising the period between the late 1950s and the late 1960s, the phenomenon of the neoavanguardia involved key writers, critics, and artists, both as insiders - Sanguineti, Balestrini, Guglielmi, Eco, and others - and adversaries such as Pasolini, Calvino, and Moravia. In *The New Avant-Garde in Italy* - the first book in English to document the movement - John Picchione's objective is twofold: to provide a comprehensive analysis of the theoretical tenets that inform the works of the neoavanguardia and to show how they are applied to the poetic practices of its authors. The neoavanguardia cannot, Picchione argues, be defined as a movement with a unified program expressed in the form of manifestos or shared theoretical principles. It experiences irreconcilable internal conflicts that are explored as a split between two main blocs - one that is tied to the project of modernity, the other to post-modern aesthetic postures. This study suggests that some of the contentious views proposed by the neoavanguardia anticipated a wide range of issues that continue to be significant and pressing to this day.

La Bella Figura

Hachette UK First of all, let's get one thing straight. Your Italy and our Italia are not the same thing. Italy is a soft drug peddled in predictable packages such as hills in the sunset, olive groves, white wine and raven haired girls. Italia, on the other hand, is a maze. It's alluring but complicated. In Italia you can go round and round in circles for years. Which of course, is great fun.' Beppe Severgnini was The Economist's Italian correspondent for ten years. A huge Anglophile as well as an astute observer of his countrymen, he's the perfect companion for this hilarious tour of modern Italy that takes you behind the seductive face it puts on for visitors -- la bella figura -- and uncovers the far more complex, paradoxical true self. Alongside the historic cities and glorious countryside, there'll be stops at the places where the Italians reveal themselves in all their authentic, maddening glory: the airport, the motorway and the living room. Ten days, thirty places. From north to south, from food to politics, from saintliness to sexuality. This witty and beguiling examination will help you understand why Italy, as Beppe says, 'can have you fuming and then purring in the space of a hundred metres or ten minutes.'
