Perspectives of an Iconoclast

Writings in Latin American Studies and International Relations

Trafford Publishing **Perspectives of an Iconoclast: Writings in Latin American Studies and International Relations** provides summaries of various Latin American cultures as well as essays that give historical accounts of relations with the United States including past CIA operations and interventions that still affect those respective Latin American societies today. The book provides such provocative essays as "Sleepwalking Through History", an abstract analysis of the socioeconomic incentives of modern war; "Coca Culture", an essay that reveals the traditional use of Coca among Bolivia's indigenous people and how Coca plays a practical function within Bolivian culture including harvest and work cycles, bartering for goods, ect. The book's essays also promote the ideals of collective security and multilateralism in international relations including a progressive role for the United Nations and other international organizations that will serve to strengthen democracy and promote sustainable development abroad.

Nanoscience and Nanotechnologies

Opportunities and Uncertainties

Report on the current state of scientific knowledge about nanotechnologies, how they might be used in the future, and potential health, safety, environmental, ethical and societal implications.

A Dictionary of English Folklore

[Oxford University Press](#) This dictionary is part of the Oxford Reference Collection: using sustainable print-on-demand technology to make the acclaimed backlist of the Oxford Reference programme perennially available in hardback format. An engrossing guide to English folklore and traditions, with over 1,250 entries. Folklore is connected to virtually every aspect of life, part of the country, age group, and occupation. From the bizarre to the seemingly mundane, it is as much a feature of the modern technological age as of the ancient world. **BL Oral and Performance genres-Cheese rolling, Morris dancing, Well-dressingEL BL Superstitions-Charms, Rainbows, WishbonesEL BL Characters-Cinderella, Father Christmas, Robin Hood, Dick WhittingtonEL BL Supernatural Beliefs-Devil's hoofprints, Fairy rings, Frog showersEL BL Calendar Customs-April Fool's Day, Helston Furry Day, Valentine's DayEL**

Capital

[Penguin UK](#) The "forgotten" second volume of Capital, Marx's world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx's theories.

The Signal and the Noise

The Art and Science of Prediction

[Penguin UK](#) Every time we choose a route to work, decide whether to go on a second date, or set aside money for a rainy day, we are making a prediction about the future. Yet from the global financial crisis to 9/11 to the Fukushima disaster, we often fail to foresee hugely significant events. In *The Signal and the Noise*, the New York Times' political forecaster and statistics guru Nate Silver explores the art of prediction, revealing how we can all build a better crystal ball. In his quest to distinguish the true signal from a universe of noisy data, Silver visits hundreds of expert forecasters, in fields ranging from the stock market to the poker table, from earthquakes to terrorism. What lies behind their success? And why do so many predictions still fail? By analysing the rare prescient forecasts, and applying a more quantitative lens to everyday life, Silver distils the essential lessons of prediction. We live in an increasingly data-driven world, but it is harder than ever to detect the true patterns amid the noise of information. In this dazzling insider's tour of the world of forecasting, Silver reveals how we can all develop better foresight in our everyday lives.

The American Commonwealth

The Sovereign Individual

Mastering the Transition to the Information Age

Simon and Schuster Two renowned investment advisors and authors of the bestseller *The Great Reckoning* bring to light both currents of disaster and the potential for prosperity and renewal in the face of radical changes in human history as we move into the next century. *The Sovereign Individual* details strategies necessary for adapting financially to the next phase of Western civilization. Few observers of the late twentieth century have their fingers so presciently on the pulse of the global political and economic realignment ushering in the new millennium as do James Dale Davidson and Lord William Rees-Mogg. Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just weeks before the coup attempt against Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia and other events that have proved to be among the most searing developments of the past few years. In *The Sovereign Individual*, Davidson and Rees-Mogg explore the greatest economic and political transition in centuries -- the shift from an industrial to an information-based society. This transition, which they have termed "the fourth stage of human society," will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values.

New Work on Speech Acts

Oxford University Press Speech-act theory is the interdisciplinary study of the wide range of things we do with words. Originally stemming from the influential work of twentieth-century philosophers, including J. L. Austin and Paul Grice, recent years have seen a resurgence of work on the topic. On one hand, a new generation of linguists, philosophers, and cognitive scientists have made impressive progress toward reverse-engineering the psychological underpinnings that allow us to do so much with language. Meanwhile, speech-act theory has been used to enrich our understanding of pressing social issues that include freedom of speech, racial slurs, and the duplicity of political discourse. This volume presents fourteen new essays by many of the philosophers and linguists who have led this resurgence. The topics span a methodological range that includes formal semantics and pragmatics, foundational issues about the nature of linguistic representation, and work on a variety of forms of indirect and/or uncooperative speech that occupies the intersection of the philosophy of language, ethics, and political philosophy. Several of the contributions demonstrate the benefits of integrating the methodologies and perspectives of these literatures. The essays are framed by a comprehensive introductory survey of the contemporary literature written by the editors.

Capital

A Critique of Political Economy

Tools for Thought

The History and Future of Mind-Expanding Technology

MIT Press In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. The digital revolution did not begin with the teenage millionaires of Silicon Valley, claims Howard Rheingold, but with such early intellectual giants as Charles Babbage, George Boole, and John von Neumann. In a highly engaging style, Rheingold tells the story of what he calls the patriarchs, pioneers, and infonauts of the computer, focusing in particular on such pioneers as J. C. R. Licklider, Doug Engelbart, Bob Taylor, and Alan Kay. Taking the reader step by step from nineteenth-century mathematics to contemporary computing, he introduces a fascinating collection of eccentrics, mavericks, geniuses, and visionaries. The book was originally published in 1985, and Rheingold's attempt to envision computing in the 1990s turns out to have been remarkably prescient. This edition contains an afterword, in which Rheingold interviews some of the pioneers discussed in the book. As an exercise in what he calls "retrospective futurism," Rheingold also looks back at how he looked forward.

Arthrogryposis

A Text Atlas

Cambridge University Press **The term arthrogryposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogryposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogryposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogryposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.**

Reforming Public Institutions and Strengthening Governance

A World Bank Strategy

World Bank Publications **The critical importance of well-performing public institutions and good governance for development and poverty reduction has come to the forefront in the 1990s. Reforming public institutions is a complex and difficult task. This publication is primarily intended as a guide for World Bank staff but it is also intended to serve the broader development community. It outlines a strategy which envisions significant changes in the focus of the Bank's work in this area. Some of these changes such as an enhanced focus on governance, capacity building and anticorruption, are already underway. The agenda for the next three years is to continue to foster these changes through a the advancement of analytical tools, new approaches to the design of lending operations, expanded emphasis on partnership with clients and other donors and progressive shifts in staffing, incentives and evaluation techniques. Included as an annex is an inventory of the Bank's governance and institutional reform programs which are in place.**

Higher education's response to the Covid-19 pandemic

Building a more sustainable and democratic future

Council of Europe **A particularly timely book, given the high proportion of international students and staff in higher education Public health was the immediate concern when the Covid-19 pandemic struck in Asia, then in Europe and other parts of the world. The response of our education systems is no less vital. Higher education has played a major role in responding to the pandemic and it must help shape a better, more equitable and just post-Covid-19 world. This book explores the various responses of higher education to the pandemic across Europe and North America, with contributions also from Africa, Asia and South America. The contributors write from the perspective of higher education leaders with institutional responsibility, as well as from that of public authorities or specialists in specific aspects of higher education policy and practice. Some contributions analyse how specific higher education institutions reacted, while others reflect on the impact of Covid-19 on key issues such as internationalisation, finance, academic freedom and institutional autonomy, inclusion and equality and public responsibility. The book describes the various ways in which higher education is facing the Covid-19 pandemic. It is designed to help universities, specifically their staff and students as well as their partners, contribute to a more sustainable and democratic future.**

Global Corruption Report: Sport

Routledge Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Colonialism in Global Perspective

Cambridge University Press A breath-taking comparative history of colonialism over the past 500 years, from the dawn of the New World to the twenty-first century.

Overweight Among U.S. Children and Adolescents

Unthought

The Power of the Cognitive Nonconscious

University of Chicago Press N. Katherine Hayles is known for breaking new ground at the intersection of the sciences and the humanities. In *Unthought*, she once again bridges disciplines by revealing how we think without thinking—how we use cognitive processes that are inaccessible to consciousness yet necessary for it to function. Marshalling fresh insights from neuroscience, cognitive science, cognitive biology, and literature, Hayles expands our understanding of cognition and demonstrates that it involves more than consciousness alone. Cognition, as Hayles defines it, is applicable not only to nonconscious processes in humans but to all forms of life, including unicellular organisms and plants. Startlingly, she also shows that cognition operates in the sophisticated information-processing abilities of technical systems: when humans and cognitive technical systems interact, they form “cognitive assemblages”—as found in urban traffic control, drones, and the trading algorithms of finance capital, for instance—and these assemblages are transforming life on earth. The result is what Hayles calls a “planetary cognitive ecology,” which includes both human and technical actors and which poses urgent questions to humanists and social scientists alike. At a time when scientific and technological advances are bringing far-reaching aspects of cognition into the public eye, *Unthought* reflects deeply on our contemporary situation and moves us toward a more sustainable and flourishing environment for all beings.

Insect Pollination of Cultivated Crop Plants

The Computer Modelling of Mathematical Reasoning

This review of the work done to date on the computer modelling of mathematical reasoning processes brings together a variety of approaches and disciplines within a coherent frame. A limited knowledge of mathematics is assumed in the introduction to the principles of mathematical logic. The plan of the book is such that students with varied backgrounds can find necessary information as quickly as possible. Exercises are included throughout the book.

Imagining Extinction

The Cultural Meanings of Endangered Species

University of Chicago Press **As the extinction of species accelerates and more species become endangered, activists, filmmakers, writers, and artists have responded to bring this global crisis to the attention of the public. Until now, there has been no study of the frameworks that shape these narratives and images, or of the symbolic meanings that the death of species carries in different cultural communities. Ursula Heise makes the case that understanding how and why endangered species come to matter culturally is indispensable for any effective advocacy on their behalf. Heise begins by showing that the tools of conservation science and law need to be viewed as cultural artifacts: biodiversity databases and laws for the protection of threatened species use rhetorical and cultural resources that open up different approaches to the problem of understanding global wildlife. The second half of her book explores ways of envisioning alternative futures for biodiversity. The narrative of nature's decline or even imminent disappearance has been a successful rallying trope for those skeptical of modernization and ideologies of progress. But environmentalists' nostalgia for the past and pessimistic outlook on the future have also alienated parts of the public. Heise tells the story of environmental activists, writers, and scientists who are creating new stories to guide the environmental imagination."**

Toxicological Profile for Asbestos (Update)

DIANE Publishing **This is a print on demand edition of a hard to find publication. Asbestos is a group of 6 different fibrous minerals that occur naturally in the environment. All forms of asbestos are hazardous, and all can cause cancer. This profile includes: (1) The examination and interpretation of toxicologic info. and epidemiological evals. on asbestos to ascertain the levels of human exposure for the substance and its health effects; (2) A determination of whether adequate info. on the health effects of asbestos is available or in the process of development to determine levels of exposure that present a significant risk to human health; and (3) Where appropriate, identification of toxicologic testing needed to identify the types or levels of exposure that may present significant risk of adverse health effects in humans. Charts and tables.**

The Cigarette Century

The Rise, Fall, and Deadly Persistence of the Product That Defined America

Hachette UK **The invention of mass marketing led to cigarettes being emblazoned in advertising and film, deeply tied to modern notions of glamour and sex appeal. It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. And no product has received such sustained scientific scrutiny. The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence-based medicine. In response, the tobacco industry engineered a campaign of scientific disinformation seeking to delay, disrupt, and suppress these studies. Using a massive archive of previously secret documents, historian Allan Brandt shows how the industry pioneered these campaigns, particularly using special interest lobbying and largesse to elude regulation. But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U.S., Big Tobacco remains securely positioned to expand into new global markets. The implications for the future are vast: 100 million people died of smoking-related diseases in the 20th century; in the next 100 years, we expect 1 billion deaths worldwide.**

Darkhold: Pages From The Book Of Sins - The Complete Collection

Marvel **Once you get your hands on the Darkhold, you'll be dying to read what's inside! And when long-lost pages of the Book of Sins begin to resurface, cursing those who read them with vicious twists on their greatest desires, it's up to Victoria Montesi and her Darkhold Redeemers, Sam Buchanan and Louise Hastings, to keep them out of the wrong hands! As the mysterious Darkhold Dwarf spreads chaos and the powerful pages wreak havoc, the Redeemers get a little help from Doctor Strange, Ghost Rider and their fellow Midnight Sons**

- but whose side is Modred the Mystic on? With demonic forces on the rise, can the Redeemers prevent the rebirth of Chthon? COLLECTING: DARKHOLD: PAGES FROM THE BOOK OF SINS 1-16; DOCTOR STRANGE, SORCERER SUPREME 90; MATERIAL FROM MIDNIGHT SONS UNLIMITED 1-2; MARVEL COMICS PRESENTS (1988) 145

Ethical Issues in Dementia Care

Making Difficult Decisions

Jessica Kingsley Publishers **Bradford Dementia Group Good Practice Guides** There are always difficult day to day decisions to be faced when caring for a person with dementia - from knowing how to deal with wandering to end of life decisions. Many of these decisions are underpinned by value judgments about right and wrong and reflect a particular view of dementia. This book considers these ethical decisions in the context of relationships, treatment, safety and quality of life, offering practical guidance and advice. It draws on the experiences of family carers as well as on existing research and emphasizes the importance of empathy and the need to acknowledge different perspectives in order to reach the best decision for the person with dementia. In particular the authors discuss the way that decision makers are themselves changed by the decisions they make, and the impact of this on the decision-making process. This book should be read by all those who work caring for people with dementia.

Annals of Rural Bengal

Let Their People Come

Breaking the Gridlock on Global Labor Mobility

Brookings Institution Press In **Let Their People Come**, Lant Pritchett discusses five "irresistible forces" of global labor migration, and the "immovable ideas" that form a political backlash against it. Increasing wage gaps, different demographic futures, "everything but labor" globalization, and the continued employment growth in low skilled, labor intensive industries all contribute to the forces compelling labor to migrate across national borders. Pritchett analyzes the fifth irresistible force of "ghosts and zombies," or the rapid and massive shifts in desired populations of countries, and says that this aspect has been neglected in the discussion of global labor mobility. **Let Their People Come** provides six policy recommendations for unskilled immigration policy that seek to reconcile the irresistible force of migration with the immovable ideas in rich countries that keep this force in check. In clear, accessible prose, this volume explores ways to regulate migration flows so that they are a benefit to both the global North and global South.

Toward a New Pacific Regionalism

An Asian Development Bank-Commonwealth Secretariat Joint Report to the Pacific Islands Forum Secretariat

This ADB-Commonwealth Secretariat Joint Report to the Pacific Island Forum Secretariat analyzes issues and possibilities for the new Pacific regionalism in the context of the commitment of Pacific Island Forum leaders to create a Pacific Plan for Strengthening Regional Cooperation and Integration.

Economics

The User's Guide

[Bloomsbury Publishing USA](#) The award-winning author of *23 Things They Don't Tell You About Capitalism* outlines the real-world processes of the global economy while explaining how to better understand the strengths and weaknesses of key economics theories to better navigate today's interconnected world.

The United Nations, Peace and Security

From Collective Security to the Responsibility to Protect

[Cambridge University Press](#) Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

The Library in the Life of the User

Engaging with People where They Live and Learn

[Blackbirch Press, Incorporated](#) This compilation provides a sequential overview of some of OCLC Research's user behavior research findings that articulate the need for the design of future library services to be all about the user.

Patriarcha; Or, the Natural Power of Kings (Dodo Press)

Sir Robert Filmer (1588-1653) was an English political theorist. His best known work, *Patriarcha; or, The Natural Power of Kings*, published in 1680, was a defense of the divine right of kings to rule. His theory is founded upon the statement that the government of a family by the father is the true origin and model of all government. Filmer was a severe critic of democracy. In his opinion, democracy of ancient Athens was in fact a "justice-trading system."

Oral and Literate Culture in England, 1500-1700

Clarendon Press This book explores the varied vernacular forms and rich oral traditions which were such a part of popular culture in early modern England. It focuses, in particular, upon dialect speech and proverbial wisdom, "old wives' tales" and children's lore, historical legends and local customs, scurrilous versifying and scandalous rumour-mongering. Adam Fox argues that while the spoken word provides the most vivid insight into the mental world of the majority in this semi-literate society, it was by no means untouched by written influences. Even at the beginning of the period, centuries of reciprocal infusion between complementary media had created a cultural repertoire which had long ceased to be purely oral. Thereafter, the expansion of literacy together with the proliferation of texts both in manuscript and print saw the rapid acceleration and elaboration of this process. By 1700 popular traditions and modes of expression were the product of a fundamentally literate environment to a much greater extent than has yet been appreciated.

Dementia

Ethical Issues

This title considers the ethical issues that arise in the context of dementia.

Applied Strength of Materials for Engineering Technology

Createspace Independent Publishing Platform This algebra-based text is designed specifically for Engineering Technology students, using both SI and US Customary units. All example problems are fully worked out with unit conversions. Unlike most textbooks, this one is updated each semester using student comments, with an average of 80 changes per edition.

Why is Landscape Beautiful?

The Science of Strollology

Birkhäuser Lucius Burckhardt (1925-2003) taught architectural theory at Kassel University and, in the 1980s, coined the term "Promenadology" or the science of Strollology and developed this into a complex and far-sighted planning and design discipline. Given that "the landscape" as an idea only exists in our heads, Burckhardt's writings (and drawings) are not so much concerned with beautiful vistas, but focus instead on the multi-faceted interaction a simple walk-taker has with his environment. To those who observe the environment with their eyes wide open, interesting questions will arise again and again; for example, why "city" and "country" can no longer be separated so easily in the face of progressive urbanization. Or why we consider a viaduct to be beautiful, but a nuclear power station an intrusion. And also, why gardens are works of art and should therefore be appraised as such. This book contains 28 texts by the design and planning critic, for the first time in English, with the focus on landscapes, gardens as an art form and the science of strollology.

By Nightfall

[HarperCollins UK](#) From the Pulitzer Prize-winning author of 'The Hours', comes the story of a marriage thrown off course by a moment of mistaken identity.

Populist Radical Right Parties in Europe

The first comprehensive and truly pan-European study of populist radical right parties in Europe.
