The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. ## Capitalist Nigger

### The Road To Success – A Spider Web Doctrine

*Jonathan Ball Publishers Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.*

## Corporate Responsibility Coalitions

### The Past, Present, and Future of Alliances for Sustainable Capitalism

*Routledge The significance of business-led corporate responsibility coalitions is indisputable. The WBCSD has 200 member companies with combined annual revenues of US\$7 \_trillion\_; the UN Global Compact has almost 8,000 corporate members, over two-thirds of them from developing countries. It is estimated that there are more than 110 national and international generalist business-led CR*

coalitions. But there is now urgent need for informed and balanced analysis of their achievements, their progress and their potential. Why did these coalitions start and grow? What have been their impacts? Where are they heading now? Where should they be going? What is the future? In a period of austerity, the business and public sector must decide whether funding these coalitions is a priority. To meet current crises, there will have to be a great deal more business involvement; but efforts of individual corporations will not be sufficient. There is also a need for far more collective action among companies and more collaborative action between different sectors of society. Business-led CR coalitions with their decades of convening experience could play an important role in this process - if they are fit for purpose going forward. Authors David Grayson and Jane Nelson have been actively involved in such coalitions for decades. In *Corporate Responsibility Coalitions* they first explore the past, present and future of these coalitions: the emergence of new models of collective corporate action over the past four decades; the current state of play, and the increasing number, diversity and complexity in terms of how they not only network with each other but also engage in a much broader universe of institutions that are promoting responsible business practices. In addition, the book provides in-depth profiles of the most strategic, effective and long-standing coalitions, including: Business for Social Responsibility; Business in the Community; CSR Europe; Instituto Ethos; International Business Leaders Forum; the UN Global Compact; and the WBCSD. This book will be required reading for key supporters and potential partners of such coalitions in companies, governments, international development agencies, foundations, non-governmental organizations, academic institutions and think-tanks. It also aims to inspire a future generation of leaders to be more aware of the role of business as a partner in driving more inclusive, green and responsible growth, and to help them develop new types of leadership skills so that they can be effective in finding multi-stakeholder solutions to complex and systemic challenges.

## Complex PTSD

### From Surviving to Thriving: A Guide and Map for Recovering from Childhood Trauma

CreateSpace I have Complex PTSD [Cptsd] and wrote this book from the perspective of someone who has experienced a great reduction of symptoms over the years. I also wrote it from the viewpoint of someone who has discovered many silver linings in the long, windy, bumpy road of recovering from Cptsd. I felt encouraged to write this book because of thousands of e-mail responses to the articles on my website that repeatedly expressed gratitude for the helpfulness of my work. An often echoed comment sounded like this: At last someone gets it. I can see now that I am not bad, defective or crazy...or alone! The causes of Cptsd range from severe neglect to monstrous abuse. Many survivors grow up in houses that are not homes - in families that are as loveless as orphanages and sometimes as dangerous. If you felt unwanted, unliked, rejected, hated and/or despised for a lengthy portion of your childhood, trauma may be deeply engrained in your mind, soul and body. This book is a practical, user-friendly self-help guide to recovering from the lingering effects of childhood trauma, and to achieving a rich and fulfilling life. It is copiously illustrated with examples of my own and my clients' journeys of recovering. This book is also for those who do not have Cptsd but want to understand and help a loved one who does. This book also contains an overview of the tasks of recovering and a great many practical tools and techniques for recovering from childhood trauma. It extensively elaborates on all the recovery concepts explained on my website, and many more. However, unlike the articles on my website, it is oriented toward the layperson. As such, much of the psychological jargon and dense concentration of concepts in the website articles has been replaced with expanded and easier to follow explanations. Moreover, many principles that were only sketched out in the articles are explained in much greater detail. A great deal of new material is also explored. Key concepts of the book include managing emotional flashbacks, understanding the four different types of trauma survivors, differentiating the outer critic from the inner critic, healing the abandonment depression that come

*from emotional abandonment and self-abandonment, self-reparenting and reparenting by committee, and deconstructing the hierarchy of self-injuring responses that childhood trauma forces survivors to adopt. The book also functions as a map to help you understand the somewhat linear progression of recovery, to help you identify what you have already accomplished, and to help you figure out what is best to work on and prioritize now. This in turn also serves to help you identify the signs of your recovery and to develop reasonable expectations about the rate of your recovery. I hope this map will guide you to heal in a way that helps you to become an unflinching source of kindness and self-compassion for yourself, and that out of that journey you will find at least one other human being who will reciprocally love you well enough in that way.*
