KEY=STUDY - ASHLEY AYERS

Sociological and Philosophical Perspectives on Education in the Asia-Pacific Region

Springer This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy, and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.

Transnational Higher Education in Computing Courses

Experiences and Reflections

Springer Nature There has been exponential growth in transnational education (TNE) in the last few years as UK universities have looked to expand their markets. Recipient countries have sought short cuts to developing their higher education provision which has proved a lucrative income stream for some universities. But overseas collaborations are not without risk. Recipient countries can be concerned with external influence over curricula, quality being diluted and higher education being infected by neo-imperialism. These concerns are not without foundation. There are risks for providers too. Reputations can be damaged if academic standards are compromised. Conflicts of interest can occur between quality of provision and the pot of gold on offer. Staff can view overseas collaborations as distracting from their research and commitment to home students. Computing is a particularly popular subject for TNE, but critical thinking, analysis, independent learning, and creativity can be compromised. Preventing plagiarism is difficult. Constant changes in technology result in constant curricula revision which causes severe problems for overseas collaborations. This book focuses on TNE in the computing domain. However cross-cultural issues challenge TNE management and administration whatever the subject area. If the ever present tensions are not continuously monitored they can quickly threaten the sustainability of the collaboration. This book identifies many of the threats and some of the solutions. The readership for this book is truly global. Any international development officer in higher education considering an overseas collaboration will benefit from this book. Any academic becoming engaged in, or already involved with a TNE partnership, either as provider or recipient, will gain information and insight into the practice and issues. Researchers in TNE will discover more lines of enquiry. Students considering a course with an overseas provider or in coming to the UK to study will be better prepared thereby enabling a more fulfilling and rewarding experience. Anyone who has an interest in TNE, whether at the senior executive level, operational level, delivering programmes or as a recipient of TNE should read this book. The wealth of experience gathered here will provoke questions, prompt debate and offer solutions. It has been written by people who know the issues, bear the scars and are happy to share their knowledge. It will greatly benefit future transnational collaborations.

A Concise Guide to Education Studies

Critical Publishing This book explores key contemporary issues in education, featuring the latest theoretical perspectives and policies, aimed at supporting the professional development and understanding of those working or intending to work in the education sector. Both school- and college-based education have faced rapid change over the last few years. A strong research base around the impact of these changes is emerging, enabling a critically informed debate on policy and practice developments. The book provides an up to date evidence-based overview of key changes, their underlying rationale and an examination of alternative viewpoints. The content is concise and focused while still developing readers' critical thinking skills through tasks embedded within each chapter as well as a distinct section on critical reflective thinking. Other key topics include inclusion, leadership, community education, comparative education, research and education futures.

Developing Advanced English Language Competence

A Research-Informed Approach at Tertiary Level

Springer Nature This volume presents a systematic approach to developing advanced English language competence at tertiary level. It includes the reflections of experienced language teachers and teacher-researchers in the English Language Competence programme at the University of Vienna and provides examples of good practice, amalgamating teaching expertise and research with aspects of curriculum design and programme management. The book addresses a growing academic and professional interest in understanding advanced language learning and use. To date, research has tended

to investigate advanced proficiency from a specific theoretical viewpoint, for example cognition, psycholinguistic processing strategies, or the assumption of a critical period or the age factor. In contrast, this work examines advanced proficiency from a curricular and instructional perspective by providing a profile of advanced-level language development in a specific institutional context. It brings together three areas of language education: curriculum design, pedagogical practice, and research. Within this triangle, advanced English language education is the focus or, conversely, advanced English language education provides the lens through which links between curriculum design, teaching, and research can be established.

Statistics for Linguists

A Step-by-Step Guide for Novices

Cambridge Scholars Publishing Linguists with no background in statistics will find this book to be an accessible introduction to statistics. Concepts are explained in non-technical terms, and mathematical formulas are kept to a minimum. The book incorporates SPSS, which is a statistics package that incorporates a point and click interface rather than complex line-commands. Step-by-step instructions are provided for some of the most widely used statistics in linguistics. At the same time, the concepts behind each procedure are also explained. Traditional analyses such as ANOVA and t-tests are included in the book, but linguistic data is often not amenable to such analyses. For this reason, non-parametric and mixed-effects procedures are also introduced.

English Learning in the Digital Age

Agency, Technology and Context

Springer Moving beyond the 'Web 2.0' and 'digital native' rhetoric, this book addresses the complex experiences of learners of English as a foreign language (EFL) in a world embedded with interactive and participatory technologies. Adopting a sociocultural perspective, it investigates EFL learners' behaviours concerning digital technology, and guides exploration into their contextually mediated choices and learning practices in the '2.0' era. The argument is developed on the basis of the findings of a mixed sequential study that focused on 1485 Chinese undergraduates' use and non-use of online tools and applications outside the English classroom. Particular attention is paid to the role of context and agency when understanding their learning choices and behaviours in the context of digital technology. In particular, the book acknowledges the explanatory power of agency in the minority instances of 'good practices' among these EFL learners. At the same time it demonstrates that for most learners, use of the current web is limited and mostly non-interactive. The barriers to '2.0' transfer are largely contextual and the so-called 'communicative opportunities' and 'participatory culture' in particular did not fit into the learners' sociocultural context of (language) learning. Overall, the compelling argument proposes that the technology-facilitated changes in EFL practices are a 'bottom up' process that is taking place in day-to-day situations and constrained by the learning context within which the learner is situated. Based on these arguments, the book provides a framework that challenges the existing beliefs about (language) learning with online technology, and that contributes to our understanding of how context mediates EFL learners' behaviours surrounding digital technologies. It is a valuable resource for teachers, researchers and policy makers, providing them with insights into using digital technology to stimulate 'good learning practices' outside the classroom.

Achieving Next Generation Literacy

Using the Tests (You Think) You Hate to Help the Students You Love

ASCD As a teacher, what you want most is for your students to learn—to immerse themselves in rich and challenging content and leave your classroom better prepared for school and life. In English language arts and humanities, this includes developing the multifaceted reading, writing, thinking, and communication skills that constitute next generation literacy, including the ability to * Read complex text independently * Develop strong content knowledge through reading, writing, listening, and speaking * Tailor communication in response to different audiences, tasks, purposes, and disciplines * Comprehend text as well as critique it * Value evidence in arguments they read, hear, or develop * Use technology strategically and capably * Understand perspectives and cultures that differ from their own But as a teacher, you also know how much is riding on THOSE TESTS—achievement tests from the national assessment consortia, the SAT and ACT, and independent state assessments. Is it possible to help students succeed on mandated tests without sacrificing your values, your creativity, and their education? Yes, it is possible. This book shows you how. This not a test-prep book. It is not about "drill and kill" practices that narrow learning so that students will pass an exam. Instead, authors Maureen Connolly and Vicky Giouroukakis present a lesson planning approach for the secondary classroom that generates test success as a byproduct of comprehensive literacy learning. After a comparative analysis of how current ELA assessments measure literacy, they model a backward design-based process for using these test items as a tool to create engaging and effective instruction. With 6 sample lessons, 42 instructional techniques, and tips for differentiation, this practical resource will empower you to help the students you love become capable, literate individuals who are also well-prepared to ace high-stakes tests.

The Routledge Handbook of Corpus Linguistics

Routledge The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in the key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. A comprehensive introduction covers the historical development of the field and its growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics. The Routledge Handbook of Corpus Linguistics is the ideal resource for advanced undergraduates and postgraduates.
