
Download Free Pdf Journals Education 2013 Factor Impact

Eventually, you will unquestionably discover a extra experience and attainment by spending more cash. nevertheless when? reach you take that you require to get those all needs afterward having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to understand even more vis--vis the globe, experience, some places, like history, amusement, and a lot more?

It is your no question own get older to decree reviewing habit. in the midst of guides you could enjoy now is **Pdf Journals Education 2013 Factor Impact** below.

KEY=JOURNALS - ARROYO LANE

Library and Information Sciences Trends and Research *Springer* This book explores the development, trends and research of library and information sciences (LIS) in the digital age. Inside, readers will find research and case studies written by LIS experts, educators and theorists, most of whom have visited China, delivered presentations there and drafted their articles based on feedback they received. As a result, readers will discover the LIS issues and concerns that China and the international community have in common. The book first introduces the opportunities and challenges faced by the library and information literacy profession and discusses the key role of librarians in the future of information literacy education. Next, it covers trends in LIS education by examining the vision of the iSchool movement and detailing its practice in Syracuse University. The book then covers issues in information seeking and retrieval by showing how visual data mining technology can be used to detect the relationship and pattern between terms on the Q&A of a social media site. It also includes a case study regarding tracing information seeking behavior and usage on a multimedia website. Next, the book stresses the importance of building an academic accreditation framework for scientific datasets, explores the relationship between bibliometrics and university rankings, and details the birth and development of East Asian Libraries in North America. Overall, the book offers readers insight into the changing nature of LIS, including the electronic dissemination of information, the impact of the Internet on libraries, the changing responsibilities of library professionals, the new paradigm for evaluating information, and characteristics and functions of today's library personnel.

Sustaining Mobile Learning Theory, research and practice *Routledge* Mobile technologies are one of the fastest growing areas of technology in education. For learners, they offer an appealing opportunity to transcend teacher-defined knowledge and approaches by being able to access multiple, alternative sources of information anytime and anywhere. While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade, there is no consolidated view of how to sustain the practices or opportunities that are being explored. Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies, time and training to initiate mobile learning programs. The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies, where with every change, new possibilities are opened up and investments required. In addition, educators are still attempting to reconcile institutions of formal education with informal mobile learning. The book addresses these issues, with a particular focus on: exploring the challenges surrounding the sustainability of mobile learning in K-12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning. Presenting new research alongside theoretical models and ideas for practice, the book will appeal to researchers, academics, and postgraduate students in the fields of education and mobile learning, as well as those working in teacher education.

ECEL 2021 20th European Conference on e-Learning *Academic Conferences International limited* 'We're trying to do things differently' the challenges of relationships and recognition in Higher Education *Centre for Public Policy Research* Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but - and this is the important and unique part - it is a book written mainly by university students about how

to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

INTERNATIONAL JOURNAL OF MULTIDISCIPLINARY PERSPECTIVES IN HIGHER EDUCATION *Lulu.com* **Developing Countries and Technology Inclusion in the 21st Century Information Society** *IGI Global* In recent years, many developing regions across the globe have made rigorous efforts to become integrated into the global information society. The development and implementation of information communication technology (ICT) devices and policies within various fields of service have significantly aided in the infrastructural progression of these countries. Despite these considerable advancements, there remains a lack of research and awareness on this imperative subject. **Developing Countries and Technology Inclusion in the 21st Century Information Society** is an essential reference source that discusses the adoption and impact of ICT tools in developing areas of the world as well as specific challenges and sustainable uses within various professional fields. Featuring research on topics such as policy development, gender differences, and international business, this book is ideally designed for educators, policymakers, researchers, librarians, practitioners, scientists, government officials, and students seeking coverage on modern applications of ICT services in developing countries. **Publish or Perish Perceived Benefits versus Unintended Consequences** *Edward Elgar Publishing* **Imad Moosa's** thought-provoking book explores the contemporary doctrine that plagues the academic sphere: the principle of publish or perish. This book identifies the pressures placed upon academics to either publish their work regularly, or suffer the consequences, including lack of promotion, or even redundancy. **Lilley's Pharmacology for Canadian Health Care Practice - E-Book** *Elsevier Health Sciences* **Let Canada's #1** pharmacology text help guide you in mastering the complicated world of nursing pharmacology. Now in its fourth edition, **Lilley's Pharmacology for Canadian Health Care Practice** covers all the key pharmacology content needed by today's Canadian nurses. Known for its vibrant design, abundance of visuals, and wealth of helpful feature boxes, this engaging text brings important pharmacology concepts to life. The text's popular and unique key drug approach focuses only on the drug information you need to know to safely and effectively administer drugs. Along with its exam preparation and insightful learning strategies, it's the complete (and proven) pharmacology text to help you succeed in school, clinicals, and professional practice. **Atlas of Knowledge Anyone Can Map** *MIT Press* **The power of mapping: principles for visualizing knowledge**, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of **Atlas of Science**, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In **Atlas of Knowledge**, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis; data preparation, analysis, and visualization; visualization deployment; and the interpretation of science maps. To exemplify the framework, the **Atlas** features striking and enlightening new maps from the popular "Places & Spaces: Mapping Science" exhibit that range from "Key Events in the Development of the Video Tape Recorder" to "Mobile Landscapes: Location Data from Cell Phones for Urban Analysis" to "Literary Empires: Mapping Temporal and Spatial Settings of Victorian Poetry" to "Seeing Standards: A Visualization of the Metadata Universe." She also discusses the possible effect of science maps on the practice of science. **Applied Evaluative Informetrics** *Springer* This book presents an introduction to the field of applied evaluative informetrics, dealing with the use of bibliometric or informetric indicators in research assessment. It sketches the field's history, recent achievements, and its potential and limits. The book dedicates special attention to the application context of quantitative research assessment. It describes research assessment as an evaluation science, and distinguishes various assessment models, in which the domain of informetrics and the policy sphere are disentangled analytically. It illustrates how external, non-informetric factors influence indicator development, and how the policy context impacts the setup of an assessment process. It also clarifies common misunderstandings in the interpretation of some often used statistics. Addressing the way forward, the book expresses the author's critical views on a series of fundamental problems in the current use of research performance indicators in research assessment. Highlighting the potential of informetric techniques, a series of new features is proposed that could be implemented in future assessment processes. It sketches a perspective on altmetrics and proposes new lines in longer term, strategic indicator research. It is written for interested scholars from all domains of science and scholarship, and especially for all those subjected to research assessment, research students at advanced master and PhD level, research managers, funders and science policy officials, and to practitioners and students in the field. **Shadow Education in the Middle East Private Supplementary Tutoring and its Policy Implications** *Taylor & Francis* This volume offers insights into the role of private supplementary tutoring in the Middle East, and its far-reaching implications for social structures and mainstream education. Around the world, increasing numbers of children receive private tutoring to supplement their schooling. In much of the academic literature this is called shadow education because the content of tutoring commonly mimics that of schooling: as the curriculum changes in the schools, so it changes in the shadow. While much research and policy attention has focused on private tutoring in East Asia and some other world regions, less attention has been given to the topic in the Middle East. Drawing on both Arabic-language and English-language literature, this study commences with the global picture before comparing patterns within and among 12 Arabic-speaking countries of the Middle East. It presents the

educational and cultural commonalities amongst these countries, examines the drivers of demand and supply of shadow education, and considers the dynamics of tutoring and how it impacts on education in schools. In addition to its pertinence within the Middle East itself, the book will be of considerable interest to academics and education policy makers broadly concerned with changing roles of the state and private sectors in education. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Nurse as Educator: Principles of Teaching and Learning for Nursing Practice *Jones & Bartlett Learning* "Nurse as Educator: Principles of Teaching and Learning for Nursing Practice, Sixth Edition prepares nurse educators, clinical nurse specialists, and nurse practitioners and students for their ever-increasing role in patient teaching, health education, and health promotion. One of the most outstanding and unique features of this text is that it focuses on multiple audiences therefore making it applicable to both undergraduate and graduate nursing courses. The Sixth Edition features coverage of relevant topics in nursing education and health promotion such as health literacy, teaching people with disabilities, the impact of gender and socioeconomics on learning, technology for teaching and learning, and the ethical, legal, and economic foundations of the educational process"--

Creating Entrepreneurial Space Talking Through Multi-Voices, Reflections on Emerging Debates *Emerald Group Publishing* This collection of papers aims to generate new and exciting opportunities for a holistic view of entrepreneurial research agendas, and advance the manner in which academics and researchers think about and engage with various aspects of entrepreneurial practice and development.

ECEL 2016 - Proceedings of the 15th European Conference on e- Learning *Proceedings of the 15th European Conference on e- Learning (ECEL 2016)*

Empowering the Children's and Young People's Workforce Practice based knowledge, skills and understanding *Routledge* While the provision in Children's and Young People's Services endures much change and turbulence, the calling for well qualified and critically reflective practitioners remains ever present. This innovative and accessible core textbook explores the key themes, ideas, concepts and topics that are central to practitioners working across the 0-19 sector. It aims to help students develop the professional knowledge, practical skills and core values they need to work effectively with children and young people. Clearly divided into four sections; the practitioner, the learner, the workplace and the community, the book covers a broad range of issues including: The different roles and responsibilities of the workforce Multi-agency working and its challenges Working with parents, carers and the community Supporting children with additional needs and meeting the needs of gifted learners Work-based reflective practice Language learning and communication At each stage the book facilitates opportunities for personal and professional reflection, discussion, debate and action through case studies, activities, reflective tasks, areas for further consideration, and annotated further readings. The text also features a glossary of terms and links to practice standards. The book is supported by a free companion website featuring instructor resources such as assignable case studies, reflective tasks and activities, tables and figures from the book available to download, and sample chapters from the book; and student resources including helpful links to further information, links to relevant video material, and an interactive flashcard glossary.

Empowering the Children's and Young People's Workforce seeks to empower the reader by supporting their initial and continuing professional development, enabling them to positively influence provision for children and young people. It is essential reading for anyone studying or working in this sector.

Adoption and impact of OER in the Global South *African Minds* Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

Media Exposure During Infancy and Early Childhood The Effects of Content and Context on Learning and Development *Springer* This book discusses the burgeoning world of young children's exposure to educational media and its myriad implications for research, theory, practice, and policy. Experts across academic disciplines and the media fill knowledge gaps and address concerns regarding apps, eBooks, and other screen-based technologies—which are being used by younger and younger children—and content delivery and design. Current research shows the developmental nuances of the child as learner in home, school, and mobile contexts, and the changes as parenting and pedagogy accommodate the complexities of the new interactive world. The book also covers methods for evaluating the quality of new media and prosocial digital innovations such as video support for separated families and specialized apps for at-risk toddlers. Highlights of the coverage: The role of content and context on learning and development from mobile media. Learning from TV and touchscreens during early childhood Educational preschool programming. How producers craft engaging characters to drive content delivery. The parental media mediation context of young children's media use. Supporting children to find their own agency in learning.

Media Exposure During Infancy and Early Childhood is an essential resource for researchers, clinicians and related professionals, and graduate students in diverse fields including infancy and early childhood development, child and school psychology, social work, pediatrics, and educational psychology.

Science Education in East Asia Pedagogical Innovations and Research-informed Practices *Springer* This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international

benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers. Distance Learning Volume 12 #3 IAP Distance Learning is for leaders, practitioners, and decision makers in the fields of distance learning, e-learning, telecommunications, and related areas. It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners, of all ages, using telecommunications technologies of all types. Stories are written by practitioners for practitioners with the intent of providing usable information and ideas. Articles are accepted from authors--new and experienced--with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns, including the highly regarded "And Finally..." column covering recent important issues in the field and written by Distance Learning editor, Michael Simonson. Articles are written by practitioners from various countries and locations, nationally and internationally. Distance Learning is an official publication of the United States Distance Learning Association, and is co-sponsored by the Fischler School of Education at Nova Southeastern University and Information Age Publishing. International Journal of Social Impact, Volume 1, Issue 3, 2016 RED'SHINE Publication. Inc Chinese Education Models in a Global Age Springer China's rise, an increasing emphasis on international education benchmarking, and a global recognition of East Asian countries' success in this regard have brought the issue of Chinese education to the forefront of public consciousness. In particular, the concept of a "Chinese education model" is one that has sparked debate and quickly become a major focus of education research around the world, especially in light of regional achievements vis-à-vis university rankings, bibliometric indices, the Programme for International Student Assessment (PISA), Trends in International Mathematics and Science Study (TIMSS), and other such benchmarks. Chinese Education Models in a Global Age tackles this controversial issue head on by synthesizing a diversity of analyses from a world-class team of twenty-seven authors. It reveals that Chinese education models, which are present in many different geographic and institutional contexts, have an important influence on social and institutional norms as well as individual belief systems and behaviors in China and beyond. The first of its kind, this edited volume establishes a foundation for future research while providing a nuanced and tightly integrated compilation of differing perspectives on the role and impact of Chinese education models worldwide. It is essential reading for all scholars, policymakers, students, parents, and educators interested in the rising demographic and economic influence of people of Chinese descent on education around the world. The Encyclopedia of Middle Grades Education (2nd ed.) IAP The second edition of The Encyclopedia of Middle Grades Education has been revised, updated, and expanded since its original publication in 2005. The Encyclopedia is a comprehensive overview of the field; it contains alphabetically organized entries that address important concepts, ideas, terms, people, organizations, publications, and research studies specifically related to middle grades education. This edition contains over 210 entries from nearly 160 expert contributors, this is a 25% increase in the number of entries over the first edition. The Encyclopedia is aimed at a general audience including undergraduate students in middle-level teacher preparation programs, graduate students, higher education faculty, and practitioners and administrators. The comprehensive list of entries are comprised of both short entries (500 words) and longer entries (2000 words). A significant number of entries appearing in the first edition have been revised and updated. Citations and references are provided for each entry. Connected Learning How Adults with Limited Formal Education Learn Wipf and Stock Publishers How does the world's oral majority--adults with limited formal education (ALFE)--really prefer to learn? Few pause long enough to ask those who eschew print. The result of scholarly research and prolonged immersion in the Cambodian culture, Connected Learning exposes the truth about orality--the shame associated with limited formal education; the unfortunate misnomer that is orality; the place of spirituality, grace, and hope; and the obvious but overlooked learning preferences. ALFE have different ways of learning and knowing, a different epistemology and culture from print learners, even though we all begin alike. The choice is not between Ong's orality or literacy, but between learning from people or from print. Dr. Thigpen, a veteran cross-cultural worker, shares remedies for the hegemony and inequities unwittingly fostered by the literate minority. In a dominant culture where learning from people is prime, how can educators with a preference for print adapt? Providing an important tool in the Learning Quadrants diagram, Connected Learning advises teaching to the quadrant and calls for seven necessary shifts in teaching. Anyone versed in orality will admit these findings have "global implications and applications" (Steffen). The reader who heeds will positively impact a huge portion of humanity. Sexual Orientation, Gender Identity, and Schooling The Nexus of Research, Practice, and Policy Oxford University Press 'Sexual Orientation, Gender Identity, and Schooling' brings together contributions from a diverse group of researchers, policy analysts, and education advocates from around the world to synthesize the practice and policy implications of research on sexual orientation, gender identity, and schooling. Engineering Education Trends in the Digital Era IGI Global As the most influential activity for social and economic development of individuals and societies, education is a powerful means of shaping the future. The emergence of physical and digital technologies requires an overhaul that would affect not only the way engineering is approached but also the way education is delivered and designed. Therefore, designing and developing curricula focusing on the competencies and abilities of new generation engineers will be a necessity for sustainable success. Engineering Education Trends in the Digital Era is a critical scholarly resource that examines more digitized ways of designing and delivering learning and teaching processes and discusses and acts upon developing

innovative engineering education within global, societal, economic, and environmental contexts. Highlighting a wide range of topics such as academic integrity, gamification, and professional development, this book is essential for teachers, researchers, educational policymakers, curriculum designers, educational software developers, administrators, and academicians. **Towards a Global Core Value System in Doctoral Education** *UCL Press* Recent decades have seen an explosion in doctoral education worldwide. Increased potential for diverse employment has generated greater interest, with cultural, political and environmental tensions focusing the attention of new creative, responsible scholars. **Towards a Global Core Value System in Doctoral Education** provides an evaluation of changes and reforms in doctoral education since 2000. Recognising the diversity of academic cultures and institutional systems worldwide, the book advocates for a core value system to overcome inequalities in access to doctoral education and the provision of knowledge. Building on in-depth perspectives of scholars and young researchers from more than 25 countries, the chapters focus on the structures and quality assurance models of doctoral education, supervision, and funding from an institutional and comparative perspective. The book examines capacity building in the era of globalisation, global labour market developments for doctoral graduates, and explores the ethical challenges and political contestations that may manifest in the process of pursuing a PhD. Experts and early career researchers in the Global North and South collaborated in interdisciplinary and intergenerational teams to develop guidelines for doctoral education. They learned from each other about how to act courageously within a complex global context. The resulting recommendations and reflections are an invitation to reflect on the frames and conditions of doctoral education today.

Mobile Learning Languages, Literacies and Cultures *Springer* This book explores the use of mobile devices for teaching and learning language and literacies, investigating the ways in which these technologies open up new educational possibilities. Pegrum builds up a rich picture of contemporary mobile learning and outlines of likely future developments. **Journal of International Students, 2018(4)** *OJED/STAR* The **Journal of International Students (JIS)**, an academic, interdisciplinary, and peer-reviewed publication (Print ISSN 2162-3104 & Online ISSN 2166-3750), publishes scholarly peer reviewed articles on international students in tertiary education, secondary education, and other educational settings that make significant contributions to research, policy, and practice in the internationalization of higher education. **The Fourth Education Revolution Will Artificial Intelligence Liberate Or Infantilise Humanity** *Legend Press Ltd* There is no more important issue facing education, or humanity at large, than the fast approaching revolution in Artificial Intelligence or AI. This book is a call to educators everywhere to open their eyes to what is coming. If we do so, then the future will be shaped by us in the interests of humanity as a whole - but if we don't, it will be imposed by others. Britain and the US have an excellent education system in their schools and universities - excellent, but tailored to the twentieth century. The factory mass teaching methods of the third revolution era have failed to conquer enduring problems of inequity and unfairness. Students have to make progress at a set rate which demotivates some and bores others. And for all the new technologies, teachers remain weighed down by routine administration and only a narrow range of our aptitudes are encouraged. Will the fourth AI revolution be able to remedy these problems? We have allowed ourselves to believe that teaching can uniquely be done only by the teacher, but might it in fact be better carried out by AI machines? Or at least in concert with teachers? The evolution of AI, still in its infancy, raises a range of issues of enormous importance as we grapple with how we as humans will interact with it. AI will be an altogether new way of spreading quality education across the world, especially to those hundreds of millions who do not have it. And coming it is - the final part of the book stresses that we have to embrace AI and ensure that we shape it to the best advantage of humanity. If we get it wrong, there may be no second opportunity. The conclusion... Nothing matters more than education if we are to see AI liberate not infantilise humanity. **Seeking Impact and Visibility Scholarly Communication in Southern Africa** *African Minds* African scholarly research is relatively invisible globally because even though research production on the continent is growing in absolute terms, it is falling in comparative terms. In addition, traditional metrics of visibility, such as the Impact Factor, fail to make legible all African scholarly production. Many African universities also do not take a strategic approach to scholarly communication to broaden the reach of their scholars' work. To address this challenge, the **Scholarly Communication in Africa Programme (SCAP)** was established to help raise the visibility of African scholarship by mapping current research and communication practices in Southern African universities and by recommending and piloting technical and administrative innovations based on open access dissemination principles. To do this, SCAP conducted extensive research in four faculties at the **Universities of Botswana, Cape Town, Mauritius and Namibia.** **Workplace Mental Health Manual for Nurse Managers** *Springer Publishing Company* Targeting the complex set of stressors found in health care work environments, this unique, practical resource describes the impact of bullying, harassment, addictions, violence and other triggers and the resulting adverse physiological and behavioral responses in these facilities. **Higher Education: Handbook of Theory and Research Volume 34** *Springer* Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on such diverse topics as research on college students and faculty, organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology and more. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world. **E-Learning in the Middle East and North Africa (MENA) Region** *Springer* In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However,

significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current state of e-learning in each of the 20 MENA countries from Algeria to Yemen. Each entry is expertly written by a specialist who is acutely familiar with the state of e-learning in their respective country, and concludes with a bibliography of key reports, peer-reviewed books and articles, and web resources. **E-Learning in the Middle East and North Africa (MENA) proves itself as a vital compendium for a wide readership that includes academics and students, transnational program directors, international education experts, MENA government departments, commercial vendors and investors, and ICT development and regulatory agencies involved in e-learning in the Middle East.**

What Students Learn Matters Towards a 21st Century Curriculum Towards a 21st Century Curriculum *OECD Publishing* This report highlights that economic, societal and environmental changes are happening rapidly and technologies are developing at an unprecedented pace, but education systems are relatively slow to adapt. Time lag in curriculum redesign refers to the discrepancies between the content of today's curriculum and the diverse needs of preparing students for the future. **International Handbook for Policy Research on School-Based Counseling** *Springer* This handbook examines policy research on school counseling across a wide range of countries and offers guidelines for developing counseling research and practice standards worldwide. It identifies the vital role of counseling in enhancing students' educational performance and general wellbeing, and explores effective methods for conducting policy research, with practical examples. Chapters present the current state of school-based counseling and policy from various countries, focusing on national and regional needs, as well as opportunities for collaboration between advocates and policymakers. By addressing gaps in policy knowledge and counselor training, the Handbook discusses both the diversity of prominent issues and the universality of its major objectives. Topics featured in this handbook include: The use of scoping reviews to document and synthesize current practices in school-based counseling. Contemporary public policy on school-based counseling in Latin America. Policy, capacity building, and school-based counseling in Eastern/Southern Africa. Public policy, policy research, and school counseling in Middle Eastern countries. Policy and policy research on school-based counseling in the United Kingdom. Policy research on school-based counseling in the United States. The **International Handbook for Policy Research in School-Based Counseling** is a must-have resource for researchers, graduate students, clinicians, and related professionals and practitioners in child and school psychology, educational policy and politics, social work, psychotherapy, and counseling as well as related disciplines. **Learning Development in Higher Education** *Bloomsbury Publishing* This book shows how Learning Development enhances the student experience and promotes active engagement. Written by staff from the UK's largest collaborative Centre for Excellence in Teaching and Learning (CETL), the book includes important insights for everyone interested in supporting student retention, progression and success. **Improving Research-Based Knowledge of College Promise Programs** *American Educational Research Association* Also known as "free tuition" and "free college" programs, college promise programs are an emerging approach for increasing higher education attainment of people in particular places. To maximize the effectiveness of their efforts and investments, program leaders and policymakers need research-based evidence to inform program design, implementation, and evaluation. With the goal of addressing this knowledge need, this volume presents a collection of research studies that examine several categories and variations of college promise programs. These theoretically grounded empirical investigations use varied data sources and analytic techniques to examine the effects of college promise programs that have different design features and operate in different places. Individually and collectively, the results of these studies have implications for the design and implementation of promise programs if these programs are to create meaningful improvements in attainment for people from underserved groups. The authors' efforts also provide a useful foundation for the next generation of college promise research. **ICEL2015-10th International Conference on e-Learning ICEL 2015** *Academic Conferences and publishing limited* These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the College of the Bahamas, Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double blind, peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings. These papers come from some many different countries including: Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab Emirates, UK and the USA. A selection of the best papers - those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL (the Electronic Journal of e-Learning www.ejel.com). These will be chosen for their quality of writing and relevance to the Journal's objective of publishing papers that offer new insights or practical help into the application e-Learning. **Educational Foundations** *Cengage Learning* **EDUCATIONAL FOUNDATIONS, Second Edition**, explains today's schools for those who are trying to picture themselves within the education profession. The book makes educational foundations topics relevant and personally meaningful to both young learners and mature adult learners-while also offering the comprehensive scope, scholarly depth, and conceptual analysis of contemporary issues that will help readers understand the field and transition smoothly into their career. This new edition includes a greater emphasis on InTASC and Common Core State Standards, and incorporates a number of new features that enable readers to gain a realistic and insightful perspective of the education profession. **Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.** **Empowerment Series: Understanding Human Behavior and the Social Environment** *Cengage Learning* **Zastrow and Kirst-**

Ashman's UNDERSTANDING HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT, 10th Edition looks at the lifespan through the lens of social work theory and practice, covering human development and behavior theories within the context of family, organizational, and community systems. Using a chronological lifespan approach, the book presents separate chapters on biological, psychological, and social impacts at the different lifespan stages with an emphasis on strengths and empowerment. Part of the Brooks/Cole Empowerment Series, this edition is completely up to date and thoroughly integrates the core competencies and recommended practice behaviors outlined in the current Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE).
