DOUGLAS KENYON **The Legacy Of Mark Rothko** *Da Capo Press* At the time of Mark Rothko's apparent suicide in 1970, the deeply troubled, pioneering artist of Abstract Expressionism was at the height of fame and financial success; yet within months of the funeral, his three trusted friends, acting as executors, relinquished his entire legacy of 800 paintings to the powerful, international Marlborough Galleries (run by Frank Lloyd) for a fraction of their real worth on terms suspiciously unfavorable to the estate. The suit that Rothko's daughter brought against the executors and Marlborough rocked the art world with its shocking revelations of corruption in the international art trade: from the deceptions practiced on Rothko when he was alive to the scandals after his death involving conspiracies and cover-ups, double dealings and betrayals, missing paintings and manipulated markets, phony sales and laundered profits, forgery and fraud. **AQA GCSE History: Understanding the Modern World** *Hachette UK* Create a stimulating, well-paced teaching route through the 2016 GCSE History specification using this tailor-made series that draws on a legacy of market-leading history textbooks and the individual subject specialisms of the author team to inspire student success. - Motivate your students to deepen their subject knowledge through an engaging and thought-provoking narrative that makes historical concepts accessible and interesting to today's learners - Embed progressive skills development in every lesson with carefully designed Focus Tasks that encourage students to question, analyse and interpret key topics - Take students' historical understanding to the next level by using a wealth of original contemporary source material to encourage wider reflection on different periods - Help your students achieve their potential at GCSE with revision tips and practice questions geared towards the changed assessment model, plus useful advice to aid exam preparation - Confidently navigate the new AQA specification using the expert insight of experienced authors and teachers with examining experience This single core text contains all four period studies and the following wider world depth studies: - Conflict and tension, 1894-1918 - Conflict and tension, 1918-1939 - Conflict and tension between East and West, 1945-1972 - Conflict and tension in Asia, 1950-1975 **Global Issues and Innovative Solutions in Healthcare, Culture, and the Environment** *IGI Global* Despite the development of environmental initiatives, healthcare, and cultural assimilation in today's global market, significant problems in these areas remain throughout various regions of the world. Eerdmans Publishing* This authoritative book is the most comprehensive examination ever of the sacredness of human life. Never before has one volume explored this subject in such a multifaceted way, encompassing biblical roots, theological elaborations, historical cases, and contemporary ethical perspectives. Tracing the concept of the sacredness of human life from Scripture through church history to the present day, David Gushee argues that viewing human life as sacred is one of the most precious legacies of

biblical faith — albeit one that the church has too often failed to uphold. Besides providing a masterful historical survey, Gushee's discussion covers the many current ethical challenges and perspectives that will impact the survival and flourishing of human life, including biotechnology, the death penalty, abortion, human rights, nuclear weapons, just war theory, women's rights, and creation care. Gushee's *Sacredness of Human Life* is a game-changing book that will set the standard for all future discussions of this key ethical concept.

**The Gospel of Pseudo-Matthew and the Nativity of Mary** *BoD - Books on Demand* The Gospel of Pseudo-Matthew is one of the most important witnesses in Western Europe to apocryphal stories about the lives of Mary, Joseph, Jesus, and Mary's parents, Anna and Joachim. This apocryphon was also used as the basis for another, the Nativity of Mary, which gained equal popularity. As bestsellers of medieval Christianity, these Latin apocrypha are major witnesses to the explosion of extra-biblical literature in the Western Middle Ages. Despite their apocryphal status, the Gospel of Pseudo-Matthew and the Nativity of Mary proved influential throughout the Middle Ages and into the early modern period, as their popularity and influences may be traced in Christian literature, visual arts, liturgy, and theological perspectives still revered by Roman Catholic theologians. These apocrypha also remain significant works for considering the history of monasticism and the cult of the Virgin Mary. The Gospel of Pseudo-Matthew and the Nativity of Mary draws upon a range of manuscript sources to present comprehensive English translations of the Gospel of Pseudo-Matthew and the Nativity of Mary with full introductions and commentaries, as well as translations of related works with accompanying commentaries.

**Air Transport in the Asia Pacific** *Routledge* Air transport in the Asia Pacific has undergone significant transformation in the last three decades. What was once a region in the shadow of larger and more prosperous continents such as North America and Europe is now at the forefront of expansion in commercial air-service networks, frequency and capacity, and the overall growth in the contribution of air transport to economies on regional and, in many cases, individual country levels. Despite this, it represents an area that is generally under-represented in the commercial air-transport academic literature. Air Transport in the Asia Pacific seeks to fill this gap. Against this context, the aim of the volume is to offer a contemporary snapshot of current academic research into commercial air transport in the Asia Pacific. While one volume cannot realistically address the complete range of identifiable issues, this book provides timely, specific and research-based studies authored by leading academics and practitioners.

**Engineering Solutions for Sustainability Materials and Resources** *John Wiley & Sons* A wealth of resources and topics of discussion from the *Engineering Solutions for Sustainability: Materials and Resources* workshop held in Switzerland in 2009. Natural resources are the lifeblood of agricultural and industrial endeavors that contribute to our social and economic well-being. Yet, even as these resources dwindle from mismanagement, there is still no clear consensus in the engineering community of what actually defines "sustainable engineering." This publication offers the engineering profession a multi-disciplinary blueprint for action by presenting topics of discussion from the *Engineering Solutions for Sustainability: Materials and Resources* workshop held at the école Polytechnique Fédérale de Lausanne, Switzerland, July 22-24, 2009. It includes an extensive bibliography and recommended readings section, and a summary of key, cross-cutting initiatives recommended as priorities because of their potential to create common principles for advancing societal sustainability through technological, educational, and public policy solutions. The resources, tools, and concepts delivered in this report draw from the unique perspectives and expertise of an array of engineering disciplines, represented by delegates from the American Institute of Mining, Metallurgical, and Petroleum Engineers (AIME), the American Society of Civil Engineers (ASCE), and the American Institute of Chemical Engineers (AIChE). The intent of this publication is to forge a better understanding of the role and responsibility of engineering in achieving global sustainability, while also laying the foundation for an ongoing and productive interdisciplinary dialogue in other forums.

**Honouring Social Justice Honouring Dianne Martin** *University of Toronto Press* These essays provide an illuminating introduction to the background of important social causes, and describe dedicated examples of how to effectively champion calls for social justice.

**Transitional Justice in Rwanda Accountability for Atrocity** *Routledge* *Transitional Justice in Rwanda: Accountability for Atrocity* comprehensively analyzes the full range of the transitional justice processes undertaken for the Rwandan genocide. Drawing on the author's extensive professional experience as the principal justice policy maker and the leading law enforcement officer in Rwanda from 1996-2003, the book provides an in-depth analysis of the social, political and legal challenges faced by Rwanda in the aftermath of the genocide and the aspirations and legacy of transitional justice. The book explores the role played by the accountability processes not just in pursuing accountability but also in shaping the reconstruction of Rwanda's institutions of democratic governance and political reconciliation. Central to this exploration will be the examination of whether or not transitional justice in Rwanda has contributed to a foundational rule of law reform process. While recognizing the necessity of pursuing accountability for mass atrocity, the book argues that a maximal approach to accountability for genocide may undermine the promotion of core objectives of transitional justice. Taking on one of the key questions facing practitioners and scholars of transitional justice today, the book suggests that the pursuit of mass accountability, particularly where socio-economic resources and legal capacity is limited, may destabilize the process of rule of law reform, endangering core human rights norms. Moreover, the book suggests that pursuing a strategy of mass accountability may undermine the process of democratic transition, particularly in a context where impunity for crimes committed by the victors of armed conflicts persists. Highlighting the ongoing democratic deficit in Rwanda and resulting political instability in the Great Lakes region, the book argues that the effectiveness of transitional justice ultimately hinges on the nature and success of political transition.

**IBN Khaldûn's Philosophy of History A Study in the Philosophic Foundation of the Science of Culture** *Routledge* This book, first published in 1957, is the study of 14th-century Arab historian Ibn Khaldun, who founded a special science to consider history and culture, based on the philosophy of Plato and Aristotle and their Muslim followers. In no other field has the revolt of modern Western thought against traditional philosophy been so far-reaching in its consequences as in the field of history. Ibn Khaldun realized that history is more immediately related to action than political philosophy because it studies the actual state of man and society. He found that the ancients had not made history the object of an independent science, and thought it was important to fill this gap. A factual acquaintance with the conclusions of Ibn Khaldun's reflections on history is not the same as the full comprehension of their theoretical significance. When these fundamental questions are answered, it becomes possible to pose the specific question of the relation of Ibn Khaldun's philosophy of history, or his new science of culture, to other practical sciences and, particularly, to the art of history. After an exposition of the major trends of Islamic historiography, part of this book attempts to answer this question through the analysis of the method and intention of the sections of the *ʿHistoryʿ* where Ibn Khaldun himself examines the works of major Muslim historians, shows the necessity of the new science of culture, and distinguishes it from other practical sciences.

However, he is lauded as a second Moses by many within modern Judaism. Does he deserve that title? Maimonides's via negativa created a rationale for rejecting the messiahship claims of Jesus in Rabbinic Judaism. Therefore, this book seeks to illustrate that Maimonides, in his desire to create an anti-Christian apologetic regarding the incarnation, fashioned a Judaism that does not reflect the truths of the Tanakh (Old Testament) and developed a Judaism that was untenable for the Jewish people of the twenty-first century. Many Jewish people today are turning in a thousand and one different directions for spiritual answers, but not in the only way that will offer the way to God: Jesus of Nazareth (John 14:6). This work examines the history of Maimonides, his teachings, and an apologetic approach to bring the gospel back to the Jewish people (Rom 1:16). **Microsoft Dynamics AX Implementation Guide** *Packt Publishing Ltd* Your all-in-one guide to exploring and implementing Microsoft Dynamics AX About This Book From project kick-off to go live and upgrade, learn what to expect in each phase of the project This book guides you through the entire journey of a Dynamics AX implementation project, helping you to avoid the common pitfalls and adapt industry knowledge and best practices for your own project This one-stop guide is packed with key tools and techniques to aid your Dynamics AX implementation Who This Book Is For This book is for IT project managers, solution architects, and consultants who are planning to implement or are in the process of implementing or upgrading Dynamics AX.
