If you buy a book at the bookstore, you own it. You can take it home, scribble in the margins, put in on the shelf, lend it to a friend, sell it at a garage sale. But is the same thing true for the ebooks or other digital goods you buy? Retailers and copyright holders argue that you don't own those purchases, you merely license them. That means your ebook vendor can delete the book from your device without warning or explanation—as Amazon deleted Orwell's 1984 from the Kindles of surprised readers several years ago. These readers thought they owned their copies of 1984. Until, it turned out, they didn't. In *The End of Ownership*, Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace, and make an argument for the benefits of personal property. Of course, ebooks, cloud storage, streaming, and other digital goods offer users convenience and flexibility. But, Perzanowski and Schultz warn, consumers should be aware of the tradeoffs involving user constraints, permanence, and privacy. The rights of private property are clear, but few people manage to read their end user agreements. Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits. But, most important, it would affirm our sense of self-direction and autonomy. If we own our purchases, we are free to make whatever lawful use of them we please. Technology need not constrain our freedom; it can also empower us. **The Vixen Star Book User Guide How to Use the Star Book TEN and the Original Star Book** Springer This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. Airport Competition Regulation in Europe Kluwer Law International B.V. Over the past thirty years, airports within the EU – including nearly a hundred newly built or rebuilt during that time – have undergone a major economic transformation. From mere infrastructure providers, airports have become diversified and complex commercial enterprises in competition with each other. This is the first and only book thus far to deal with the legal issues surrounding this important development, focusing on the impact of EU Directive 12/2009 on airport charges. Examining the use of airport infrastructure, the growing competition among airports, and the relations between airlines and airports, the author, a leading aviation law practitioner, covers such issues and topics as the following: - types of charges – landing, passenger, aircraft parking; - pricing factors determining airport charges; - vertical contractual relations between airports and airlines; - airport market power

and dominance; - issues of consultation and transparency; - ability of airlines and passengers to switch to alternative airports; - application of state aid rules; - security charges; - environmental charges and schemes; and - price discrimination and differentiation. The presentation encompasses a critical analysis of the findings of case law, both international and European, on airport charges in the context of the new trend of airports and airlines concluding vertical agreements. As an examination of the economic regulation of EU airports due to the liberalization process, structural changes in the ownership status of many EU airports, and the emergence of new airline business models (such as low-cost carriers), this book, the only one of its kind, will quickly become indispensable to practitioners, policymakers, and academics in aviation law. **FCC Record A Comprehensive Compilation of Decisions, Reports, Public Notices, and Other Documents of the Federal Communications Commission of the United States 25 Progressive Pieces, Op. 100** Alfred Music Burgmüller's most famous work, the 25 Progressive Pieces, are short compositions with descriptive titles.
