Impact Evaluation in Practice, Second Edition

World Bank Publications The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Your Customer Rules!

Delivering the Me2B Experiences That Todays Customers Demand

John Wiley & Sons What you need to know about your customers Now more than ever, every interaction you have with customers is critical. Customers today have unlimited information at their fingertips—and can influence the purchase decisions and behaviors of millions of others. With this comes a shift in the balance of power, and every company must come to terms with the fact that the customer is in control. Interacting with customers in the way they want is an essential business strategy and in many industries, the key to business success. Executives still refer to B2B and B2C business models, as though companies control demand by going to customers with products and services. But as Bill Price and David Jaffe (authors of *The Best Service is No Service*) show, a new business model is emerging in which the customer directs the relationship. It is becoming a world of "Me2B"—one in which the customer, not the business, dictates the terms of engagement. In order for your business to thrive, you must create positive experiences to fulfill a range of customer needs. Though the mediums for customer engagement continuously evolve, Price and Jaffe show that customer needs remain unchanging. In *Your Customer Rules!*, they define a critical hierarchy of seven needs that your company can meet and apply as a methodology. Throughout this practical guidebook, Price and Jaffe share examples of companies who succeed by meeting these seven needs, including Amazon, Apple, IKEA, Nordstrom, USAA, Shoes of Prey, Vente-Privee, and Yamato Transport, as well as those that didn't. *Your Customer Rules!* offers tailored advice for companies at every stage, from nimble startups to legacy firms with established customer service practices—and everyone in between. With a simple, elegant solution for driving lasting value for customers, *Your Customer Rules!* is a clear guide for strengthening customer relationships and competing on more than price. It is essential reading for executives at all levels—business owners, marketing managers, and anyone who works directly with customers.

Educational Enactments in a Globalised World

Intercultural Conversations

BRILL Acrylic oil, glue stick and layered canvas 1830 x 2075 (Collection of the artist). What does it mean to learn and educate in these social and historical times? This edited collection engages an international group of education thinkers in a series of ongoing intercultural conversations that speak to the challenges and possibilities of engaging with education, difference and diversity in a globalised world.

Global Issues and Comparative Education

Learning Matters Almost every Education Studies degree includes an element of comparative education, and this book provides an accessible undergraduate-level introduction to the theme. It begins by defining what is meant by the term 'comparative education' and examines the benefits of studying it to students, policy makers, educators and academics. The book then takes a largely age-phase approach with a comparative analysis of selected education systems from around the world, including the impact of globalisation.

Advances in E-Learning: Experiences and Methodologies

Experiences and Methodologies

IGI Global Web-based training, known as e-learning, has experienced a great evolution and growth in recent years, as the capacity for education is no longer limited by physical and time constraints. The emergence of such a prized learning tool mandates a comprehensive evaluation of the effectiveness and implications of e-learning. *Advances in E-Learning: Experiences and Methodologies* explores the technical, pedagogical, methodological, tutorial, legal, and emotional aspects of e-learning, considering and analyzing its different application contexts, and providing researchers and practitioners with an innovative view of e-learning as a lifelong learning tool for scholars in both academic and professional spheres.

Understanding Global Migration

Stanford University Press *Understanding Global Migration* offers scholars a groundbreaking account of emerging migration states around the globe, especially in the Global South. Leading scholars of migration have collaborated to provide a birds-eye view of migration interdependence. *Understanding Global Migration* proposes a new typology of migration states, identifying multiple ideal types beyond the classical liberal type. Much of the world's migration has been to countries in Asia, Africa, the Middle East, and South America. The authors assembled here account for diverse histories of colonialism, development, and identity in shaping migration policy. This book provides a truly global look at the dilemmas of migration governance: Will migration be destabilizing, or will it lead to greater openness and human development? The answer depends on the capacity of states to manage migration, especially their willingness to respect the rights of the ever-growing portion of the world's population that is on the move.

The State of Food Security and Nutrition in the World 2018

Building climate resilience for food security and nutrition

Food & Agriculture Org. New evidence this year corroborates the rise in world hunger observed in this report last year, sending a warning that more action is needed if we aspire to end world hunger and malnutrition in all its forms by 2030. Updated estimates show the number of people who suffer from hunger has been growing over the past three years, returning to prevailing levels from almost a decade ago. Although progress continues to be made in reducing child stunting, over 22 percent of children under five years of age are still affected. Other forms of malnutrition are also growing: adult obesity continues to increase in countries irrespective of their income levels, and many countries are coping with multiple forms of malnutrition at the same time – overweight and obesity, as well as anaemia in women, and child stunting and wasting.

An International History of Terrorism

Western and Non-Western Experiences

Routledge The aim of this book is to provide readers with the tools to understand the historical evolution of terrorism and counterterrorism over the past 150 years. In order to appreciate the contemporary challenges posed by terrorism it is necessary to look at its evolution, at the different phases it has gone through, and the transformations it has experienced. The same applies to the solutions that states have come up with to combat terrorism: the nature of terrorism changes but still it is possible to learn from past experiences even though they are not directly applicable to the present. This book

provides a fresh look at the history of terrorism by providing in-depth analysis of several important terrorist crises and the reactions to them in the West and beyond. The general framework is laid out in four parts: terrorism prior to the Cold War, the Western experience with terrorism, non-Western experiences with terrorism, and contemporary terrorism and anti-terrorism. The issues covered offer a broad range of historical and current themes, many of which have been neglected in existing scholarship; it also features a chapter on the waves phenomenon of terrorism against its international background. This book will be of much interest to students of terrorism studies, political violence, international history, security studies and IR.

The Global Emerging Market

Strategic Management and Economics

Routledge Despite the growing importance of the global emerging market (GEM) for the world's business, economies, and politics, it has received a relatively scant amount of academic attention in business and economics courses. This textbook is the first to focus on the GEM and its strategic and economic characteristics. The Global Emerging Market: Strategic Management and Economics describes the fundamental economic base and trends of the global marketplace (GMP) as well as business and management development for the conditions of emerging-market countries (EMCs). Focusing on the formation of a strategic mindset and the decision making process, it explains how to analyze the basic economic factors and the global order, especially in times of crisis. This text also explains how to classify countries related to this new market of tremendous opportunities. Furthermore, the book includes recommendations on how to develop entry and exit strategies for the GEM, work in it and create efficient management systems. Features include: Extensive tables, charts, and graphs illustrating the strategic considerations of the GMP and the GEM End-of-chapter study questions Practical examples based on the author's involvement in the development of the GEM, from both sides of the international transactions This academic book is the ideal guide for current business leaders and students on how to make strategic, symmetric, and asymmetric time-sensitive decisions related to the GEM.

Leadership in Nursing: Experiences from the European Nordic Countries

Springer This book explores the leading role played by nursing science in the European Nordic countries. Recognized leaders in nursing research from Denmark, Finland, Iceland, Norway and Sweden, reflect on the leadership of nurses, the societal developments and the state of nursing science in their country, and the successes and remaining challenges nurses are facing. The book highlights representative leadership projects focusing on e.g. evidenced-based clinical practice, education and research that have impacted patient and healthcare outcomes in each country. The book shows how nursing, as a scientific discipline, has been developing rapidly in these five Nordic countries. They have more nurses per capita than other countries (OECD 2016) and healthcare is provided to all citizens. Moreover, nursing qualification in the Nordic countries was based on university education early on, and there are more professors of nursing than in other countries. Accordingly, this book on Leadership in nursing within the Nordic countries shares essential and pioneering expertise that will benefit nurses and nurse scientists around the globe.

Complex Symmetries

Springer Nature This volume is a collection of essays on complex symmetries. It is curated, emphasizing the analysis of the symmetries, not the various phenomena that display those symmetries themselves. With this, the volume provides insight to nonspecialist readers into how individual simple symmetries constitute complex symmetry. The authors and the topics cover many different disciplines in various sciences and arts. Simple symmetries, such as reflection, rotation, translation, similitude, and a few other simple manifestations of the phenomenon, are all around, and we are aware of them in our everyday lives. However, there are myriads of complex symmetries (composed of a bulk of simple symmetries) as well. For example, the well-known helix represents the combination of translational and rotational symmetry. Nature produces a great variety of such complex symmetries. So do the arts. The contributions in this volume analyse selected examples (not limited to geometric symmetries). These include physical symmetries, functional (meaning not morphological) symmetries, such as symmetries in the construction of the genetic code, symmetries in human perception (e.g., in geometry education as well as in constructing physical theories), symmetries in fractal structures and structural morphology, including quasicrystal and fullerene structures in stable bindings and their applications in crystallography and architectural design, as well as color symmetries in the arts. The volume is rounded off with beautiful illustrations and presents a fascinating panorama of this interdisciplinary topic.

The Solid Facts

Social Determinants of Health

International Criminal Law, Volume 3 International Enforcement

BRILL Volume 3 addresses the direct enforcement system, namely international criminal tribunals, how they came about and how they functioned, tracing that history from the end of WWI to the ICC, including the post-WWII experiences. They address the IMT, IMTFE, ICTY, ICTR, the mixed model tribunals and the ICC. It also contains a chapter which addresses some of the problems of the direct enforcement system, namely the general, procedural, evidentiary, and sanctions parts of ICL, which is largely made of what is contained in the statutes of the tribunals mentioned above as well as the jurisprudence of the established tribunals. In addition this volume addresses national experiences with the enforcement of certain international crimes. It is divided into 4 chapters which are titled as: Chapter 1: History of International Investigations and Prosecutions (International Criminal Accountability; International Criminal Justice in Historical Perspective); Chapter 2: International Criminal Tribunals and Mixed Model Tribunals (The International Criminal Tribunal for the Former Yugoslavia; The International Criminal Tribunal for Rwanda; The Making of the International Criminal Court; Mixed Models of International Criminal Justice; Special Court for Sierra Leone; Special Tribunal for Cambodia; East Timor); Chapter 3: National Prosecutions for International Crimes (National Prosecutions for International Crimes; National Prosecutions of International Crimes: A Historical Overview; The French Experience; The Belgian Experience; The Dutch Experience; Indonesia; The U.S. War Crimes Act of 1996; Enforcing ICL Violations with Civil Remedies: The Case of the U.S. Alien Tort Claims Act); Chapter 4: Contemporary Issues in International Criminal Law Doctrine and Practice (Command Responsibility; Joint Criminal Enterprise; The Responsibility of Peacekeepers; The General Part: Judicial Developments; Ne bis in idem; Plea Bargains; Issues Pertaining to the Evidentiary Part of International Criminal Law; Penalties and Sentencing; Penalties: From Leipzig to Arusha; Victims' Rights in International Law).

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Trust, Digital Business and Technology

Issues and Challenges

Taylor & Francis *Trust, Digital Business and Technology: Issues and Challenges* presents and discusses the main issues and challenges related to digital trust and information technologies. The subject of trust is relevant to both practitioners and researchers. It is widely recognized and confirmed that trust, especially mutual trust, when it is built at the right level, reduces the risk of interaction and increases the collaboration between partners. Readers will gain from this book theoretical and practical knowledge on digital trust; theoretically, well-grounded knowledge on digital trust and related concepts, empirically validated by practice. Most authors have taken innovative approaches to consider issues highlighting a selected aspect of the core theme of this book. The intended audiences of this book are professionals, scholars, and students.

Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities

IGI Global Faculty learning communities are a fairly new ideology that is gaining traction among educators and institutions. These communities have numerous benefits on professional development such as enhancing educator preparedness and learning. The possibilities of these communities are endless; however, further study is required to understand how these learning communities work and the best practices and challenges they face. *Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities* shares the experiences and research related to the enhanced professional development received by university faculty and staff participating in a series of collaborative faculty learning communities. The book, using qualitative, quantitative, and mixed methodologies, considers educator experiences as participants in the faculty learning communities, what they learned, and how they applied and implemented best practices in their courses. Covering topics such as curricula, course design, and rubrics, this reference book is ideal for administrators, higher education professionals, program developers, program directors, researchers, academicians, scholars, practitioners, instructors, and students.

The SAGE Handbook of International Higher Education

SAGE The *SAGE Handbook of International Higher Education* examines the internationalization of higher education from a marginal to a core dimension of higher education worldwide. This mainstreaming of internationalization is a fascinating phenomenon: new concepts, programs, providers, and methods of delivery are emerging; impressive national and regional scholarship programs have been established; radical reforms have been undertaken to make higher education globally competitive; and mobility of students and scholars has increased around the world. This groundbreaking handbook

serves as a guide to internationalization of higher education and offers new strategies for its further development and expansion in the years to come. With a decidedly global approach, this volume brings together leading experts from around the world to illustrate the increasing importance of internationalization. The text encompasses the diversity and breadth of internationalization of higher education in all its thematic facets and regional impacts.

Global Health Watch 6

In the Shadow of the Pandemic

Bloomsbury Publishing Global Health Watch (GHW), now in its sixth edition, provides the definitive voice for an alternative discourse on health. It integrates rigorous analysis, alternative proposals and stories of struggles and change to present a compelling case for the imperative to work for a radical transformation of the way we approach actions and policies on health. It was conceived in 2003 as a collaborative effort by activists and academics from across the world, and is designed to question present policies on health and to propose alternatives. Global Health Watch 6 (GHW6) has been coordinated by eight civil society organizations – the People's Health Movement, ALAMES, Health Poverty Action, Medico International, Third World Network, Medact, Sama and Viva Salud. With contributions from across the globe, GHW6 addresses key issues related to health systems and the range of social, economic, political and environmental determinants of health, locating decisions and choices that impact on health in the structure of global power relations and economic governance.

The Handbook of Contemporary Cambodia

Taylor & Francis Offering a comprehensive overview of the current situation in the country, *The Handbook of Contemporary Cambodia* provides a broad coverage of social, cultural, political and economic development within both rural and urban contexts during the last decade. A detailed introduction places Cambodia within its global and regional frame, and the handbook is then divided into five thematic sections: Political and Economic Tensions Rural Developments Urban Conflicts Social Processes Cultural Currents The first section looks at the major political implications and tensions that have occurred in Cambodia, as well as the changing parameters of its economic profile. The handbook then highlights the major developments that are unfolding within the rural sphere, before moving on to consider how cities in Cambodia, and particularly Phnom Penh, have become primary sites of change. The fourth section covers the major processes that have shaped social understandings of the country, and how Cambodians have come to understand themselves in relation to each other and the outside world. Section five analyses the cultural dimensions of Cambodia's current experience, and how identity comes into contact with and responds to other cultural themes. Bringing together a team of leading scholars on Cambodia, the handbook presents an understanding of how sociocultural and political economic processes in the country have evolved. It is a cutting edge and interdisciplinary resource for scholars and students of Southeast Asian Studies, as well as policymakers, sociologists and political scientists with an interest in contemporary Cambodia.

Post-conflict Security, Peace and Development

Perspectives from Africa, Latin America, Europe and New Zealand

Springer This book examines links between post-conflict security, peace and development in Africa, Latin America, Europe and New Zealand. Young peace researchers from the Global South (Uganda, Ivory Coast, Kenya, Brazil, Colombia) as well as from Italy and New Zealand address in case studies traumas in Northern Uganda, demobilisation and reintegration of ex-combatants in the Ivory Coast, economic and financial management of terrorism in Kenya, organised crime in Brazil, mental health issues in Colombia, macro realism in Europe and global defence reforms within the military apparatus since 1990. The book reviews linkages between regional stability, development and peace in post-conflict societies while adding on to the post 2015 international agenda and discusses linkages between peace, security and development.

Proceedings of the Fifth International Conference on the Ethiopian Economy

The Participation of Victims in International Criminal Proceedings

An Expressivist Justice Model

Taylor & Francis This book argues that the expressivist justice model provides a meaningful foundation for the participation of victims in international criminal proceedings. Traditional criminal justice theories have tended to marginalise the role afforded to victims while informing the criminal procedures utilised by international criminal courts. As a result, giving content to, shaping, and enhancing victims' participatory rights have been some of the most debated issues in international criminal justice. This book contributes to this debate by advancing expressivism, which has the capacity to create a

historical narrative of gross human rights violations, as a core of international criminal justice able to provide a worthwhile basis for the participation of victims in proceedings and clarifying the scope and content of their participatory rights. The work provides an in-depth discussion on issues related to victims' participatory rights from the perspective of international human rights law, victimology, and the philosophical foundation of international criminal justice. The book will be a valuable resource for researchers, academics, and policymakers working in the areas of international criminal justice, international human rights law, transitional justice, and conflict studies.

Science and Technology in International Economic Law

Balancing Competing Interests

Routledge Science and technology plays an increasingly important role in the continued development of international economic law. This book brings together well-known and rising scholars to explore the status and interaction of science, technology and international economic law. The book reviews the place of science and technology in the development of international economic law with a view to ensure a balance between the promotion of trade and investment liberalisation and decision-making based on a sound scientific process without hampering technological development. The book features chapters from a range of experts - including Lukasz Gruszczynski, Jürgen Kurtz, Andrew Mitchell and Peter K. Yu - who examine a wide range of issues such as investment law, international trade law, and international intellectual property. By bringing together these issues, the book asks how international trade and investment regimes utilise science and technology, and whether they do so fairly and in the interest of broader public policies. This book will be of great interest to researchers of international economic law, health law, technology law and international intellectual property law.

Water Resources Allocation

Sharing Risks and Opportunities

IWA Publishing Water resources allocation determines who is able to use water resources, how, when and where. It directly affects the value (economic, ecological, socio-cultural) that individuals and society obtain from water resources. This report overviews how allocation works in a range of countries and how the performance of allocation arrangements can be improved to adjust to changing conditions. Capturing information from 27 OECD countries and key partner economies, the report presents key findings from the OECD Survey of Water Resources Allocation and case studies of successful allocation reform. It provides practical policy guidance for water allocation in the form of a "health check", which can be used to assess the performance of current arrangements and manage the transition to improved regimes.
