Getty Publications Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

ASSETIZATION

TURNING THINGS INTO ASSETS IN TECHNOSCIENTIFIC CAPITALISM

MIT Press How the asset—anything that can be controlled, traded, and capitalized as a revenue stream—has become the primary basis of technoscientific capitalism. In this book, scholars from a range of disciplines argue that the asset—meaning anything that can be controlled, traded, and capitalized as a revenue stream—has become the primary basis of technoscientific capitalism. An asset can be an object or an experience, a sum of money or a life form, a patent or a bodily function. A process of assetization prevails, imposing investment and return as the key rationale, and overtaking commodification and its speculative logic. Although assets can be bought and sold, the point is to get a durable economic rent from them rather than make a killing on the market. Assetization examines how assets are constructed and how a variety of things can be turned into assets, analyzing the interests, activities, skills, organizations, and relations entangled in this process. The contributors consider the assetization of knowledge, including patents, personal data, and biomedical innovation; of infrastructure, including railways and energy; of nature, including mineral deposits, agricultural seeds, and “natural capital”; and of publics, including such public goods as higher education and “monetizable social ills.” Taken together, the chapters show the usefulness of assetization as an analytical tool and as an element in the critique of capitalism. Contributors Thomas Beauvisage, Kean Birch, Veit Braun, Natalia Buier, Béatrice Cointe, Paul Robert Gilbert, Hyo Yoon Kang, Les Levidow, Kevin Mellet, Sveta Milyaeva, Fabian Muniesa, Alain Nadaï, Daniel Neyland, Victor Roy, James W. REFERENCE GUIDE TO CHRISTIAN MISSIONARY SOCIETIES IN CHINA: FROM THE SIXTEENTH TO THE TWENTIETH CENTURY

FROM THE SIXTEENTH TO THE TWENTIETH CENTURY

Routledge This comprehensive guide will facilitate scholarly research concerning the history of Christianity in China as well as the wider Sino-Western cultural encounter. It will assist scholars in their search for material on the anthropological, educational, medical, scientific, social, political, and religious dimensions of the missionary presence in China prior to 1950. The guide contains nearly five hundred entries identifying both Roman Catholic and Protestant missionary sending agencies and related religious congregations. Each entry includes the organization's name in English, followed by its Chinese name, country of origin, and denominational affiliation. Special attention has been paid to identifying the many small, lesser-known groups that arrived in China during the early decades of the twentieth century. In addition, a special category of the as yet little-studied indigenous communities of Chinese women has also been included. Multiple indexes enhance the guide's accessibility.

RADIO FREQUENCY AND MICROWAVE ELECTRONICS ILLUSTRATED

Prentice Hall Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE
 Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes:
 A scientific framework for learning RF and microwaves easily and effectively
 Fundamental RF and microwave concepts and their applications
 The characterization of two-port networks at RF and microwaves using S-parameters
 Use of the Smith Chart to simplify analysis of complex design problems
 Key design considerations for microwave amplifiers: stability, gain, and noise
 Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits
 RF and Microwave Integrated Circuits (MICs)
 Novel use of "live math" in circuit analysis and design
 Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to

introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

BALD, BRAVE, AND BLOODY BEAUTIFUL

AuthorHouse It was one of those days that stays with you for the rest of your life: 1 November, 2018, the day I found a small lump in my left breast. I'll never forget that moment. I was filled with dread, fear, and worry about what the future held. I had already seen several family members in the past few months be diagnosed with breast cancer, that dreaded disease. The next day, I was attending a dinner at St. George's Hall, Liverpool, an iconic ceremonial building known throughout the world and the first building visitors see as they exit Lime Street station. It's so iconic that it

has been used as a backdrop for film locations for numerous international movies in recent years. I was attending this dinner because I had been nominated for two awards: Employee of the year, a massive honour, and Innovator of the year. These were two extremely prestigious awards within my place of work, Aintree University Hospital. To say I was overwhelmed would be an understatement but I was truly over the moon for reasons I will go into later in my story.

HOW TO SURVIVE

LESSONS FOR EVERYDAY LIFE FROM THE EXTREME WORLD

Pan Macmillan A splendid book . . . What can surviving in extreme situations teach us about surviving everyday life? John Hudson, Chief Survival Instructor to the British Military, knows what it takes to survive. Combining first-hand experience with twenty years of studying the choices people have made under the most extreme pressure, How to Survive is a lifetime's worth of wisdom about how to apply the principles of survival to everyday life. In How to Survive you will learn how this template for survival can be applied to any situation in your everyday life. Through gripping first-hand accounts of near disaster and survival stories from across the extreme world you will learn that by following these principles you can develop the mindset that will allow you to make better decisions under pressure, which are as equally applicable to first dates and presentations as to climbing Everest and getting lost at sea. REFLECTIONS ON THE CHOLA NAVAL EXPEDITIONS TO SOUTHEAST ASIA

Institute of Southeast Asian Studies The expansion of the Cholas from their

base in the Kaveri Delta saw this growing power subdue the kingdoms of southern India, as well as occupy Sri Lanka and the Maldives, by the early eleventh century. It was also during this period that the Cholas initiated links with Song China. Concurrently, the Southeast Asian polity of Sriwijaya had, through its Sumatran and Malayan ports, come to occupy a key position in East-West maritime trade, requiring engagement with both Song China to the north and the Chola kingdom to its west. The apparently friendly relations pursued were, however, to be disrupted in 1025 by Chola naval expeditions against fourteen key port cities in Southeast Asia. This volume examines the background, course and effects of these expeditions, as well as the regional context of the events. It brings to light many aspects of this key period in Asian history. Unprecedented in the degree of detail assigned to the story of the Chola expeditions, this volume is also unique in that it includes translations of the contemporary Tamil and Sanskrit inscriptions relating to Southeast Asia and of the Song dynasty Chinese texts relating to the Chola Kingdom.

SOUTHPORT AND BOOTLE'S BATTALION, THE 7TH KING'S LIVERPOOL REGIMENT, IN THE FIRST WORLD WAR

Wolverhampton Military Studies This book is a study of the importance and significance of community identity to a fighting unit in the First World War. In this case the unit in question is primarily 7th King's Regiment and more widely the 55th West Lancashire Division, 1914-18. The book is based upon the author's own PhD thesis "The 1/7th Battalion King's Liverpool Regiment and the Great War - the experience of a Territorial battalion and its Home Towns". It is an analysis of the relevance of the local communities to the battalion and its division and its combat effectiveness; the role played by the army in the local communities' involvement in the War; and the post-War ramifications of this relationship. In focusing on 1/7th Battalion Kings Liverpool Regiment, a Territorial battalion based in Bootle, Southport and the surrounding area of south west Lancashire, the thesis follows a typical Territorial unit and its home towns from recruitment and establishment to demobilisation and beyond. A wide range of primary sources have been examined including local newspapers, local Council records, official War Diaries of the various units, battle reports and private papers of several of the combatants in an extensive compilation of research. New perspectives are presented on several aspects of the First World War including the Lusitania riots; the battles of Festubert, 1915, and Givenchy, 1918; and the role of charities in post-War reconstruction work. It also raises general issues about the role of the Territorial Force and draws attention to several gaps in the social and military historiography of the War. The conclusion of the book is that local and community identity contributed significantly towards the 1/7th Kings' morale, organisation and hence battle effectiveness. This contribution initially stemmed from the local recruits themselves but was actively nurtured and encouraged by commanders at Battalion, Brigade and Divisional level throughout the War. It also establishes that by putting the local Battalion at the centre of its concerns, the rather disparate communities were able to organise, coalesce and maximise their War effort and support. Finally, it demonstrates in the post-War years, that, despite the fluctuations in this mutually important relationship, the local identification with the Battalion was maintained in memorialisation, remembrance and reconstruction.
