ROCK ART STUDIES - NEWS OF THE WORLD VOLUME 3

Oxbow Books This is the third in the five-yearly series of surveys of what is happening in rock art studies around the world. As always, the texts reflect something of the great differences in approach and emphasis that exist in different regions. The volume presents examples from Europe, Asia, Africa, and the New World. During the period in question, 1999 to 2004, there have been few major events, although in the field of Pleistocene art many new discoveries have been made, and a new country added to the select list of those with Ice Age cave art. Some regions such as North Africa and the former USSR have seen a tremendous amount of activity, focusing not only on recording but also on chronology, and the conservation of sites. With the global increase of tourism, the management of rock art sites that are accessible to the public is a theme of ever-growing importance.

NORWEGIAN CRUISING GUIDE 8TH—VOL 1

GENERAL CRUISING INFORMATION

Attainable Adventure Cruising Ltd The original, most complete and most up-to-date guide for mariners to the coasts of Norway, Svalbard (Spitsbergen), and the west coast of Sweden. Continuously updated since 1978. Over 900 pages in five volumes. 1000 ports and anchorages. Tips on cruising northern destinations gathered by the authors during 35 years and 150,000 miles of North Atlantic cruising. Insider's perspective from Norwegian authors Hans Jakob and Eli gathered in 45 years of cruising Norway. Planning maps and over 1200 photographs. Includes a harbours and anchorages waypoint file for loading into your plotter or navigation software. This is a fixed layout guide book and so best viewed on tablets although phones will work, particularly larger ones. Can also be viewed in a browser on a computer, but links do not work (Google limitation).

NATURAL AREA TOURISM

ECOLOGY, IMPACTS AND MANAGEMENT

Channel View Publications Natural Area Tourism provides a comprehensive description of tourism in natural areas allowing readers to understand the scope of, complexities arising from, and possibilities of undertaking successful tourism developments in natural areas. Furthermore, the second edition contains an overview of recent developments, such as mountain biking, adventure activities in protected areas and geotourism. There is new content and examples from the Asian region on managing the tourism industry and management effectiveness. The book also considers important new developments in monitoring, such as remote sensing and the use of GIS, as well as the use of electronic educational resources in delivering interpretation. Attention is given to the implications of climate change, inadequate protected area security and the ever-increasing influence of the landscape matrix. Moreover, the second edition includes a comprehensive review of the new literature that has emerged since the publication of the first edition more than a decade ago. Accordingly this book will remain an invaluable resource and account of natural area tourism for many years to come.

ADVENTURE TOURISM

[Routledge](#) Looking at the past, present and future of adventure tourism, *Adventure Tourism: the new frontier* examines the product, the adventure tourist profile, and issues such as supply, geography and sustainability. International case studies are used to illustrate these issues, including: Gorilla watching holidays, Trekking on Mount Everest, Diving holidays, and Outward Bound packages. Analysis of the development and nature of adventure tourism accompanies these studies, ensuring that the title is useful both for undergraduate and postgraduate students of tourism and for professionals involved in managing adventure tourism enterprises. There is also a companion website with additional cases, which can be found at www.bh.com/companions/0750651865.

INTERNATIONAL ENCYCLOPEDIA OF GEOGRAPHY, 15 VOLUME SET**PEOPLE, THE EARTH, ENVIRONMENT AND TECHNOLOGY**

[John Wiley & Sons](#) Representing the definitive reference work for this broad and dynamic field, *The International Encyclopedia of Geography* arises from an unprecedented collaboration between Wiley and the American Association of Geographers (AAG) to review and define the concepts, research, and techniques in geography and interrelated fields. Available as a robust online resource and as a 15-volume full-color print set, the *Encyclopedia* assembles a truly global group of scholars for a comprehensive, authoritative overview of geography around the world. Contains more than 1,000 entries ranging from 1,000 to 10,000 words offering accessible introductions to basic concepts, sophisticated explanations of complex topics, and information on geographical societies around the world. Assembles a truly global group of more than 900 scholars hailing from over 40 countries, for a comprehensive, authoritative overview of geography around the world. Provides definitive coverage of the field, encompassing human geography, physical geography, geographic information science and systems, earth studies, and environmental science. Brings together interdisciplinary perspectives on geographical topics and techniques of interest across the social sciences, humanities, science, and medicine. Features full color throughout the print version and more than 1,000 illustrations and photographs. Annual updates to online edition.

SITE PLANNING, VOLUME 3**INTERNATIONAL PRACTICE**

[MIT Press](#) Ebook Volume 3 of 3. A comprehensive, state-of-the-art guide to site planning, covering planning processes, new technologies, and sustainability, with extensive treatment of practices in rapidly urbanizing countries. *Ebook Volume 3 of 3. Cities are built site by site. Site planning—the art and science of designing settlements on the land—encompasses a range of activities undertaken by architects, planners, urban designers, landscape architects, and engineers. This book offers a comprehensive, up-to-date guide to site planning that is global in scope. It covers planning processes and standards, new technologies, sustainability, and cultural context, addressing the roles of all participants and stakeholders and offering extensive treatment of practices in rapidly urbanizing countries. Kevin Lynch and Gary Hack wrote the classic text on the subject, and this book takes up where the earlier book left off. It can be used as a textbook and will be an essential reference for practitioners. Site Planning consists of forty self-contained modules, organized into five parts: The Art of Site Planning, which presents site planning as a shared enterprise; Understanding Sites, covering the components of site analysis; Planning Sites, covering the processes involved; Site Infrastructure, from transit to waste systems; and Site Prototypes, including housing, recreation, and mixed use. Each module offers a brief introduction, covers standards or approaches, provides examples, and presents innovative practices in sidebars. The book is lavishly illustrated with 1350 photographs, diagrams, and examples of practice.*
