Developing Early Communication, Language and Learning Skills at Home

Creating Personalised Activity Packs for Parents

Routledge *Developing Early Communication, Language and Learning Skills at Home* is full of tried-and-tested, practical activities for children developing their communication, language and learning skills including those with special educational needs and disabilities. This book provides parents, teachers and therapists with a range of playful and engaging activities to consolidate and develop children's language and communication skills at home and school. Organised into five areas, the resource includes motivating activities around the themes of outdoor activities, daily routines, messy play, games for turn-taking and games to encourage creativity and make sense of the world. Features include: • 50 activities, each with a list of equipment, instructions, top tips, key vocabulary and ideas for extending the activity next time • Symbol boards for each activity to support children's understanding and experiences • Photocopiable sheets for ease of use • Guidance on how to tailor activities to the interests and needs of the child to produce a personalised activity pack • An activity checklist to help you maximise your interactions with the child • An activity log to record children's responses and achievements With clear and easy-to-follow instructions, the activities are suitable for use with children who are non-verbal, still developing their early communication or children who are talking. This is an invaluable resource for teachers, teaching assistants or therapists to share relevant activities with parents, and can equally be used by parents as a stand-alone resource. Designed to support the transfer of learning from school to home, this book will empower anyone working with children with SEND to develop children's communication, language and learning through playful interactions.

Early Communication Skills

Routledge This work offers a practical resource for all professionals working with young children, containing educational and therapeutic ideas for use with pre-school children and their parents.

Children's Communication Skills From Birth to Five Years

Routledge Based on a huge body of research in child language and communication development, *Children's Communication Skills* uses a clear format to set out the key stages of communication development in babies and young children. Its aim is to increase awareness in professionals working with children of what constitutes human communication and what communication skills to expect at any given stage. Illustrated throughout with real-life examples, this informative text addresses: normal development of verbal and non-verbal communication skills the importance of play in developing these skills developmental communication problems bilingualism, cognition and early literacy development working with parents of children with communication difficulties. Features designed to make the book an easy source of reference include chapter summaries, age-specific skills tables, sections on warning signs that further help may be needed, and a glossary of key terms. It will be of great use to a wide range of professionals in training or working in health, education and social care.

Early Communication Skills for Children with Down Syndrome A Guide for Parents and Professionals

Woodbine House Newly revised and updated, this compassionate and authoritative guide is based on Libby Kumin's more than thirty years experience working with children and adolescents with Down syndrome and their families. As the founder of the Down Syndrome Center for Excellence at Loyola University in Maryland, she draws on her vast experience to show parents how they can support and encourage their child's speech and language development from birth to age 6 (or when a child can form 2- to 3- word sentences). Parents and teachers learn how to work through characteristic challenges, including hearing loss, intelligibility issues, apraxia (difficulty planning oral-motor movements), or a slower pace of development. Families soon see that many children with Down syndrome are natural and willing communicators. In a warm and conversational style, the author shares her professional expertise in parent-friendly terms. She uses specific examples of difficulties and

successes to illustrate the concepts behind speech and language development, and includes the latest research supporting current early intervention and preschool approaches that can be used at home and in schools. This third edition of **EARLY COMMUNICATION SKILLS** features expanded information on the needs of children with apraxia, dual diagnosis of autism and Down syndrome, and updated terminology and information on special education law. A new chapter explains how technology and augmentative and alternative communication (AAC) ? smartphones, iPods, iPads, and apps ? can help with speech and language, foster communication, and provide inexpensive transitional language systems. Dozens of forms are now included on a CD-ROM to be used for assessment, developing treatment plans, and keeping detailed records of progress. Teachers, speech-language pathologists, and parents will love the convenience of printing multiple copies of forms and organizing information for IEP meetings or periodic evaluations.

All rights not granted by the above license are retained by the author. **Abstract: Social and Communication skills**
ABSTRACT In order to enhance the social skills of autistic children, effective early intervention plans that target their weaknesses are needed. The present study attempted to compare the social abilities of autistic children with that of children with developmental delays and normal development in terms of 3 areas: Social Interaction, Communication and Play by the use of a self-developed assessment tool. Seventy two children who were cognitively functioning at age 2 to 2 years 11 months

participated in the study. Results showed that children with autism demonstrated impairment in 11 aspects under the 3 major areas. A qualitative investigation of the items was also conducted to determine the unique deficits of autistic children in these domains. It is hoped that a deeper understanding of their capacities, and thus their needs can be obtained. 3 DOI: 10.5353/th_b2979161 Subjects: Autistic children Interpersonal communication

Developing Pupils Social Communication Skills

Practical Resources

Routledge Learning to communicate with other people is perhaps the most important learning children do. Children with social communication problems may have trouble picking up the crucial skills of interacting and communicating with their peers, which can have more serious implications later on in life. This resource will help teachers, teaching assistants and therapists to develop and improve the social skills of their younger pupils; provides sets of easily accessible, verbal and non-verbal games and activities to encourage social interaction; provides a clear rationale to the games to help the teacher or teaching assistant really get to grips with how and why these activities can help; provides a structured approach to pupils' social development for pupils in their early and primary years which has been tried, tested and proved to be effective; and includes assessment forms and monthly and daily planning sheets

Scales of Early Communication Skills for Hearing Impaired Children

Child Language Development

Learning to Talk

John Wiley & Sons This publication is concerned with the early stages of language acquisition and is designed for use by early childhood teachers, nursery nurses, special education teachers and others working with children experiencing difficulties in learning to talk. Procedures are described that can be used to assess a child's current skills and plan activities to increase communicative competence. The programme described is based on a developmental sequence that moves the early

skills of joint attention, turn-taking and appropriate play to the more complex skills of asking and answering questions. Other issues discussed include sound development and intelligibility, the use of augmentative and alternative communication as stepping stones to speech, working with children and with families. The second edition has an expanded focus on the place of communicative intentions in early language development.

Prelinguistic Skills and Early Interactional Context as Predictors of Children's Language Development

The Process of Education, Revised Edition

Harvard University Press **Jerome Bruner shows that the basic concepts of science and the humanities can be grasped intuitively at a very early age. Bruner's foundational case for the spiral curriculum has influenced a generation of educators and will continue to be a source of insight into the goals and methods of the educational process.**

Developing Baseline Communication Skills

Games and Activities for 3-5 year

olds

Routledge Developing Baseline Communication Skills is a practical resource designed to fit with baseline assessments in primary school. The second edition of this bestselling resource contains a programme of games and activities to foster personal and social development, and promote language and literacy skills in 3-5 year olds. The book seeks to address language and communication difficulties for children coming into reception class by providing a range of fun and engaging activities. Suitable for whole classes or small groups of children, the activities focus on both personal, social, emotional development as well as language and literacy in areas such as body language, independence, turn taking, listening, speaking and auditory memory. Features include: ? 200 games and activities which are differentiated for different ages and levels of ability; ? A clear aim, equipment list and instructions for each activity; ? Photocopiable templates for ease of use; ? Supplementary resource sheets including pictures and scripts to use with the activities. Now fully revised and updated in line with current policy and legislation, this book is suitable for young children in any school setting including nurseries, playgroups and reception classes. It also includes material that may be used as an effective part of a speech and language therapy programme in consultation with a therapist. This is a unique manual that will be an essential addition to the materials used by professionals working with young children.

Communication Skills in Children with Down Syndrome

A Guide for Parents

Covers speech and language development in children with Down syndrome from infancy through to early adolescence, and what parents and carers can do to help maximise their child's communication potential.

Communication and Interaction in
the Early Years

SAGE "This important book is a thorough account of early communication covering bilingualism and specific areas of learning of reading and writing in early years. It is well laid out, informative and supportive with excellent case studies. " - Eva Mikuska, Senior Lecturer at University of Chichester
The role of the adult in the development of young children's

communications skills through interaction is vital and this book will help you understand this and improve your practice. Taking a chronological approach there is also a particular interest in the needs of two year olds, including the Progress Check at Age Two and the revised requirements of the early years foundation stage. The book features: · Case studies, points for practice and links to video examples · Coverage of bi or multilingual children · Examples of enabling environments for communication and interaction · Ideas of how to work best with parents. Suitable for all those studying or practising in Early Childhood it will develop the way you think about communication and interaction.
