Immigration and National Identity North African Political Movements in Colonial and Postcolonial France I.B. Tauris Immigration is at the heart of social, cultural and political debate in France, a country still struggling to come to terms with its postcolonial legacy. Here Assaoui provides a radical re-examination of the assumptions about immigrants and ethnic and national identity through a study of the Maghrebis, especially their political mobilisation from the colonial to the postcolonial period. Combining insights from the archive and interviews with political activists, he examines the diaspora's voice and their struggle against racism and oppression. Through a study of key political movements, he shows how they constructed a powerful and consistent political tradition and charts the development, in France, of the Algerian anti-colonial and nationalist movement, as well as new forms of political activism during the 1970s. "Immigration and National Identity" foregrounds the migrants' perspective and the necessary historical background to the fraught contemporary context of immigrant communities in France. It will be valuable for all those concerned with immigration, colonialism and postcolonialism, cultural studies, sociology and the study of contemporary France. **Afrikaners in the New South Africa Identity Politics in a Globalised Economy I.B. Tauris** How has the position of Afrikaners changed since the end of the Apartheid regime in South Africa? While the links between Afrikaner nationalist identity and the apartheid regime have been irrevocably altered, it is evident that this newly disempowered minority still commands a vast material and cultural capital. Certain Afrikaans speakers have become important players in the new South Africa and on the world stage. Davies argues that the global political economy and the closely associated ideology of globalization are major catalysts for change in Afrikaner identifications and positions. She identifies multiple Afrikaner constituencies and identities and shows how they play out in the complex social, economic and political landscape of South Africa. Accessible, informative and well-written, "Afrikaners in the New South Africa" is a vital contribution to our understanding of post-apartheid South Africa. It will be indispensable for those interested in South Africa, identity politics, globalization, international political economy and geography. **Foreign Affairs Research Papers Available Postcolonial Migrants and Identity Politics Europe, Russia, Japan and the United States in Comparison Berghahn Books** These transfers of sovereignty resulted in extensive, unforeseen movements of citizens and subjects to their former countries. The phenomenon of postcolonial migration affected not only European nations, but also the United States, Japan and post-Soviet Russia. The political and societal reactions to the unexpected and often unwelcome migrants was significant to postcolonial migrants' identity politics and how these influenced metropolitan debates about citizenship, national identity and colonial history. The contributors explore the historical background and contemporary significance of these migrations and discuss the ethnic and class composition and the patterns of integration of the migrant population. **Political Identity and Democratic Citizenship in Turbulent Times IGI Global** Turbulent times challenge democratic politics and governance in Western countries. Party systems, in many instances, have failed to produce solutions to vital policy problems, like immigration, state borders, welfare, or environmental issues. While subjective perceptions of macroeconomic outcomes are consistently related to political trust at the micro level, few studies have explored how individuals develop political engagement and identity. New insights are needed from studies focusing on how people become politically active and how political identities develop. **Political Identity and Democratic Citizenship in Turbulent Times** is a critical scholarly research publication that investigates, discusses, deconstructs, analyzes, and tests the concept of political identity and its evolving role in modern democracy. Moreover, it explores the contours of politics and brings together studies that examine the democratic potential of a diversity of participatory spheres, institutions, and arenas. Highlighting topics such as political culture, consumerism, and welfare states, this book is ideal for politicians, policymakers, government officials, sociologists, historians, academicians, professionals, researchers, and students. **Language Politics in Contemporary Central Asia National and Ethnic Identity and the Soviet Legacy Bloomsbury Publishing** Nationalist leaders in the former Soviet states strive for national identity in both the political and cultural domains. Their language policies contend with Russian-speaking intelligentsias, numerous ethnic minorities and sizeable Russian communities backed by the Russian Federation - all presenting major challenges to facing the legacy of Soviet rule. Drawing on many years of research, interviews with educators and officials, and visits to the region, Barbara Kellner-Heinkele and Jacob M. Landau explore the politics of language and its intersection with identity in Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan. With special attention to language education in schools and universities within each state and debates over bilingualism versus multilingualism, their insights offer researchers of politics, linguistics and Central Asian studies a comprehensive account of a highly politicised debate. **Muslim Identity Politics Islam, Activism and Equality in Britain Bloomsbury Publishing** The surge in divisive and far-right politics and growing Islamophobia in Britain pose new challenges for Muslim advocacy organisations. British Muslim activism has taken centre stage in the public sphere as a result. Yet for over fifty years Muslim advocacy groups have worked to preserve religious identity, lobby the state and provide concerted responses to the political establishment. This is the first book to chart critically the national and global factors influencing the political mobilisation of British Muslim activists as Muslims. Khadijah Elshayyal traces the changes of thought, direction and method within Muslim identity politics after 1960, noting key organisations and turning points such as the Rushdie Affair, the 9/11 attacks, the 7/7 bombings and the current conflict in Syria. The book argues that the Rushdie Affair prompted new debate around the subject of freedom of expression, which has continued to be a point of contention ever since. Providing a history of the interaction between Muslim advocacy groups and the state, and the impact of state policy on Muslim communities, **Muslims Identity Politics** shows that Muslim citizens continue to experience an 'equality gap' and recommends where transformation and progress can be made. Based on primary sources and in-depth interviews, this book is a vital resource for government officials, policy-makers and researchers interested in multiculturalism, Islamophobia and security issues in Britain. **Regional Integration, Identity & Citizenship in the Greater Horn of Africa Boydell & Brewer Ltd** No description available. **Paradoxical Right-Wing Sexual Politics in Europe Springer Nature** How did far-right, hateful and anti-democratic ideologies become so successful in many societies in Europe? This volume analyses the paradoxical roles sexual politics have played in this process and reveals that the incoherence and untruthfulness in right-wing populist, ultraconservative and far-right rhetorics of fear are not necessarily signs of weakness. Instead, the authors show how the far right can profit from its own incoherence by generating fear and creating discourses of crisis for which they are ready to offer simple solutions. In studies on Poland, Hungary, Spain, Italy, Austria, Ireland, Northern Ireland, Portugal, France, Sweden and Russia, the ways far-right ideologies travel and take root are analysed from a multi-disciplinary perspective, including feminist and LGBTQI reactions. Understanding how hateful and antidemocratic ideologies enter the very centre of European societies is a necessary premise for developing successful counterstrategies. **Political Identity and Conflict in Central Angola, 1975-2002 Cambridge University Press** This book examines the internal politics of the war that divided Angola for more than a quarter-century after independence. In contrast to earlier studies, its emphasis is on Angolan people's relationship to the rival political forces that prevented the development of a united nation. Pearce's argument is based on original interviews with farmers and town dwellers, soldiers and politicians in Central Angola. He uses these to examine the ideologies about nation and state that elites deployed in pursuit of hegemony, and traces how people responded to these efforts at politicisation. The material presented here demonstrates the power of the ideas of state and nation in shaping perceptions of self-interest and determining political loyalty. Yet the book also shows how political allegiances could and did change in response to the experience of military force. In so doing, it brings the Angolan case to the centre of debates on conflict in post-colonial Africa. **Debating Political Identity and Legitimacy in the European Union Routledge** How can we conceptualize identity and legitimacy in the context of the European union? What is the role of narratives, political symbols, public debate and institutional practices in the process of identity formation and legitimacy consolidation? **Debating Political Identity and Legitimacy in the European Union** addresses these questions and brings together high profile scholars from various disciplinary backgrounds to debate the ontological and epistemological aspects of research on identity and legitimacy formation in the EU. Part I investigates key elements such as the relationship between 'Europeanization' of the EU member states and its effect on the political identity of their citizens; the relationship between the politicization of the EU and processes of identity and legitimacy formation; and the indispensability of European identity for legitimizing the EU. Part II looks at pathways to identity formation and legitimacy construction in the EU by considering alternative types of constitutional legitimacy; political symbolism; Europeanization and politicization of the debate on EU focusing on the foreign policy domain. Bringing together a wide but coherent range of high profile perspectives, this book will of interest to students and scholars of European studies, Political Science, Philosophy, Sociology and Law. **The British Labour Party and the Wider World Domestic Politics, Internationalism and Foreign Policy I.B. Tauris** Considers the idea of Labour's international identity, examining how world events and Labour's response to them have helped to shape ideology, political culture and domestic agendas from the 1920s until the Iraq War. **War, Identity and the Liberal State Everyday Experiences of the Geopolitical in the Armed Forces Routledge** This book critically examines the significance of gender, race and sexuality to wars waged by liberal states. Drawing on original field-research with British soldiers, it offers insights into how their everyday experiences are shaped by, and shape, a politics of gender, race and sexuality that not only underpins power relations in the military, but the geopolitics of wars waged by liberal states. Linking the politics of daily life to the international is an intervention into international relations (IR) and security studies because instead of overlooking the politics of the everyday, this book insists that it is vital to explore how geopolitical events and practices are co-constituted, reinforced and contested by it. By utilising insights from Michel Foucault, the book explores how shared and collectively mediated knowledge on gender, race and sexuality facilitates certain claims about the nature of governing in liberal states and about why and how such states wage war against 'illiberal' ones in pursuit of global peace and security. The book also develops post-structural work in international relations by urging scholars interested in the linguistic construction of geopolitics to consider the ways in which bodies, objects and architectures also reinforce particular ideas about war, identity and statehood. **The Routledge Handbook of Security Studies Routledge** Focusing on contemporary challenges, this major new Handbook offers a wide-ranging collection of cutting-edge essays from leading scholars in the field of Security Studies. The field of Security Studies has undergone significant change during the past twenty years, and is now one of the most dynamic sub-disciplines within International Relations. It now encompasses issues ranging from pandemics and environmental degradation to more traditional concerns about direct violence, such as those posed by international terrorism and inter-state armed conflict. A comprehensive volume, comprising articles by both established and up-and-coming scholars, the Handbook of Security Studies identifies the key contemporary topics of research and debate today. This Handbook is a benchmark publication with major importance both for current research and the future of the field. It will be essential reading for all scholars

and students of Security Studies, War and Conflict Studies, and International Relations. American Identity and the Politics of Multiculturalism Cambridge University Press This book uses national public opinion data and public opinion data from Los Angeles to compare ethnic differences in patriotism and ethnic identity and ethnic differences in support for multicultural norms and group-conscious policies. The authors find evidence of strong patriotism among all groups and the classic pattern of assimilation among the new wave of immigrants. Introduction to International Relations Theories and Approaches Oxford University Press Introduction to International Relations provides a concise and engaging introduction to the principal international relations theories and, uniquely, explores how theory can be used to analyse contemporary issues. Readers are introduced to the most important theories, encompassing both classical and contemporary approaches and debates. Throughout the text the authors encourage readers to consider the strengths and weaknesses of the theories presented, and the major points of contention between them. In so doing, the text helps the reader to build a clear understanding of how major theoretical debates link up with each other, and how the structure of the discipline of international relations is established. Jackson and Sørensen place a strong emphasis throughout on the relationship between theory and practice, carefully explaining how theories organise and shape our view of the world. A chapter is dedicated to key global issues and how theory can be used as a tool to analyse and interpret these issues. New to this edition Increased coverage of significant and current issues in global politics, including terrorism, religion, the environment, and war and peace A substantially updated chapter on the contemporary debates in international political economy, including capitalist diversity, models of development, and inequality New end of chapter questions to encourage readers to link the key theories to practice, highlighting how theories matter Inequality, Identity, and the Politics of Northern Ireland Challenges of Peacebuilding and Conflict Transformation Rowman & Littlefield Utilizing a critical sociological perspective, this book examines how overlapping class, gender, and spatial inequalities within and across Unionist and Nationalist communities shape processes of identity formation and party politics in Northern Ireland and implications of such processes on community-based peacebuilding and conflict transformation. The Politics of Becoming European A Study of Polish and Baltic Post-Cold War Security Imaginaries Routledge This book weaves together perspectives drawn from critical international relations, anthropology and social theory in order to understand the Polish and Baltic post-Cold War politics of becoming European. Approaching the study of Europe's eastern enlargement through a post-colonial critique, author Maria Mälksoo makes a convincing case for a rethinking of European identity. Drawing on the theorist Edward Said, she contends that studies of the European Union are marked by a prevailing Orientalism, rarely asking who has traditionally been able to define European identity, and whether this identity should be presented as an historical process rather than a static category. The central argument of this book is that the historical experience of being framed as simultaneously in Europe - and yet not quite in Europe - informs the current self-understandings and security imaginaries of Poland and the Baltic States. Exploring this existential condition of 'liminal Europeaness' among foreign and security policy-making elites, the book considers its effects on key security policy issues, including relations with Western Europe, Russia and the United States. Supported by solid empirical analyses, this book provides an innovative and interdisciplinary approach to the post-Cold War predicament of Poland and the Baltic States. It will be of interest to students and scholars of International Relations, European Studies, Social and Political Theory, and Anthropology. Security, Identity, and British Counterterrorism Policy Springer Counterterrorism laws and policies have become a normalized fixture of security agendas across the globe. How do 'us/them' identity constructions contribute to the legitimizing strategies surrounding this development? The British case provides a historically-situated illustration which is of ongoing significance for security and insecurity today. Emotions, Politics and War Routledge A growing number of scholars have sought to re-centre emotions in our study of international politics, however an overarching book on how emotions matter to the study of politics and war is yet to be published. This volume is aimed at filling that gap, proceeding from the assumption that a nuanced understanding of emotions can only enhance our engagement with contemporary conflict and war. Providing a range of perspectives from a diversity of methodological approaches on the conditions, maintenance and interpretation of emotions, the contributors interrogate the multiple ways in which emotions function and matter to the study of global politics. Accordingly, the innovative contribution of this volume is its specific engagement with the role of emotions and constitution of emotional subjects in a range of different contexts of politics and war, including the gendered nature of war and security; war traumas; post-conflict reconstruction; and counterinsurgency operations. Looking at how we analyse emotions in war, why it matters, and what emotions do in global politics, this volume will be of interest to students and scholars of critical security studies and international relations alike. Religion, Identity, and Global Governance Ideas, Evidence and Practice University of Toronto Press This volume addresses essential themes in international relations today, asking how we can establish when religious identity is a relevant factor in politics, when and how religion can be applied to advance positive, peace-oriented agendas in global governance, and how governments can reconsider their foreign and domestic policies. Politics of Identity in Post-Conflict States The Bosnian and Irish experience Routledge Ireland and the Balkans have come to represent divided and (re)united communities. They both provide effective microcosms of national, ethnic, political, military, religious, ideological and cultural conflicts in their respective regions and, as a result, they demonstrate real and imaginary divisions. This book will specifically focus on the history, politics and literature of Bosnia-Herzegovina and Northern Ireland, while making comparative reference to some of Europe's other disputed and divided regions. Using case-studies such as Kosovo and Serbia; Lithuania, Germany, Poland, Russia and Belarus; Greece and Macedonia, it examines 'space', 'place' and 'border' discourse, the topography of war and violence, post-war settlement and reconciliation, and the location and negotiation of national, ethnic, religious, political and cultural identities. The book will be of particular interest to scholars and students of cultural studies, history, politics, Irish studies, Slavonic studies, area studies and literary studies. The Politics of War Memory and Commemoration Routledge War memory and commemoration have had increasingly high profiles in public and academic debates in recent years. This volume examines some of the social changes which have led to this development, among them the passing of the two World Wars from survivor into cultural memory. Focusing on the politics of war memory and commemoration, the book illuminates the struggle to install particular memories at the centre of a cultural world, and offers an extensive argument about how the politics of commemoration practices should be understood. Discourse of Reciprocity The Role of the Press in the US-Canada Alliance Rowman & Littlefield Discourse of Reciprocity explains an important dynamic in press coverage of the US-Canada alliance and provides a model for using discourse analysis to study news coverage. The cases cover international policymaking in energy, agriculture, and national security since 1980. Library of Congress Subject Headings World Yearbook of Education 2006 Education, Research and Policy: Steering the Knowledge-Based Economy Routledge This volume considers the ways in which educational research is being shaped by policy across the globe. Policy effects on research are increasingly influential, as policies in and beyond education drive the formation of a knowledge-based economy by supporting increased international competitiveness through more effective, evidence-based interventions in schooling, education and training systems. What consequences does this increased steering have for research in education? How do transnational agencies make their influence felt on educational research? How do national systems and traditions of educational research - and relations with policy - respond to these new pressures? What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas? The 2006 volume of the World Yearbook of Education explores these issues, focusing on three key themes: globalising policy and research in education steering education research in national contexts global-local politics of education research. The 2006 volume has a truly global reach, incorporating transnational policy perspectives from the OECD and the European Commission, alongside national cases from across the world in contrasting contexts that include North and South America, Canada, France, Singapore, China, Russia and New Zealand. The range of contributions reflect how pervasive these developments are, how much is new in this situation and to what extent evidence-based policy pressures on research in education build on past relationships between education and policy. This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society. Prizing Children's Literature The Cultural Politics of Children's Book Awards Taylor & Francis Children's book awards have mushroomed since the early twentieth-century and especially since the 1960s, when literary prizing became a favored strategy for both commercial promotion and canon-making. There are over 300 awards for English-language titles alone, but despite the profound impact of children's book awards, scholars have paid relatively little attention to them. This book is the first scholarly volume devoted to the analysis of Anglophone children's book awards in historical and cultural context. With attention to both political and aesthetic concerns, the book offers original and diverse scholarship on prizing practices and their consequences in Australia, Canada, and especially the United States. Contributors offer both case studies of particular awards and analysis of broader trends in literary evaluation and elevation, drawing on theoretical work on canonization and cultural capital. Sections interrogate the complex and often unconscious ideological work of prizing, the ongoing tension between formalist awards and so-called identity-based awards - all the more urgent in light of the "We Need Diverse Books" campaign - the ever-morphing forms and parameters of prizing, and scholarly practices of prizing. Among the many awards discussed are the Pura Belpré Medal, the Inky Awards, the Canada Governor General Literary Award, the Printz Award, the Best Animated Feature Oscar, the Phoenix Award, and the John Newbery Medal, giving due attention to prizes for fiction as well as for non-fiction, poetry, and film. This volume will interest scholars in literary and cultural studies, social history, book history, sociology, education, library and information science, and anyone concerned with children's literature. Library of Congress Catalogs Subject catalog Social Science and the Politics of Modern Jewish Identity Stanford University Press This book traces the emergence and development of an organized, institutionalized Jewish social science, and explores the increasing importance of statistics and other modes of analysis for Jewish elites throughout Europe and the United States. The Zionist movement provided the initial impetus as it looked to the social sciences to provide the knowledge of contemporary Jewish life deemed necessary for nationalist revival. The social sciences offered empirical evidence of the ambiguous condition of the Jewish diaspora, and also charted emancipation and assimilation, viewed as dissolutions of and threats to Jewish identity. Liberal, assimilationist scholars also utilized social science data to demonstrate the continuing viability of Jewish life in the diaspora. Jewish social science grew out of a sustained effort to understand and explain the effects of modernization on Jewry. Above all, Jewish scholars sought to give the enormous transformations undergone by Jewry in the nineteenth century a larger meaning and significance World Politics Simulations in a Global Information Age University of Michigan Press An invaluable guide to creating successful simulations for teaching and scholarly research National Identity and Partisan Polarization Oxford University Press National Identity Identity and Partisan Polarization examines how national identity has become a central issue in political and social life across the world. Questions of identity--who should be counted as a true member of a society and who deserves assistance from the government--have displaced other social and economic issues across nations in many countries. This study considers the role of identity theoretically and in the United States, the United Kingdom, France, Austria, Germany, Sweden, Hungary, Poland, Israel, and Taiwan. Identity varies over time and over countries. Some such as Sweden have a more inclusive sense of identity--one does not need to be born in the country or have ancestry to be considered a true Swede. Other countries, such as Austria, France, Hungary, Poland, Israel, and Taiwan, have a more exclusive notion of identity--where one was born and a common heritage (race, religion, ethnicity) are seen as essential for seeing others as true members of society. Outsiders are viewed negatively, often as threatening a national culture and not deserving of government assistance. In the United States, the United Kingdom, and France, the major political parties take opposing positions on identity. In the United States and the United Kingdom, issues of identity have become highly correlated (polarized) with social and economic issues. In the former Communist countries of Hungary and Poland, the dominant parties have taken nationalist positions on identity but favor generous welfare policies for people of their own background. In Israel and Taiwan, social and economic issues have become less important than nationalism. Contemporary Cases in U.S. Foreign Policy From Terrorism to Trade CQ Press Many actors--from the president and members of Congress to interest groups, NGOs, and the media--compete to shape U.S. foreign policy. Contemporary Cases in U.S. Foreign Policy: From Terrorism to Trade, Fifth Edition, edited by Ralph G. Carter, captures this strategic interplay using 15 real-world cases, of which four are brand new: the death of Osama bin Laden and the use of targeted assassinations, nonproliferation policy and the U.S.-India nuclear agreement, the U.S. reaction to Egypt's collision with the Arab Spring, and the surprise asylum request of blind Chinese dissident Chen Guangcheng. Fully updated to cover the Obama administration, all cases have been revised to reflect recent developments. Whether grappling with use-of-

force questions, the international financial crisis, legal and human rights, trade issues, multilateral approaches to the nuclear programs of North Korea and Iran, or climate change, Carter's engaging case study approach encourages students to question motives, consider alternatives, and analyze outcomes. Identity Change and Foreign Policy Japan and its 'Others' Routledge Identity has become an explicit focus of International Relations theory in the past two to three decades, with one case attracting and puzzling many early identity scholars: Japan. These constructivist scholars typically ascribed Japan a 'pacifist' or 'antimilitarist' identity - an identity which they believed was constructed through the adherence to 'peaceful norms' and 'antimilitarist culture'. Due to the alleged resilience of such adherences, little change in Japan's identity and its international relations was predicted. However, in recent years, Japan's foreign and security policies have begun to change, in spite of these seemingly stable norms and culture. This book seeks to address these changes through a pioneering engagement with recent developments in identity theory. In particular, most chapters theorize identity as a product of processes of differentiation. Through detailed case analysis, they argue that Japan's identity is produced and reproduced, but also transformed, through the drawing of boundaries between 'self' and 'other'. In particular, they stress the role of emotions and identity entrepreneurs as catalysts for identity change. With the current balance between resilience and change, contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon. This book was originally published as a special issue of The Pacific Review.
