Prior to the 1990s, she was the most successful U.S. female Olympian and, in her prime, was widely considered to be the greatest female swimmer in the world. Heading into the 1976 Olympic Games in Montreal, Babashoff was pictured on the cover of *Sports Illustrated* and followed closely by the media. *Hopes*

were high that she would become “the female Mark Spitz.” All of that changed once Babashoff questioned the shocking masculinity of the swimmers on the East German women’s team. Once celebrated as America’s golden girl, Babashoff was accused of poor sportsmanship and vilified by the press with a new nickname: “Surly Shirley.” Making Waves displays the remarkable strength and resilience that made Babashoff such a dynamic champion. From her difficult childhood and beginnings as a determined young athlete growing up in Southern California in the 1960s, through her triumphs as the greatest female amateur swimmer in the world, Babashoff tells her story in the same unflinching manner that made her both the most dominant female swimmer of her time and one of the most controversial athletes in Olympic history.

The Uninhabitable Earth A Story of the Future [Penguin UK](#) ****SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER**** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live-the planet no longer nurturing a dream of abundance, but a living nightmare.

Confessions of an Ivy League Frat Boy A Memoir [Macmillan](#) An account of sordidness and redemption by the Dartmouth fraternity member whose Rolling Stone profile blew the whistle on the frat's inhumane hazing practices. Always trust the brotherhood. Always protect your pledge brothers. What happens in the house stays in the house. Before attending Dartmouth, the worst thing Andrew Lohse had ever done was skip school to attend a John McCain rally. Growing up in suburban New Jersey, he was the typical American honor student: straight-As, on the lacrosse team, president of the Model U.N. He dreamed of following in his grandfather's footsteps and graduating from the Ivy League. When he arrived at Dartmouth, however, he found not the prestigious college of years past, but a wasteland of privilege and moral entropy. And when he rushed Sigma Alpha Epsilon, the fraternity that inspired the rival house in Animal House, Lohse's once-perfect life, as well as his goals, began to crumble around him. Lured by free booze and friendly brothers, Andrew pledged Sigma Alpha Epsilon, and soon his life became a dangerous cycle of binge drinking and public humiliation. From chugging vinegar to swimming in a pool of human waste, Lohse's pledge class endured cruelty and psychological coercion in the hopes of obtaining a bid. Although Andrew succeeded in joining the fraternity, the pattern of abuse continued—except over time, he became the abuser. Told by a contemporary Holden Caulfield, this is a shocking exposé of America's most exclusive institutions and a cautionary tale for modern times.

From Stoke Mandeville to Stratford A History of the Summer Paralympic Games [Common Ground Publishing](#) As Aristotle once said, "If you would understand anything, observe its beginning and its development." When Dr Ian Brittain started researching the history of the Paralympic Games after beginning his PhD studies in 1999, it quickly became clear that there was no clear or comprehensive source of information about the Paralympic Games or Great Britain's participation in the Games. This book is an attempt to document the history of the summer Paralympic Games and present it in one accessible and easy-to-read volume. From the outset, it should be made very clear that this book is not meant to be an academic text. It has always been the author's intention that it should be a resource for anyone with an interest in the Paralympic Games, their history, or Great Britain's participation in the Games. Through twelve years of research, the author has brought together all of the

facts, figures, and interesting stories that have occurred in the development of the summer Games—from their roots at Stoke Mandeville Hospital in the United Kingdom to the global mega-event they have become today. This is the first publication to include images of posters, winner's medals, and other artefacts connected with the Games—some of which have never been seen in print. Every endeavour has been made to include all relevant information, and this text serves as an ideal starting point from which future researchers and historians may begin. As we have noticed recently with the increased documentation of Olympic history, it is the author's hope that this text will inspire others to contribute to a more complete history of the Paralympic Games. A more complete history may lead to a better understanding of the importance of the Paralympic Games and their impact upon the lives of people with disabilities.

While only a handful of swimming events took place that year, the sport has grown considerably since then—at the 2012 Olympic Games in London, there were 16 swimming events on the schedule for both men and women. The growth of competitive swimming has given athletes the opportunity to push the limits in the pool, and for more than a century countless swimmers have done just that, proving their worth to be considered one of the best. *They Ruled the Pool* looks at the careers of the 100 greatest swimmers in history, profiling some of the biggest names the sport has seen, from Mark Spitz and Tracy Caulkins to Janet Evans and Michael Phelps. Each swimmer is ranked based on achievements such as Olympic medals, world and European championships, and world records.
