## Texts Reading Texts, Sacred and Secular

A&C Black **The language, themes and imagery of the Bible have been rewritten into texts across time. In the Revelation of John, the Hebrew Bible echoes and is reinvented, just as in James Hogg's The Private Memoirs and Confessions of a Justified Sinner (1824) many explicit and implicit readings and interpretations of the Bible are offered. In Texts Reading Texts, these readings of the Bible, and the ways in which Revelation and Hogg's Confessions have themselves been read, are considered from the two postmodern perspectives of marginalization and deconstruction. By reading the two seemingly unrelated texts side by side from these perspectives, traditional readings of them both are disturbed and challenged.**

# The Bible Unearthed

## Archaeology's New Vision of Ancient Israel and the Origin of Sacred Texts

Simon and Schuster **In this groundbreaking work that sets apart fact and legend, authors Finkelstein and Silberman use significant archeological discoveries to provide historical information about biblical Israel and its neighbors. In this iconoclastic and provocative work, leading scholars Israel Finkelstein and Neil Asher Silberman draw on recent archaeological research to present a dramatically revised portrait of ancient Israel and its neighbors. They argue that crucial evidence (or a telling lack of evidence) at digs in Israel, Egypt, Jordan, and Lebanon suggests that many of the most famous stories in the Bible—the wanderings of the patriarchs, the Exodus from Egypt, Joshua's conquest of Canaan, and David and Solomon's vast empire—reflect the world of the later authors rather than actual historical facts. Challenging the fundamentalist readings of the scriptures and marshaling the latest archaeological evidence to support its new vision of ancient Israel, The Bible Unearthed offers a fascinating and controversial perspective on when and why the Bible was written and why it possesses such great spiritual and emotional power today.**

## Faith and Its Critics

### A Conversation

OUP Oxford **Heralded as the exponents of a 'new atheism', critics of religion are highly visible in today's media, and include the household names of Richard Dawkins, Daniel Dennett and Sam Harris. David Fergusson explains their work in its historical perspective, drawing comparisons with earlier forms of atheism. Responding to the critics through conversations on the credibility of religious belief, Darwinism, morality, fundamentalism, and our approach to reading sacred texts, he establishes a compelling case for the practical and theoretical validity of faith in the contemporary**

world. An invitation to engage in a rich dialogue, *Faith and Its Critics* supports an informed and constructive exchange of ideas rather than a contest between two sides of the debate. Fergusson encourages faith communities to undertake patient engagement with their critics, to acknowledge the place for change and development in their self-understanding whilst resisting the reductive explanations of the new atheism.

## The Death of Sacred Texts

## Ritual Disposal and Renovation of Texts in World Religions

[Routledge](#) **The Death of Sacred Texts** draws attention to a much neglected topic in the study of sacred texts: the religious and ritual attitudes towards texts which have become old and damaged and can no longer be used for reading

practices or in religious worship. This book approaches religious texts and scriptures by focusing on their physical properties and the dynamic interactions of devices and habits that lie beneath and within a given text. In the last decades a growing body of research studies has directed attention to the multiple uses and ways people encounter written texts and how they make them alive, even as social actors, in different times and cultures. Considering religious people seem to have all the motives for giving their sacred texts a respectful symbolic treatment, scholars have paid surprisingly little attention to the ritual procedures of disposing and renovating old texts. This book fills this gap, providing empirical data and theoretical analyses of historical and contemporary religious attitudes towards, and practices of text disposals within, seven world religions: Judaism, Islam, Christianity, Hinduism, Buddhism, Jainism and Sikhism. Exploring the cultural and historical variations of rituals for religious scriptures and texts (such as burials, cremations and immersion into rivers) and the underlying beliefs within the religious traditions, this book investigates how these religious practices and stances respond to modernization and globalization processes when new technologies have made it possible to mass-produce and publish religious texts on the Internet.

## Biblical Text and Exegetical Culture

## Collected Essays

**Mohr Siebeck** In this wide-ranging collection, Michael Fishbane investigates the complex and diverse relationships between the 'biblical text' and 'exegetical culture.' The author demonstrates the multiple literary dimensions and interpretative strategies that came to form the Hebrew Bible in the context of the ancient Near East, the Dead Sea Scrolls in the context of an emergent biblical-Jewish culture, and the classical rabbinic Midrash in the context of an emergent rabbinic civilization in late antiquity. Within each study, and in the collection as a whole, the author shows a broad range of creative methods, always with a scholarly concern to illuminate the religious ideas of Scripture as it was perceived through diverse hermeneutical lenses and exegetical methodologies. The studies range from the purely literary to the highly analytic, from myth to law, and from studies of symbols to the study of exegetical methods.

## Canaan and Israel in Antiquity: A Textbook on History and Religion

### Second Edition

**A&C Black This comprehensive classic textbook represents the most recent approaches to the biblical world by surveying Palestine's social, political, economic, religious and ecological changes from Palaeolithic to Roman eras. Designed for beginners with little knowledge of the ancient world, and with copious illustrations and charts, it explains how and why academic study of the past is undertaken, as well as the differences between historical and theological scholarship and the differences between ancient and modern genres of history writing. Classroom tested chapters emphasize the authenticity of the Bible as a product of an ancient culture, and the many problems with the biblical narrative as a historical source. Neither "maximalist" nor "minimalist" it is sufficiently general to avoid confusion and to allow the assignment of supplementary readings such as biblical narratives and ancient Near Eastern texts. This new edition has been fully revised, incorporating new graphics and English translations of Near Eastern inscriptions. New material on the religiously diverse environment of Ancient Israel taking into account the latest archaeological discussions brings this book right up to date.**

# The Traditional Text of the Holy Gospels Vindicated and Established

## God, Gender and the Bible

Routledge Deborah Sawyer discusses this crucial yet unresolved question in the context of contemporary and postmodern ideas about gender and power, based on fresh examination of a number of texts from Hebrew and Christian scripture. Such texts offer striking parallels to contemporary gender theories (particularly those of Luce Irigaray and Judith Butler), which have unravelled given notions of power and constructed identity. Through the study of gender in terms of its application by biblical writers as a theological strategy, we can observe how these writers use female characters to undermine human masculinity, through their 'higher' intention to elevate the biblical God. **God Gender and the Bible** demonstrates that both maleness and femaleness are constructed in the light of divine omnipotence. Unlike many approaches to the Bible that offer hegemonist interpretations, such as those that are explicitly Christian or Jewish, or liberationist or feminist, this enlightening and readable study sustains and works with the inconsistencies evident in biblical literature.

## Rewriting Scripture in Second Temple Times

Wm. B. Eerdmans Publishing **The biblical manuscripts found at Qumran, contends Sidnie White Crawford, reflect a spectrum of text movement from authoritative scriptural traditions to completely new compositions. Treating six major groups of texts, she shows how differences in the texts result from a particular understanding of the work of the scribe -- not merely to copy but also to interpret, update, and make relevant the Scripture for the contemporary Jewish community of the time. This scribal practice led to texts that were "rewritten" or "reworked" and considered no less important or accurate than the originals. Propounding a new theory of how these texts cohere as a group, Crawford offers an original and provocative work for readers interested in the Second Temple period.**

## Islamic Philosophy from Its Origin to the Present

### Philosophy in the Land of Prophecy

State University of New York Press **A comprehensive overview of the Islamic philosophical tradition. *Islamic Philosophy from Its Origin to the Present* offers a comprehensive overview of Islamic philosophy from the ninth century to the present day. As Seyyed Hossein Nasr attests, within this tradition, philosophizing is done in a world in which prophecy is the central reality of life—a reality related not only to the realms of action and ethics but also to the realm of knowledge. Comparisons with Jewish and Christian philosophies highlight the relation between reason and revelation, that is, philosophy and religion. Nasr presents Islamic philosophy in relation to the Islamic tradition as a whole, but always treats this philosophy as philosophy, not simply as intellectual history. In addition to chapters dealing with the general historical development of Islamic philosophy, several chapters are devoted to later and mostly unknown philosophers. The work also pays particular attention to the Persian tradition. Nasr stresses that the Islamic tradition is a living tradition with significance for the contemporary Islamic world and its relationship with the West. In providing this seminal introduction to a tradition little-understood in the West, Nasr also shows readers that Islamic**

philosophy has much to offer the contemporary world as a whole. Seyyed Hossein Nasr is University Professor of Islamic Studies at The George Washington University. He is the author and editor of many books, including *Islam: Religion, History, and Civilization*.

## Thinking Biblically

### Exegetical and Hermeneutical Studies

University of Chicago Press **Unparalleled in its poetry, richness, and religious and historical significance, the Hebrew Bible has been the site and center of countless commentaries, perhaps none as unique as Thinking Biblically. This remarkable collaboration sets the words of a distinguished biblical scholar, André LaCocque, and those of a leading philosopher, Paul Ricoeur, in dialogue around six crucial passages from the Old Testament: the story of Adam and Eve; the commandment "thou shalt not kill"; the valley of dry bones passage from Ezekiel; Psalm 22; the Song of Songs; and the naming of God in Exodus 3:14. Commenting on these texts, LaCocque and Ricoeur provide a wealth of new insights into the meaning of the different genres of the Old Testament as these made their way into and were transformed by the New Testament. LaCocque's commentaries employ a historical-critical method that takes into account archaeological, philological, and historical research. LaCocque includes in his essays historical information about the dynamic tradition of reading scripture, opening his exegesis to developments and enrichments subsequent to the production of the original literary text. Ricoeur also takes into account the relation between the texts and the historical communities that read and interpreted them, but he broadens his scope to include philosophical speculation. His commentaries highlight the metaphorical structure of the passages and how they have served as catalysts for philosophical thinking from the Greeks to the modern age. This extraordinary literary and historical venture reads the Bible through two different but complementary lenses, revealing the familiar texts as vibrant, philosophically consequential, and unceasingly absorbing.**
