KEY=TIME - MIKAYLA ELLIS

TIME PRESENT AND TIME PAST

Faber & Faber Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest trigged by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most unexpected way. Time Present and Time Past, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

FOUR QUARTETS

HarperCollins The last major verse written by Nobel laureate T. S. Eliot, considered by Eliot himself to be his finest work Four Quartets is a rich composition that expands the spiritual vision introduced in "The Waste Land." Here, in four linked poems ("Burnt Norton," "East Coker," "The Dry Salvages," and "Little Gidding"), spiritual, philosophical, and personal themes emerge through symbolic allusions and literary and religious references from both Eastern and Western thought. It is the culminating achievement by a man considered the greatest poet of the twentieth century and one of the seminal figures in the evolution of modernism.

TIME PRESENT AND TIME PAST

THE ART OF JOHN EVERETT MILLAIS

Routledge John Everett Millais (1829-1896) is undoubtedly among the most important of Victorian artists. In his day, and our own, he remains also the most controversial. While, during his lifetime, controversy centred around his early Pre-Raphaelite paintings, in particular Christ in the house of his Parents (1850), during the twentieth century the most intense criticism has been directed towards Millais's later works, such as Bubbles (1886), which has been widely condemned as sentimental 'kitsch'. These later paintings have been held up as the epitome of the degradation of art, against which avant-garde and Modernist pioneers struggled. None of the existing literature on Millais addresses the fundamental problem that this double-identity reveals. While there is extensive material on the Pre-Raphaelite movement in general, Millais's own work after the 1850s is rarely discussed in detail, despite the fact that he lived and worked for another 30 years after his abandonment of the Pre-Raphaelite style. Time Present and Time Past: The Art of John Everett Millais presents the first comprehensive account of Millais's artistic career from beginning to end. The book considers the question of 'high' and 'low' cultural status in debates during Millais's own day, and in subsequent critical thinking, situating Millais's art as a whole within this cultural framework.

NO TIME LIKE THE PRESENT

A&C Black Nadine Gordimer is one of our most telling contemporary writers. With each new work, she attacks - with a clear-eyed lack of sentimentality, and an understanding of the darkest depths of the human soul - the inextricable link between personal life and political, communal history. The revelation of this theme in each new work, not only in her homeland South Africa, but the twenty-first century world, is evidence of her literary genius: in the sharpness of her psychological insights, the stark beauty of her language, the complexity of her characters and the difficult choices with which they are faced. In No Time Like the Present, Gordimer brings the reader into the lives of Steven Reed and Jabulile Gumede, a 'mixed' couple, both of whom have been combatants in the struggle for freedom against apartheid. Once clandestine lovers under racist law forbidding sexual relations between white and black, they are now in the new South Africa. The place and time where freedom - the 'better life for all' that was fought for and promised - is being created but also challenged by political and racial tensions, while the hangover of moral ambiguities and the vast and growing gap between affluence and mass poverty, continue to haunt the present. No freedom from personal involvement in these or in the personal intimacy of love. The subject is contemporary, but Gordimer's treatment is timeless. In No Time Like the Present, she shows herself once again a master novelist, at the height of her prodigious powers.

TIME PRESENT, TIME PAST

A MEMOIR

Vintage During his terms in the U.S. Senate, Bill Bradley won a national reputation for thoughtfulness, decency, and a willingness to take controversial positions on issues ranging from tax reform to the rights of Native Americans. All these qualities inform this best-selling memoir, in which Bradley assesses his political career and the experiences that shaped his convictions, and looks beyond them to consider the state of the American union on the eve of the 21st century. Time Present, Time Past offers an intimate portrait of the day-to-day working of the Senate: how legislation gets passed and sometimes thwarted; how money is raised and at what cost. But Bradley also writes about deeper questions: What does it mean to be an American in an ago of dwindling opportunities and increasing inequality? How much can we expect from our public servants? What do we owe our fellow citizens? The result is a genuinely revelatory book, informed by intelligence, compassion, and unprecedented candor. "Strikingly reflects the realities of modern politics, what it looks like, feels like, from the inside."--New York Times Book Review

HISTORY OF THE UNITED STATES FROM ABORIGINAL TIMES TO THE PRESENT DAY

ENCOUNTERING THE PAST WITHIN THE PRESENT

MODERN EXPERIENCES OF TIME

Routledge Encountering the Past within the Present: Modern Experiences of Time examines different encounters with the past from within the present - whether as commemoration, nostalgia, silence, ghostly haunting or combinations thereof. Taking its cue from Hannah Arendt's definition of the present as a time span lying between past and future, the author reflects on the old philosophical question of how to live the good life - not only with others who are physically with us but also with those whose presence is ghostly and liminal. While tradition may no longer command the same authority as it did in antiquity or the middle ages, individuals are by no means severed from the past. Rather, nostalgic longing for bygone times and traumatic preoccupation with painful historical events demonstrate the vitality of the past within the present. Divided into three parts, chapters examine ways in which the legacies of World War II, the Holocaust and communism have been remembered after 1945 and 1989. Maintaining a sustained reflection on the nexus of memory, modernity and time in tandem with ancient questions of responsibility for one another and the world, the volume contributes to the growing field of memory studies from a philosophical perspective. As such, it will appeal to scholars of sociology, social theory and philosophy with interests in collective memory and heritage.

REMEMBRANCE OF THINGS PRESENT

THE INVENTION OF THE TIME CAPSULE

Time capsules offer unexpected insights into how people view their own time, place, and culture, as well as their duties to future generations. Remembrance of Things Present traces the birth of this device to the Gilded Age, when growing urban volatility prompted doubts about how the period would be remembered--or if it would be remembered at all. Yablon details how diverse Americans - from presidents and mayors to advocates for the rights of women, blacks, and workers - constructed prospective memories of their present. They did so by contributing not just written testimony to time capsules but also sources that historians and archivists considered illegitimate, such as photographs, phonograph records, films, and everyday artifacts. By offering a direct line to posterity, time capsules stimulated various hopes for the future. Remembrance of Things Present delves into these treasure chests to unearth those forgotten futures.

HISTORY OF THE INDUCTIVE SCIENCES FROM THE EARLIEST TO THE PRESENT TIME

A GIFT OF TIME

Robledal Press When Micajah Fenton discovers a crater in his front yard with a broken time glider in the bottom and a naked, virtual woman on his lawn, he delays his plans to kill himself. While helping repair the marooned time traveler's glider, Cager realizes it can return him to his past to correct a mistake that had haunted him his whole life. In gratitude for his help, the virtual creature living in the circuitry of the marooned glider, sends Cager back in time as his ten-year-old self, knowing everything he'd known at eighty. As a bonus, it also gives him access to advanced equations of space and time. But living life over knowing the future isn't as easy as Cager anticipated, and he bungles his chance at correcting the most serious mistake of his life. Now he must use his new knowledge of advanced math to build his own time machine to go back and try again. Meanwhile Cager's repairs to the creature's glider fail, keeping it stranded near earth. In desperation, the whale-like creature sends, Ell, a near-human, female copy containing it's consciousness to help Cager. While perfecting time travel, Cager and Ell overcome enormous problems, even being hunted by dinosaurs in the Cretaceous, and Cager falls in love with this indomitable anthropomorphic copy of a creature from across the galaxy.

ECONOMY AND STATE

John Wiley & Sons Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

THE ORDER OF TIME

Penguin UK 'A dazzling book ... the new Stephen Hawking' Sunday Times The bestselling author of Seven Brief Lessons on Physics takes us on an enchanting, consoling journey to discover the meaning of time 'We are time. We are this space, this clearing opened by the traces of memory inside the connections between our neurons. We are memory. We are nostalgia. We are longing for a future that will not come.' Time is a mystery that does not cease to puzzle us. Philosophers, artists and poets have long explored its meaning while scientists have found that its structure is different from the simple intuition we have of it. From Boltzmann to quantum theory, from Einstein to loop quantum gravity, our understanding of time has been undergoing radical transformations. Time flows at a different speed in different places, the past and the future differ far less than we might think, and the very notion of the present evaporates in the vast universe. With his extraordinary charm and sense of wonder, bringing together science, philosophy and art, Carlo Rovelli unravels this mystery. Enlightening and consoling, The Order of Time shows that to understand ourselves we need to reflect on time -- and to understand time we need to reflect on ourselves. Translated by Simon Carnell and Erica Segre

THE EAGLE AND THE DRAGON

GLOBALIZATION AND EUROPEAN DREAMS OF CONQUEST IN CHINA AND AMERICA IN THE SIXTEENTH CENTURY

[John Wiley & Sons](#) In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

WAR IN THE NINETEENTH CENTURY

1800-1914

[John Wiley & Sons](#) This book provides an accessible and up-to-date account of the rich military history of the nineteenth century. It takes a fresh approach, making novel links with conflict and coercion, and moving away from teleological emphases. Naval developments and warfare are included, as are social and cultural dimensions of military activity. Leading military historian Jeremy Black offers the reader a twenty-first century approach to this period, particularly through his focus on the dynamic drive provided by different forms of military goals, or "tasking". This allows echoes with modern warfare to come to the fore and provides a fuller understanding of a period sometimes considered solely as background to the total war of 1914-45. Alongside state-to-state warfare and the move toward "total war", Black's emphasis on different military goals gives due weight to trans-oceanic conflict at the expense of non-Europeans. Irregular, internal and asymmetric war are all considered, ranging from local insurgencies to imperial expeditions, and provide a deliberate shift from Western-centricity. At the very cutting edge of its field, this book is a must read for all students and scholars of military history and its related disciplines.

TIME BIASES

A THEORY OF RATIONAL PLANNING AND PERSONAL PERSISTENCE

[Oxford University Press](#) Should you care less about your distant future? What about events in your life that have already happened? How should the passage of time affect your planning and assessment of your life? Most of us think it is irrational to ignore the future but completely harmless to dismiss the past. But this book argues that rationality requires temporal neutrality: if you are rational you don't engage in any kind of temporal discounting. The book draws on puzzles about real-life planning to build the case for temporal neutrality. How much should you save for retirement? Does it make sense to cryogenically freeze your brain after death? How much should you ask to be compensated for a past injury? Will climate change make your life meaningless? Meghan Sullivan considers what it is for you to be a person extended over time, how time affects our ability to care about ourselves, and all of the ways that our emotions might bias our rational planning. Drawing substantially from work in social psychology, economics and the history of philosophy, the book offers a systematic new theory of rational planning.
