BENJAMIN FRANKLIN: SELF-REVEALED (VOL. 1&2)

e-artnow Benjamin Franklin, Self-Revealed is a biographical and critical study on Benjamin Franklin's life and work mostly based on Franklin's own writings. Benjamin Franklin (1706-1790) was an American polymath and one of the Founding Fathers of the United States. Franklin was a leading writer, printer, political philosopher, politician, Freemason, postmaster, scientist, inventor, humorist, civic activist, statesman, and diplomat. As a scientist, he was a major figure in the American Enlightenment and the history of physics for his discoveries and theories regarding electricity. As an inventor, he is known for the lightning rod, bifocals, and the Franklin stove, among other inventions. THE POETICAL WORKS OF LORD BYRON, COMPLETE IN ONE VOLUME

REPRESENTATIONS OF TECHNOLOGY IN SCIENCE FICTION FOR YOUNG PEOPLE

Routledge In this new book, Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present, exposing the anti-technological bias existing within a genre often associated with the celebration of technology. Applebaum argues that perceptions of technology as a corrupting force, particularly in relation to its use by young people, are a manifestation of the enduring allure of the myth of childhood innocence and result in young-adult fiction that endorses a technophobic agenda. This agenda is a form of resistance to the changing face of childhood and technology's contribution to this change. Further, Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous, while it neglects to acknowledge children's complex, yet pleasurable, interactions with technology today. The study looks at works by well-known authors including M.T. Anderson, Monica Hughes, Lois Lowry, Garth Nix, and Philip Reeve, and explores topics such as ecology, cloning, the impact of technology on narrative structure, and the adult-child hierarchy. While focusing on the popular genre of science fiction as a useful case study, Applebaum demonstrates that negative attitudes toward technology exist within children's literature in general, making the book of considerable interest to scholars of both science fiction and children's literature.

TENNYSON'S POEMS

NEW TEXTUAL PARALLELS

[Open Book Publishers](#) In *Tennyson's Poems: New Textual Parallels*, R. H. Winnick identifies more than a thousand previously unknown instances in which Tennyson phrases of two or three to as many as several words are similar or identical to those occurring in prior works by other hands—discoveries aided by the proliferation of digitized texts and the related development of powerful search tools over the three decades since the most recent major edition of Tennyson's poems was published. Each of these instances may be deemed an allusion (meant to be recognized as such and pointing, for definable purposes, to a particular antecedent text), an echo (conscious or not, deliberate or not, meant to be noticed or not, meaningful or not), or merely accidental. Unless accidental, Winnick writes, these new textual parallels significantly expand our knowledge both of Tennyson's reading and of his thematic intentions and artistic technique. Coupled with the thousand-plus textual parallels previously reported by Christopher Ricks and other scholars, he says, they suggest that a fundamental and lifelong aspect of Tennyson's art was his habit of echoing any work, ancient or modern, which had the potential to enhance the resonance or deepen the meaning of his poems. The new textual parallels Winnick has identified point most often to the King James Bible and to such canonical authors as Shakespeare, Milton, Dryden, Pope, Thomson, Cowper, Shelley, Byron, and Wordsworth. But they also point to many authors rarely if ever previously cited in Tennyson editions and studies, including Michael Drayton, Richard Blackmore, Isaac Watts, Erasmus Darwin, John Ogilvie, Anna Lætitia Barbauld, Letitia Elizabeth Landon, John Wilson, and—with surprising frequency—Felicia Hemans. *Tennyson's Poems: New Textual Parallels* is thus a major new resource for Tennyson scholars and students, an indispensable adjunct to the 1987 edition of Tennyson's complete poems edited by Christopher Ricks.
