Short Essays on Women and Society

Manipuri Women through the Century

FSP Media Publications This book deals with the personal experiences and feelings of the author. These poems describe the eventful life's journey of the author where she finds life a beautiful blank sheet of waves and whenever she stepped upon her unknowingly trying to overcome the instances. The book defines the vast momentum and love of the author where she loves to explore the ardent emotional powers and loves to write about the admiring violent impetus curbing the whole wild nature as well as the unique female cosmos, holiness. The author describes the experiences she had during her childhood period where she was permanently force to wear the same old school forks, shirts and socks and she happily describes the joyous moments when she walk down the street, crossing the water filled paddy field deep into the water, on the rainy day with those old rubber shoes. The book also beautifully highlighted the nature's epitome of unconditional love and how men trample upon through the natures' beauty; the author seems to describe the numbers of affection developed within her consciousness with the environment. There are innumerable instances of the poet's feelings describing the quantum moments of her sisterhood with their sisters and brothers relationship, of her emotions describing how she rules her own self and her kingdom where she beautifully describe her wilderness without egos. The book also describes the authors' love for the animals, rainy seasons, and snowy winter and she also hunts for the reasons of the reasoning truth of the society, of the humanity and of the self destruction. There are beautiful instances where the author express her illusionist moments which she find herself lost into the vast unpredicted desires and effort less to handle but just letting go of all those moments and never giving up of herself remembering little things in her life. This book is indeed a beautiful master piece of the writer all sum up in one go.

American Women Short Story Writers

A Collection of Critical Essays

Routledge This collection of original and classic essays examines the contributions that female authors have made to the short story. The introductory chapter discusses why genre critics have ignored works by women and why feminist scholars have ignored the short story genre. Subsequent chapters discuss early stories by such authors as Lydia Maria Child and Rose Terry Cooke. Others are devoted to the influences (race, class, sexual orientation, education) that have shaped women's short fiction through the years. Women's special stylistic, formal and thematic concerns are also discussed in this study. The final essay addresses the ways our contemporary creative-writing classes are stifling the voices of emerging young female authors. The collection includes an extensive five-part bibliography.

Selling Women Short

Gender and Money on Wall Street

Princeton University Press Rocked by a flurry of high-profile sex discrimination lawsuits in the 1990s, Wall Street was supposed to have cleaned up its act. It hasn't. *Selling Women Short* is a powerful new indictment of how America's financial capital has swept enduring discriminatory practices under the rug. Wall Street is supposed to be a citadel of pure economics, paying for performance and evaluating performance objectively. People with similar qualifications and performance should receive similar pay, regardless of gender. They don't. Comparing the experiences of men and women who began their careers on Wall Street in the late 1990s, Louise Roth finds not only that women earn an average of 29 percent less but also that they are shunted into less lucrative career paths, are not promoted, and are denied the best clients. *Selling Women Short* reveals the subtle structural discrimination that occurs when the unconscious biases of managers, coworkers, and clients influence performance evaluations, work distribution, and pay. In their own words, Wall Street workers describe how factors such as the preference to associate with those of the same gender contribute to systematic inequality. Revealing how the very systems that Wall Street established ostensibly to combat discrimination promote inequality, *Selling Women Short* closes with Roth's frank advice on how to tackle the problem, from introducing more tangible performance criteria to curbing gender-stereotypical client entertaining activities. Above all, firms could stop pretending that market forces lead to fair and unbiased outcomes. They don't.

Women and Relationships in Contemporary Irish Women's Short Stories

□□□□□□□□ This book examines archetypal motifs related to aspects of human relationships in contemporary Irish women's short stories from the late 1960s to the present. These relationships examined embrace not only relationships between men and women, as married couples and lovers, but also women to women relationships as mothers, daughters, sisters or lovers. This book has uncovered certain recurrent motifs which may be construed as archetypal and are employed as a narrative device to express a certain level of feminist awareness by Irish female writers in their stories against the backdrop of Irish feminism emerged in the late 1960s. This feminist aspect of Irish women's stories appears to address the paradoxes of patriarchal ideology underlying male domination in male/female courtship and marriages, the conflict between patriarchally loyal mothers and rebellious daughters, powerless, but rival, female siblings and peers competing for limited resources and male attention under the Father's law. Motifs of resistance and subversion serve in these stories as metaphors unveiling female protests against an ideology which defines and confines women in the Irish patriarchal context. This book demonstrates a process of transition during which Irish female writers progress from the depiction of women who struggle and fight against unfairness and distortion within an 'androcentric' culture to a new direction in which such writers describe a situation where women recognise the internalisation of the 'false consciousness' of patriarchy and, out of this recognition, may be eventually able to develop further their sense of self and individuality. The archetypal motifs in Irish women's stories also illustrate a kind of continuity of an ancient female archetype of female rebellious powers which in female literary imagination never ceases to resurface in the face of patriarchal suppression.

Feminism Unfinished: A Short, Surprising History of American Women's Movements

W. W. Norton & Company Reframing feminism for the twenty-first century, this bold and essential history stands up against "bland corporate manifestos" (Sarah Leonard). Eschewing the conventional wisdom that places the origins of the American women's movement in the nostalgic glow of the late 1960s, *Feminism Unfinished* traces the beginnings of this seminal American social movement to the 1920s, in the process creating an expanded, historical narrative that dramatically rewrites a century of American women's history. Also challenging the contemporary "lean-in," trickle-down feminist philosophy and asserting that women's histories all too often depoliticize politics, labor issues, and divergent economic circumstances, Dorothy Sue Cobble, Linda Gordon, and Astrid Henry demonstrate that the post-Suffrage women's movement focused on exploitation of women in the workplace as well as on inherent sexual rights. The authors carefully revise our "wave" vision of feminism, which previously suggested that there were clear breaks and sharp divisions within these media-driven "waves." Showing how history books have obscured the notable activism by working-class and minority women in the past, *Feminism Unfinished* provides a much-needed corrective.

British Women's Short Supernatural Fiction, 1860–1930

Our Own Ghostliness

Springer Nature This book explores women's short supernatural fiction between the emergence of first wave feminism and the post-suffrage period, arguing that while literary ghosts enabled an interrogation of women's changing circumstances, ghosts could have both subversive and conservative implications. Haunted house narratives by Charlotte Riddell and Margaret Oliphant become troubled by uncanny reminders of the origins of middle-class wealth in domestic and foreign exploitation. Corpse-like revenants are deployed in Female Gothic tales by Mary Elizabeth Braddon and Edith Nesbit to interrogate masculine aestheticisation of female death. In the culturally-hybrid supernaturalism of Alice Perrin, the 'Marriage Question' migrates to colonial India, and psychoanalytically-informed stories by May Sinclair, Eleanor Scott and Violet Hunt explore just how far gender relations have really progressed in the post-First World War period. Study of the woman's short story productively problematises literary histories about the "golden age" of the ghost story, and about the transition from Victorianism to modernism.
